4.4 Liquidated Damages. The City and Contractor recognize that time is of the essence of this Agreement and that the City will suffer financial loss if the Work is not completed within the contract times specified in Article 4.3, **Days to Achieve Contract Times, above.** The actual fact of the occurrences of damages and the actual amount of the damages which City would suffer if the Work were not completed within the specified times set forth above are dependent upon many circumstances and conditions which could prevail in various combinations, and, from the nature of the case, it would be impracticable and extremely difficult to fix the actual damages.

Damages which City would suffer in the event of delay include loss of the use of the Project, and, in addition, expenses of prolonged employment of an architectural and engineering staff; costs of administration, construction management, inspection, and supervision; the loss suffered by the public within the City's constituent cities by reasons of the delay in the completion of the project to serve the public at the earliest possible time; and, costs associated with ongoing and extended permit compliance.

Accordingly, the City and Contractor agree that as liquidated damages for delay, in accordance with California Government Code Section 53069.85, Contractor will forfeit and pay to the City liquidated damages in the amounts set forth in the table below, per day for each and every calendar day that expires after the time for completion specified in the above Section 4.3, Days to Achieve Contract Times, except as otherwise provided by extension of time pursuant to Section 00700-8.04, Time Extensions, of the General Conditions.

It is further understood and agreed in accordance with California Government Code Section 53069.85 that the liquidated damages sum specified in this provision is not manifestly unreasonable under the circumstances existing at the time this Agreement was made, and that the City may deduct liquidated damages sums in accordance with this provision from any payments due or that may become due Contractor.

In addition to the liquidated damages specified in the above Section 4.4, **Liquidated Damages**, the City and Contractor agree that penalties imposed on and costs incurred by the City as a result of violations of such requirements caused by the actions or inactions of the

The bonds must be issued by a surety company admitted in California and with a current A.M. Best's rating of no less than A-VIII or equivalent, unless otherwise approved by Agency.

Any alteration(s) made in any provision of this Agreement shall not operate to release any surety from liability on any bond required hereunder and the consent to make such alteration(s) is hereby given, and any surety on said bonds hereby waives the provisions of Sections 2819 and 2845 of the California Civil Code.

**"REVISED" SCHEDULE OF MAJOR EQUIPMENT AND MATERIAL SUPPLIERS,
PRODUCTS IDENTIFIED BY NAME AND SUBSTITUTION - 07/18/2022**

SUBSTITUTION OF ALTERNATIVE MATERIALS, ARTICLES, OR EQUIPMENT

Bidders must designate the manufacturer/supplier of each item of equipment, materials, or system included on the attached list. The Bidder shall name a manufacturer for each item and the supplier of the item if the supplier is not the manufacturer.

Bids must be based upon use of items named in the Contract Documents. By so indicating, the Bidder warrants that equipment manufactured and/or supplied by the named manufacturer will be provided on the Project unless review of submittal information or performance under tests reveals that the equipment does not meet the Contract requirements.

Failure to indicate a manufacturer for any single item of the equipment listed in the schedule may render the Bid unresponsive to the Notice Inviting Bids and may be a basis for rejection of the Bid. If the Bidder fails to identify a manufacturer/supplier for any item shown on this list, the City has the right to waive such omission. In such case it will be assumed that the manufacturer/supplier to be used by the Bidder will be the first listed manufacturer/supplier identified for the given item under these Specifications without change in the contract price.

In certain cases, specific items have been named (Named Products) because of design, operational or maintenance considerations; proposed equals will may not be allowed.

Pursuant to California Public Contract Code §3400, alternative material(s), article(s), or equipment that are of equal quality and of required characteristics for the purpose intended may be proposed for items not specifically named below provided the Bidder complies with the following requirements:

- A. The proposal will not be considered unless the submittal is accompanied by complete information and descriptive data necessary to determine equality of offered material(s), article(s) or equipment.
- B. Samples must be submitted when requested by the City.
- C. Burden of proof as to comparative quality, suitability, and performance of offered material(s), article(s), or equipment is the responsibility of the Bidder submitting the proposal.
- D. Requests for approval must comply with the requirements of Section 01340, Shop Drawings, Product Data and Samples.

City's Authorized Representative is the sole judge as to such matters. In the event City's Authorized Representative rejects the use of such Alternative(s) submitted, then the Contractor must furnish one of the particular Named Products specified in the Contract Documents.

Proposals for Alternative material(s), process, article(s), or equipment will not be accepted during the bid period.

**"REVISED " SCHEDULE OF MAJOR EQUIPMENT AND MATERIAL SUPPLIERS,
PRODUCTS IDENTIFIED BY NAME AND SUBSTITUTION - 07/18/2022**

Submissions for Evaluation shall comply with the following requirements:

- A. The Contractor shall submit to the City in accordance with Public Contract Code Section 3400, after contract award but no later than thirty-five (35) days after the date of Notice to Proceed, proposal(s) for acceptance of a proposed Equal Item for a Specified Item or a Substitution. At the sole discretion of the City, City may give written consent to the submission of the proposed Equal Item or Substitution after the expiration of the thirty-five (35) day time limit.
- B. The Contractor shall submit sufficient data, drawings, samples, literature, calculations, and all other information requested by City to demonstrate to the City that the proposed Equal Item or Substitution is a suitable replacement for the Specified Item(s).
- C. Failure of the Contractor to submit the proposed Equal Item or Substitution for review in the manner and time described above shall be sufficient cause for rejection by the City of the proposed Equal Item or Substitution.

Submission of items which are proposed as substitution of the Specified Items shall be subject to requirements for proposed equal evaluation and the following additional provisions:

- A. Substitution(s) of Specified Item(s) proposed by the Contractor may require modifications in the Project design, Project schedule, and/or construction sequencing. The Contractor shall identify all necessary project modifications required for the substitution(s). Necessary project modifications may include, but not be limited to, construction cost (credit), electrical, instrumentation, structural, mechanical, architectural, testing, engineering costs, and other related modifications.
- B. The Contractor is responsible for all costs associated with the substitutions(s) including submittal reviews and any project redesigns and modifications. Contractor refusal to accept any of these costs shall be just cause for disapproval of the substitution(s).
- C. The City will review and respond in writing to the Contractor's proposed substitution within thirty (30) days after receipt of all information the City requires to make a final determination.
- D. If the proposed items are accepted, all cost saving shall be credited to the City.

D. CONTRACTOR SAFETY RECORD

Part of the determination of bidder's responsiveness will be based on its safety record, using three methods. For the Bidder's bid to be considered, the Bidder shall meet at least two of the three minimum safety standards as specified herein. If the Bidder is a Joint Venture of two or more companies, each Principal in the Joint Venture shall meet the safety requirements, and complete the required forms, included herein as part of the bid.

1. Experience Modification (EMR)
 - a. Experience modification rates are calculated by the insurance industry as a way to determine equitable workers' compensation insurance premiums. It is calculated as a three-year moving average.
 - b. Due to the particular safety hazards inherent in working in a wastewater collection, handling, treatment and/or disposal environment, the Owner has deemed it necessary that a Bidder shall have a current three-year average EMR of 1.0 or lower to be considered a responsive Bidder.
2. Recordable Incident Rate (RIR)
 - a. The RIR is a measure of the frequency of injuries and is a measure of all occupational injuries and illnesses that occur within an organization. It is calculated from the OSHA Log 300 form.
 - b. Due to the particular safety hazards inherent in working in a wastewater collection, handling, treatment and/or disposal environment, the Owner has deemed it necessary that a Bidder shall have a current three-year average RIR of 3.4 or lower to be considered a responsive Bidder. This value is based on the most recent State of California Division of Labor Statistics and Research RIR value for Heavy and Civil Engineering Construction, Utility System Construction, Water and Sewer Line and Related Structures (NAICS Code 23711).
3. Lost Time Incident Rate (LTIR)
 - a. The LTIR is an indicator of the severity of a company's occupational injuries.
 - b. The LTIR deals only with incidents that result in lost work time. Like the RIR, the information needed to calculate the LTIR is derived from the OSHA Log 300 form.
 - c. Due to the particular safety hazards inherent in working in a wastewater collection, handling, treatment and/or disposal environment, the Owner has deemed it necessary that a Bidder shall have a current three-year average LTIR of 0.9 or lower to be considered a responsive Bidder. This value is based on the most recent State of California LTIR value for Heavy and Civil Engineering Construction, Utility System Construction.

Bidder shall submit the appropriate EMR, RIR, and LTIR proposal forms included following this section as part of the bid to demonstrate the Bidder's safety qualifications.
