Hours of Public Comment: 23.1		

### QUESTION 1

**What is the primary reason you use the Mary Avenue crossing location?**

		<b>%</b>	<b>Count</b>
Commuting for work		20.6%	95
Commuting for school		1.3%	6
Getting to parks, trails, or other recreation spots		6.1%	28
Accessing businesses and amenities close to this location		30.1%	139
Getting to downtown Sunnyvale		5.0%	23
Getting to downtown Mountain View		11.7%	54
I do not or rarely travel through here		14.5%	67
Other		10.8%	50

### QUESTION 2

**Taking into account the criteria and trade-offs that are important to you, which option do you prefer for the Mary Avenue crossing of the Caltrain tracks?**

		<b>%</b>	<b>Count</b>
Underpass of Mary and Evelyn intersection		27.0%	124

### Caltrain crossing options at Mary and Sunnyvale avenues

How should we change the Caltrain crossings at Mary and Sunnyvale avenues?

		%	Count
Underpass of Mary Avenue with "jug handle" connection to Evelyn Avenue		49.0%	225
I like both options equally.		6.5%	30
I don't like either option.		17.4%	80

#### QUESTION 3

What are the top 3 reasons that you prefer the Mary Avenue crossing option that you selected?

		%	Count
This is the safest option.		24.2%	112
This will best reduce noise from crossing gate bells and train horns.		11.0%	51
This will best reduce noise from vehicle traffic.		8.2%	38
This has better circulation patterns for cars, buses, etc.		32.3%	149
This has better circulation patterns for bicyclists, scooters, etc.		35.7%	165
This has better circulation patterns for pedestrians.		14.9%	69
This option has less potential private property impacts.		23.6%	109
This option has less construction impacts.		23.4%	108
This option has a lower construction cost estimate.		37.0%	171
Other		18.8%	87

#### QUESTION 4

What is your primary travel mode through this crossing?

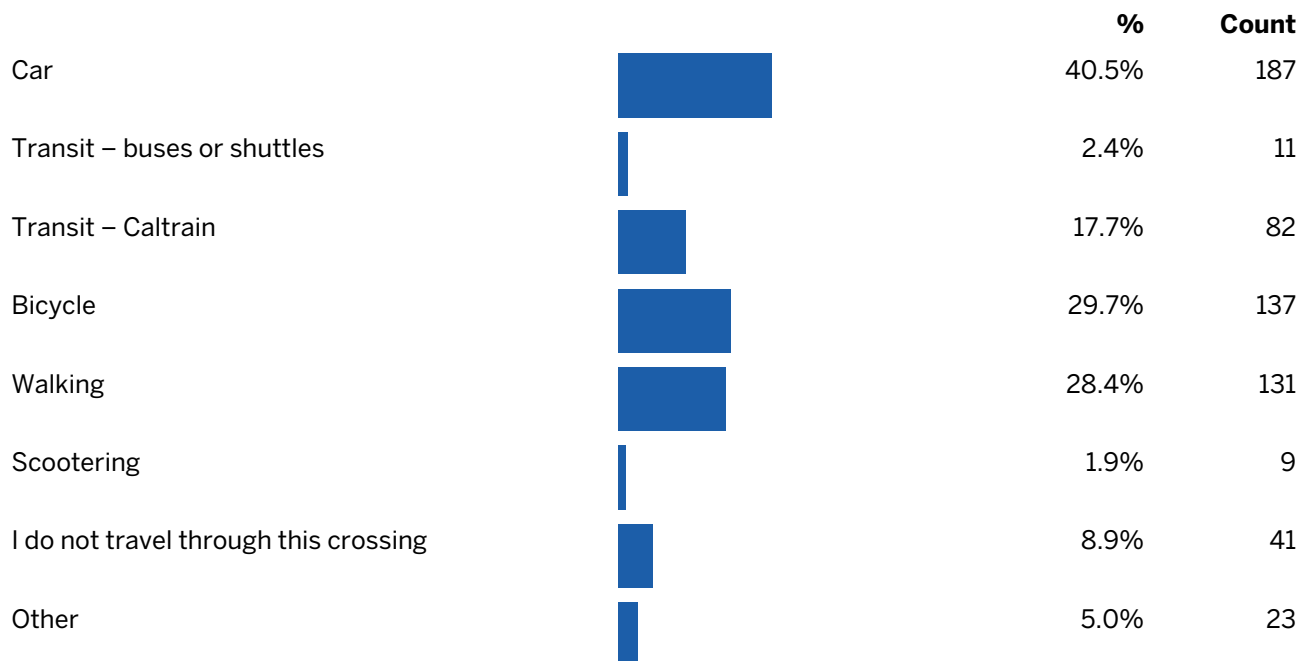

### Caltrain crossing options at Mary and Sunnyvale avenues

How should we change the Caltrain crossings at Mary and Sunnyvale avenues?

#### QUESTION 5

**What other travel modes do you use through this crossing?**

### Caltrain crossing options at Mary and Sunnyvale avenues

How should we change the Caltrain crossings at Mary and Sunnyvale avenues?

#### QUESTION 6

**If Mary Avenue was grade separated (the train tracks separated from the roadway), would you be more likely to use non-vehicle modes (bicycling, walking, scootering, etc.) to travel through the intersection?**

		%	Count
Yes, because I would feel safer without the train tracks		11.1%	50
Yes, because the project is adding bicycle and pedestrian improvements		16.7%	75
Yes, both of the above		17.8%	80
No, I would use vehicles more often		3.8%	17
No, I would use vehicles the same amount		50.7%	228

#### QUESTION 7

**Any other comments regarding the Mary Avenue crossing option?**

Answered	131
Skipped	331

#### QUESTION 8

**What is the primary reason you use the Sunnyvale Avenue crossing location?**

		%	Count
Commuting for work		16.3%	73
Commuting for school		1.3%	6
Getting to parks, trails, or other recreation spots		6.9%	31
Accessing businesses and amenities close to this location		34.2%	153
Getting to downtown Sunnyvale		24.8%	111

### Caltrain crossing options at Mary and Sunnyvale avenues

How should we change the Caltrain crossings at Mary and Sunnyvale avenues?

		%	Count
Getting to downtown Mountain View		0.4%	2
I do not or rarely travel through here		11.0%	49
Other		4.9%	22

#### QUESTION 9

**Taking into account the criteria and tradeoffs that are important to you, which option do you prefer for the Sunnyvale Avenue crossing of the Caltrain tracks?**

		%	Count
Underpass Tunnel of Sunnyvale Avenue underneath Evelyn Ave, Caltrain tracks, and Hendy Ave		28.8%	131
Bicycle and Pedestrian only Underpass of Sunnyvale – No cars		55.8%	254
I like both options equally.		2.6%	12
I don't like either option.		12.7%	58

#### QUESTION 10

**What are the top 3 reasons that you prefer the Sunnyvale Avenue crossing option that you selected?**

		%	Count
This is the safest option.		37.3%	171
This will best reduce noise from crossing gate bells and train horns.		11.5%	53
This will best reduce noise from vehicle traffic.		10.7%	49
This has better circulation patterns for cars, buses, etc.		31.4%	144
This has better circulation patterns for bicyclists, scooters, etc.		40.7%	187

### Caltrain crossing options at Mary and Sunnyvale avenues

How should we change the Caltrain crossings at Mary and Sunnyvale avenues?

		%	Count
This has better circulation patterns for pedestrians.		27.2%	125
This option has less potential private property impacts.		14.8%	68
This option has less construction impacts.		16.6%	76
This option has a lower construction cost estimate.		29.2%	134
Other		16.6%	76

#### QUESTION 11

**What is your primary travel mode through this crossing?**

		%	Count
Car		61.4%	278
Transit – buses or shuttles		0.4%	2
Transit – Caltrain		1.1%	5
Bicycle		22.5%	102
Walking		9.1%	41
I do not travel through this crossing		4.6%	21
Other		0.9%	4

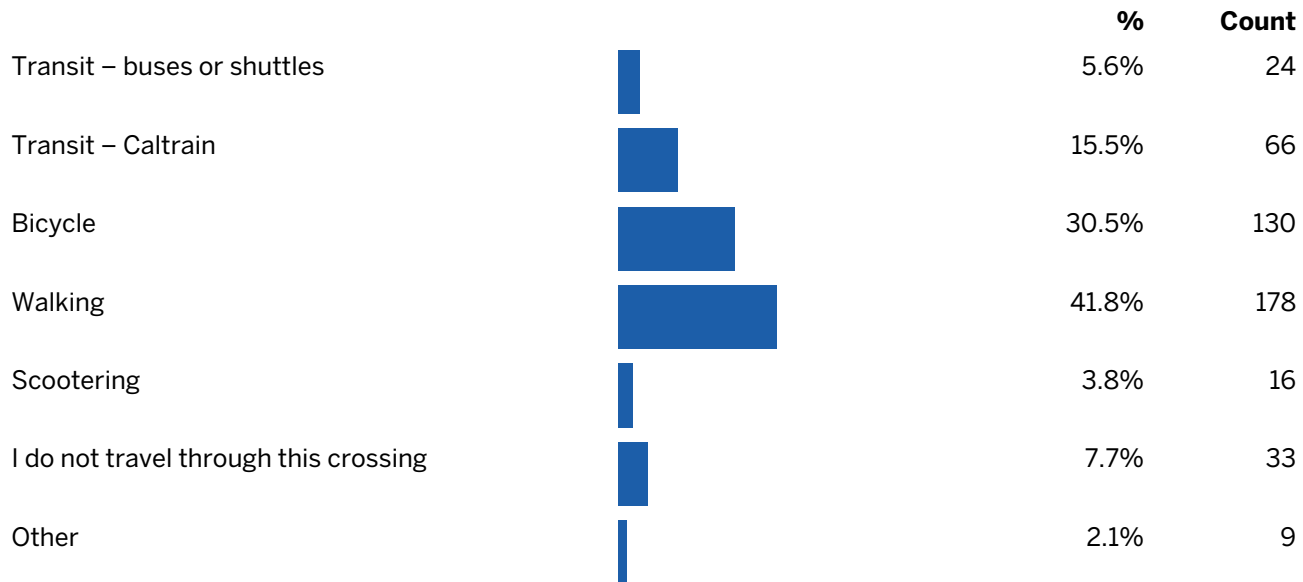

#### QUESTION 12

**What other travel modes do you use through this crossing?**

		%	Count
Car		41.5%	177

## Caltrain crossing options at Mary and Sunnyvale avenues

How should we change the Caltrain crossings at Mary and Sunnyvale avenues?

## Survey Questions

### QUESTION 1

**What is the primary reason you use the Mary Avenue crossing location?**

- Commuting for work
- Commuting for school
- Getting to parks, trails, or other recreation spots
- Accessing businesses and amenities close to this location
- Getting to downtown Sunnyvale
- Getting to downtown Mountain View
- I do not or rarely travel through here
- Other

### QUESTION 2

**Taking into account the criteria and trade-offs that are important to you, which option do you prefer for the Mary Avenue crossing of the Caltrain tracks?**

- Underpass of Mary and Evelyn intersection
- Underpass of Mary Avenue with "jug handle" connection to Evelyn Avenue
- I like both options equally.
- I don't like either option.

### QUESTION 3

**What are the top 3 reasons that you prefer the Mary Avenue crossing option that you selected?**

- This is the safest option.
- This will best reduce noise from crossing gate bells and train horns.
- This will best reduce noise from vehicle traffic.
- This has better circulation patterns for cars, buses, etc.
- This has better circulation patterns for bicyclists, scooters, etc.
- This has better circulation patterns for pedestrians.
- This option has less potential private property impacts.
- This option has less construction impacts.
- This option has a lower construction cost estimate.
- Other

### QUESTION 4

**What is your primary travel mode through this crossing?**

- Car
- Transit – buses or shuttles
- Transit – Caltrain
- Bicycle
- Walking
- Scootering
- I do not travel through this crossing
- Other

### QUESTION 5

**What other travel modes do you use through this crossing?**

- Car
- Transit – buses or shuttles
- Transit – Caltrain
- Bicycle
- Walking
- Scootering
- I do not travel through this crossing
- Other

### QUESTION 6

**If Mary Avenue was grade separated (the train tracks separated from the roadway), would you be more likely to use non-vehicle modes (bicycling, walking, scootering, etc.) to travel through the intersection?**

- Yes, because I would feel safer without the train tracks
- Yes, because the project is adding bicycle and pedestrian improvements
- Yes, both of the above
- No, I would use vehicles more often
- No, I would use vehicles the same amount

### QUESTION 7

**Any other comments regarding the Mary Avenue crossing option?**

### QUESTION 8

**What is the primary reason you use the Sunnyvale Avenue crossing location?**

## Caltrain crossing options at Mary and Sunnyvale avenues

How should we change the Caltrain crossings at Mary and Sunnyvale avenues?

- Commuting for work
- Commuting for school
- Getting to parks, trails, or other recreation spots
- Accessing businesses and amenities close to this location
- Getting to downtown Sunnyvale
- Getting to downtown Mountain View
- I do not or rarely travel through here
- Other

### QUESTION 9

**Taking into account the criteria and tradeoffs that are important to you, which option do you prefer for the Sunnyvale Avenue crossing of the Caltrain tracks?**

- Underpass Tunnel of Sunnyvale Avenue underneath Evelyn Ave, Caltrain tracks, and Hendy Ave
- Bicycle and Pedestrian only Underpass of Sunnyvale – No cars
- I like both options equally.
- I don't like either option.

### QUESTION 10

**What are the top 3 reasons that you prefer the Sunnyvale Avenue crossing option that you selected?**

- This is the safest option.
- This will best reduce noise from crossing gate bells and train horns.
- This will best reduce noise from vehicle traffic.
- This has better circulation patterns for cars, buses, etc.
- This has better circulation patterns for bicyclists, scooters, etc.
- This has better circulation patterns for pedestrians.
- This option has less potential private property impacts.
- This option has less construction impacts.
- This option has a lower construction cost estimate.
- Other

### QUESTION 11

**What is your primary travel mode through this crossing?**

- Car
- Transit – buses or shuttles
- Transit – Caltrain
- Bicycle
- Walking
- Scootering

- I do not travel through this crossing
- Other

### QUESTION 12

**What other travel modes do you use through this crossing?**

- Car
- Transit – buses or shuttles
- Transit – Caltrain
- Bicycle
- Walking
- Scootering
- I do not travel through this crossing
- Other

### QUESTION 13

**If Sunnyvale Avenue was grade separated (the train tracks separated from the roadway), would you be more likely to use non-vehicle modes (bicycling, walking, scootering, etc.) to travel through here?**

- Yes, because I would feel safer without the train tracks
- Yes, because the project is adding bicycle and pedestrian improvements
- Yes, both of the above
- No, I would use vehicles more often
- No, I would use vehicles the same amount

June 13, 2022, 11:33 PM

### Question 1

- Other - I'm retired, and no longer commute. Mary is my access route to eastbound Central; I may use it twice a week; occasionally I use it to get to Maude..

### Question 2

- Underpass of Mary Avenue with "jug handle" connection to Evelyn Avenue

### Question 3

- This has better circulation patterns for cars, buses, etc.
- This has better circulation patterns for bicyclists, scooters, etc.
- Other - Separating turning traffic from through traffic is a major win. It will matter greatly what the traffic control is at the ends of the jughandle. I hope for traffic lights synchronized to let traffic flow along Mary and along Evelyn.

### Question 4

- Car

### Question 5

- Other - Ten years ago, I was laid off from Blue Coat, but for the five years before that I walked or bicycled to work (on Mary between Carson and Maude), or to the post office when it was still on Mary. These days, I only go by car.

### Question 6

- No, I would use vehicles the same amount

### Question 7

The no on that last question is because illness prevents me from walking very far (even a block is difficult) or bicycling at all. I live about three blocks from the intersection of Carson and Mary. I have been delayed so much by the current on-grade crossing: I typically am northbound on Mary, and when the gates come down, I can count on at least five minutes delay, as (independent of where on the cycle the gates came down) when the gates go up, first traffic going straight on Evelyn continues briefly, and then left turns from Evelyn get to go, followed by more traffic going straight on Evelyn, and then left turns from Mary - finally, if another train does not come, I get my turn to go straight, northbound, on Mary. I am really looking forward to the completion of the grade separation! Perhaps with the railroad out of the picture, the lights at California and Mary can get synchronized - currently, when I finally get across Evelyn, I get stopped nine times out of ten because the light at California goes red. I'm looking forward to getting from Carson to Central (turning right at Central, I can pretty much ignore the light at Mary and Central) without stopping for a red light. I think I've done that once in all the years since the light at Callifornia was installed (before that light was installed, I could do it more frequently - I commuted that way from 1986-1989, taking Central, and from 1989-1997, staying on Mary to get to 101 southbound).

### Question 8

- I do not or rarely travel through here

### Question 9

- Underpass Tunnel of Sunnyvale Avenue underneath Evelyn Ave, Caltrain tracks, and Hendy Ave

### Question 10

- Other - When I do use this intersection, I am travelling by car along Sunnyvale, so it is good to preserve that option. From 1999 to 2006, I occasionally (frequently, towards the end) commuted by bicycle, and used this intersection because it was flat.

### Caltrain crossing options at Mary and Sunnyvale avenues

How should we change the Caltrain crossings at Mary and Sunnyvale avenues?

#### Question 11

- Other - I rarely use this intersection; these days only by car.

#### Question 12

- I do not travel through this crossing

#### Question 13

- No, I would use vehicles the same amount

#### Question 14

Again, these days illness prevents me from walking or bicycling. But I should mention that when I was commuting by bicycle, I crossed the tracks at Sunnyvale Avenue because climbing a hill on a bicycle was not easy for me - the flat crossing at Sunnyvale (then continuing on Hendy to get onto Kifer at Fair Oaks) was my chosen solution. I never had a safety issue with the tracks - I respect the trains, and gave them a wide berth. If I were healthy enough to bicycle, I would have a major problem with any of the grade separation solutions simply because they all involve riding uphill. There is never enough room to make the grade of the bicycle path low enough for me - unless there are hairpin bends (I fall over if I do not walk my bike through them - I did try a couple of times before I got sick to commute on the Stevens Creek bicycle trail, from Evelyn to the north side of 101), as there is rarely room for wider turns.

#### Question 1

- Other - Misc reasons

#### Question 2

### Caltrain crossing options at Mary and Sunnyvale avenues

How should we change the Caltrain crossings at Mary and Sunnyvale avenues?

- Underpass of Mary and Evelyn intersection

#### Question 3

- This is the safest option.
- This has better circulation patterns for bicyclists, scooters, etc.
- This has better circulation patterns for pedestrians.

#### Question 4

- Car

#### Question 5

- Bicycle

#### Question 6

- No, I would use vehicles the same amount

#### Question 7

Regardless of the alternative chosen, all intersections should be protected intersections. This will make it SOOOO much more comfortable for cyclists. The bike lanes should also be protected and preferably at the same level as the sidewalk.

#### Question 8

- Accessing businesses and amenities close to this location

#### Question 9

- Bicycle and Pedestrian only Underpass of Sunnyvale – No cars

#### Question 10

- This has better circulation patterns for bicyclists, scooters, etc.
- This option has less construction impacts.
- This option has a lower construction cost estimate.

#### Question 11

- Bicycle

#### Question 12

- Car

#### Question 13

- Yes, because I would feel safer without the train tracks

#### Question 14

The full underpass tunnel option is unwieldy and too expensive. It's also terrible for turning between Hendy, Sunnyvale Ave, and Evelyn.

---

June 14, 2022, 7:33 AM

#### Question 1

- Commuting for work

#### Question 2

- Underpass of Mary Avenue with "jug handle" connection to Evelyn Avenue

#### Question 3

- This is the safest option.
- This will best reduce noise from crossing gate bells and train horns.
- This has better circulation patterns for cars, buses, etc.

#### Question 4

- Car

#### Question 5

- Bicycle

#### Question 6

- No, I would use vehicles the same amount

#### Question 7

Traffic delays when trains pass can last close to 10 minutes with signal pattern as it is now. Grade separation will greatly improve traffic flow, reduce emissions from idling vehicles, make the track crossings much safer and eliminate train horn and signal noise. The project will make the whole area so much more peaceful.

#### Question 8

- Accessing businesses and amenities close to this location

#### Question 9

- Underpass Tunnel of Sunnyvale Avenue underneath Evelyn Ave, Caltrain tracks, and Hendy Ave

#### Question 10

- This will best reduce noise from crossing gate bells and train horns.
- This has better circulation patterns for cars, buses, etc.

#### Question 11

- Car

#### Question 12

- Bicycle

#### Question 13

- Yes, because I would feel safer without the train tracks

#### Question 14

Too much congestion with track crossing as is especially at commute times. Way too much noise with track gates and train horn. Absolutely needs fixing. Grade separation will be safer for all. Living conditions (night and day) for everyone in the Sunnyvale crossing area will be so much better.

#### Question 1

## Caltrain crossing options at Mary and Sunnyvale avenues

How should we change the Caltrain crossings at Mary and Sunnyvale avenues?

- Other - I live in the area

### Question 2

- Underpass of Mary Avenue with "jug handle" connection to Evelyn Avenue

### Question 3

- This has better circulation patterns for cars, buses, etc.
- This has better circulation patterns for bicyclists, scooters, etc.
- This option has less potential private property impacts.

### Question 4

- Car

### Question 5

- Bicycle
- Walking

### Question 6

- No, I would use vehicles the same amount

### Question 7

We're residents on Carson Drive and are worried about the increase of traffic down Carson as a short cut to Washington Drive and as a bypass to the left turn lane now on Bidwell. I like that there's going to be no left turn from Mary to Bidwell and wondering if it would make sense to block lefts from Mary to Carson.

While biased, I have personally stopped trying to turn left on Carson from Mary or turn left onto Mary from Carson when driving because of the speed and increase of traffic on Mary. To get home on Carson, I now drive down to Washington and turn left.

### Question 8

- I do not or rarely travel through here

### Question 9

- Bicycle and Pedestrian only Underpass of Sunnyvale – No cars

### Question 10

- This has better circulation patterns for bicyclists, scooters, etc.
- This option has less potential private property impacts.

- This option has less construction impacts.

### Question 11

- Walking

### Question 12

- Bicycle

### Question 13

- Yes, because the project is adding bicycle and pedestrian improvements

### Question 14

No response

---

## Name not available

June 14, 2022, 10:17 AM

### Question 1

- Accessing businesses and amenities close to this location

### Question 2

- Underpass of Mary Avenue with "jug handle" connection to Evelyn Avenue

### Question 3

- This option has less construction impacts.
- This option has a lower construction cost estimate.

### Question 4

- Car

### Question 5

- Transit – Caltrain
- Bicycle
- Walking

### Question 6

- No, I would use vehicles the same amount

## Caltrain crossing options at Mary and Sunnyvale avenues

How should we change the Caltrain crossings at Mary and Sunnyvale avenues?

### Question 7

Neither option is very good and considering we are going to be saddled with a \$300M+ price tag. Is this cost estimate even in the ball park with the supply chain problems and the recent inflation? Hoping that Sunnyvale doesn't get stuck with the bill for cost over-runs.

We need to get rid of CalTrain and replace it with a more efficient public transit solution that serves more of the general public in a more cost effective fashion. Electric busses come to mind.

##### Question 1

- Commuting for work

##### Question 2

- Underpass of Mary and Evelyn intersection

##### Question 3

- This is the safest option.
- This has better circulation patterns for bicyclists, scooters, etc.

##### Question 4

- Bicycle

##### Question 5

- Car
- Walking

##### Question 6

- Yes, because the project is adding bicycle and pedestrian improvements

##### Question 7

My only issue with the "jughandle" option is that it makes the right turn from Mary (southbound) onto Evelyn (westbound) into two left turns in quick succession. When cycling through the result I would be much more likely to continue south to Washington instead. This may be a concern if the cycle path down the caltrain tracks ever happens: if there is no way to get to it without multiple left turns I am much less likely to use it when bike commuting.

### Caltrain crossing options at Mary and Sunnyvale avenues

How should we change the Caltrain crossings at Mary and Sunnyvale avenues?

#### Question 8

- This has better circulation patterns for pedestrians.

#### Question 11

- Car

#### Question 12

- Walking

#### Question 13

- No, I would use vehicles the same amount

#### Question 14

Transit bus routes use SV Ave, cars use SV Ave to get to downtown shopping etc. I see the bike-pedestrian option as a lose-lose for downtown. Why would you block a major route downtown to cars and transit buses? Better to use the less expensive option at Mary Ave and the more expensive option near downtown. Downtown restaurants and shops are just recovering. Blocking cars and transit buses from crossing the RR tracks on SV Ave makes no long-term economic sense. Currently, bike and pedestrian access on SV Ave is fine across the tracks. It would be better to do nothing on SV Ave than to go forward with the no car and bus transit option.

## Caltrain crossing options at Mary and Sunnyvale avenues

How should we change the Caltrain crossings at Mary and Sunnyvale avenues?

### Question 1

- I do not or rarely travel through here

### Question 2

- Underpass of Mary Avenue with "jug handle" connection to Evelyn Avenue

### Question 3

- This has better circulation patterns for bicyclists, scooters, etc.
- This option has less potential private property impacts.
- This option has less construction impacts.

### Question 4

- Transit – Caltrain

### Question 5

- Car
- Bicycle

### Question 6

- No, I would use vehicles the same amount

### Question 7

I have a mild preference for the jug handle because it widens the road less and has less construction impact and time. Personally, besides using Caltrain, I only bike through on Evelyn Ave. or drive through on Mary Ave. I imagine that most routes going through the intersection don't involve turning from one street to another due to nearby route options, so the jug handle option may have better circulation performance since it seems better for straight crossings.

Ultimately, I want the city to pick the solution that is more sustainable long term.

### Question 8

- Getting to downtown Sunnyvale

### Question 9

- Bicycle and Pedestrian only Underpass of Sunnyvale – No cars

### Question 10

- This has better circulation patterns for bicyclists, scooters, etc.

- This has better circulation patterns for pedestrians.
- Other - This preserves a more pedestrian/bike-friendly, car-free downtown character.

### Question 11

- Bicycle

### Question 12

- Car
- Transit – Caltrain

### Question 13

- No, I would use vehicles the same amount

### Question 14

I think that the first option that preserves the car crossing is a bad idea because it ruins walkability of the Sunnyvale Ave. and Evelyn Ave. intersection (in order to prioritize vehicle traffic no less). The intersection is really close to where the Sunnyvale farmer's market is. The eastern section of downtown Sunnyvale is already low-traffic, has small streets, and is generally walkable/bikeable. It would be nice to keep it that way, since it's bordered by the extremely large Mathilda Ave. on the other side. Developing walkable urban areas and cities is good! Closing the intersection to cars does make it harder for cars to reach the south (main) entrance of the Caltrain station (which is important) from the north though, especially since Mathilda and Evelyn is such an awkward intersection.

It also seems like Sunnyvale Ave. is being framed as an important biking route (especially from Borregas Ave.), and eliminating the car crossing makes biking on Sunnyvale Ave. north of the intersection better because it reduces car traffic. On the stretch of Sunnyvale Ave. between California Ave. and Evelyn Ave., cars may conflict with bikes due to the narrow width of the road, especially when there are cars parked on either side (which there often are). One time I biked that stretch and the car behind me honked at me and aggressively passed me because they had to wait behind me when there was traffic in the other direction.

Ultimately, I think this intersection would be better if it prioritized pedestrians, bikes, and a world with less cars (public transportation is okay :)).

- This has better circulation patterns for bicyclists, scooters, etc.

## Caltrain crossing options at Mary and Sunnyvale avenues

How should we change the Caltrain crossings at Mary and Sunnyvale avenues?

- Other - Another option you didn't show is having a jughandle option but with the Evelyn trail be at grade and ramps down to connect with Mary. This would be the ideal and safest option for bikes and pedestrians. It is cheaper than Option #1.

### Question 4

- Bicycle

### Question 5

- Car

### Question 6

- Yes, because I would feel safer without the train tracks

### Question 7

I don't understand the above question. I thought you are definitely grade-separating Mary Ave., so why do you precede this question with "IF Mary Avenue was grade separated ..."? Also on this last question, safety for bikes and pedestrians doesn't depend on just the grade separation. It depends on how the bike + ped infrastructure for the undercrossing is implemented. If bikes are forced to use the jughandle to connect between Mary and Evelyn, then bike safety is actually compromised compared to a simple intersection. So, I can't answer this question without knowing how you will implement the bike infrastructure.

### Question 8

- Getting to parks, trails, or other recreation spots

### Question 9

- Bicycle and Pedestrian only Underpass of Sunnyvale – No cars

### Question 10

- This is the safest option.
- This will best reduce noise from vehicle traffic.
- This has better circulation patterns for bicyclists, scooters, etc.

### Question 11

- Bicycle

### Question 12

No response

### Question 13

No response

### Question 14

For bikers on Sunnyvale Ave. crossing underneath Caltrain, it would be lower stress if cars aren't allowed at the crossing (option #2). For that option, consider putting a straight down ramp parallel to Sunnyvale Ave for both southbound and northbound bike traffic so that bikers don't have to slow down. Currently, the ramp that is designed on the north side forces bikers to slow down, almost stop, to make a perpendicular turn onto the ramp.

#### Name not available

June 17, 2022, 11:10 AM

#### Question 1

- Accessing businesses and amenities close to this location

#### Question 2

- I don't like either option.

#### Question 3

- Other - I feel this would lower property values.

#### Question 4

- Car

#### Question 5

- Car

#### Question 6

- No, I would use vehicles the same amount

#### Question 7

No response

#### Question 8

- Accessing businesses and amenities close to this location

#### Question 9

- I don't like either option.

#### Question 10

- Other - This is a small city street not a major thorough fare. It would devalue the area and would look ugly and be an eyesore.

#### Question 11

- Car

#### Question 12

- Car
- Transit – buses or shuttles

#### Question 13

- No, I would use vehicles the same amount

#### Question 14

This is not an area to put something like that in. It would look so ugly next to the beautiful downtown area. Nice idea but the end result / impact to the area would be horrible.

### Caltrain crossing options at Mary and Sunnyvale avenues

How should we change the Caltrain crossings at Mary and Sunnyvale avenues?

- This has better circulation patterns for bicyclists, scooters, etc.
- This has better circulation patterns for pedestrians.

#### Question 11

- Walking

#### Question 12

- Transit – buses or shuttles
- Transit – Caltrain
- Bicycle

#### Question 13

- Yes, because the project is adding bicycle and pedestrian improvements

#### Question 14

The car underpass option will alienate people who live on Evelyn or nearby because it will be very hard to cross Sunnyvale on foot. For this reason I'm strongly in favor of the bike/pedestrian underpass option only.

In fact, I would strongly prefer to keep the current status over the car underpass option. Even for me as someone who lives very near the intersection and has to "suffer through" the train noise and crossings, the current situation is way better than being unable to cross Sunnyvale Ave mid-block.

#### Question 12

- Car

#### Question 13

### Caltrain crossing options at Mary and Sunnyvale avenues

How should we change the Caltrain crossings at Mary and Sunnyvale avenues?

- No, I would use vehicles the same amount

#### Question 14

Please please please do not ruin our access from Sunnyvale ave to the downtown area via CAR. It is unrealistic to think people can walk or use a bike - that is not suitable for senior citizens or others with disabilities. We rely on being able to pass for basic every day needs. A full tunnel for cars should be built that does NOT restrict any car traffic. It will cause a decline in property values in the area also if cars can no longer pass.

#### Question 10

- This is the safest option.
- This has better circulation patterns for bicyclists, scooters, etc.
- This option has less potential private property impacts.

#### Question 11

- Walking

#### Question 12

- Car
- Bicycle

#### Question 13

- Yes, both of the above

#### Question 14

I live nearby and will be impacted by construction. I would prefer that this crossing be closed to vehicles but still accessible to bike and pedestrians. Sunnyvale Ave is an important bike path for students at the middle school and high school level. Currently, some cars go through here at speeds that are not incredibly safe for youth. Making the streets bigger and more of a thoroughfare would only increase these hazards. Instead, I would prefer that the crossing was closed to vehicles, thereby decreasing vehicle traffic through this area, and that bike and pedestrian pathways be made safer.

#### Question 1

- Getting to parks, trails, or other recreation spots

#### Question 2

- Underpass of Mary and Evelyn intersection

#### Question 3

- This will best reduce noise from vehicle traffic.
- This has better circulation patterns for pedestrians.
- Other - Underpass of intersection has less of a roadway footprint.

#### Question 4

- Walking

#### Question 5

- Car
- Transit – Caltrain
- Bicycle
- Other - Running

## Caltrain crossing options at Mary and Sunnyvale avenues

How should we change the Caltrain crossings at Mary and Sunnyvale avenues?

### Question 6

- Yes, both of the above

### Question 7

Will there be a way for Expressions residents to reach the Mary Avenue underpass directly without having to walk to California Avenue first?

### Question 8

- Accessing businesses and amenities close to this location

### Question 9

- Bicycle and Pedestrian only Underpass of Sunnyvale – No cars

### Question 10

- This is the safest option.
- This has better circulation patterns for bicyclists, scooters, etc.
- This has better circulation patterns for pedestrians.

### Question 11

- Car

### Question 12

No response

### Question 13

- Yes, both of the above

### Question 14

The Bicycle and Pedestrian Underpass has the potential to transform Sunnyvale Avenue into a North-South bike boulevard. It will also make me much more likely to bike to downtown Sunnyvale and to the Old San Francisco Road and Sunnyvale Avenue area.

- Yes, because the project is adding bicycle and pedestrian improvements

## Caltrain crossing options at Mary and Sunnyvale avenues

How should we change the Caltrain crossings at Mary and Sunnyvale avenues?

### Question 14

This construction project has the opportunity to make Sunnyvale Rd a safer and more effective bike thoroughfare. By reducing car through-traffic and improving bike and pedestrian flow it will help the children riding to school (Bishop and SMS) and adults riding to Caltrain and to the offices East of Moffett Field.

### Question 6

- No, I would use vehicles the same amount

### Question 7

The "Jug Handle" scenario really looks like it will create backup turning nightmares for people wanting to get access to or escape North Mary; plus, it wipes out some commercial properties.

This is REALLY something that lends itself to animated software simulations. It's easy to do. Really: I've done these for decades. You have years of minute-by-minute traffic density data that could be pumped into simulations with varying traffic signal durations.

Until I see this visual data-supported proof of non-nightmarish traffic flow, I can't support this "Jug Handle" scenario.

### Question 8

No response

### Question 8

- Accessing businesses and amenities close to this location

### Question 9

- Bicycle and Pedestrian only Underpass of Sunnyvale – No cars

### Question 10

- This has better circulation patterns for bicyclists, scooters, etc.
- This has better circulation patterns for pedestrians.
- This option has a lower construction cost estimate.

### Question 11

- Walking

### Question 12

- Car
- Bicycle

### Question 13

- No, I would use vehicles the same amount

### Question 14

No response

### Name not available

June 30, 2022, 7:12 PM

### Question 1

- Accessing businesses and amenities close to this location

### Question 2

- Underpass of Mary Avenue with “jug handle” connection to Evelyn Avenue

### Question 3

- This is the safest option.
- This will best reduce noise from crossing gate bells and train horns.
- This has better circulation patterns for cars, buses, etc.

### Question 4

- Car

### Question 5

- Bicycle
- Walking

### Question 6

- Yes, both of the above

### Question 7

The extra expense to lower Evelyn without the jughandle does not seem like a good use of taxpayer money to achieve the same objective.

### Question 8

- Accessing businesses and amenities close to this location

### Question 9

- Underpass Tunnel of Sunnyvale Avenue underneath Evelyn Ave, Caltrain tracks, and Hendy Ave

### Question 10

- This is the safest option.
- This will best reduce noise from crossing gate bells and train horns.
- Other - Stopping vehicle access to this crossing will unfairly impact the elderly and the disabled.

### Caltrain crossing options at Mary and Sunnyvale avenues

How should we change the Caltrain crossings at Mary and Sunnyvale avenues?

#### Question 11

- Car

#### Question 12

- Bicycle
- Walking

#### Question 13

- Yes, both of the above

#### Question 14

Please do not cut off access to cars here. The elderly and the disabled who are unable to walk or bike will be unfairly impacted and unable to easily access downtown Sunnyvale. Plus, removing vehicle access from this crossing will divert vehicle traffic to Mary and Fair Oaks, both of which are oversaturated and will cause significant neighborhood backups.

## Caltrain crossing options at Mary and Sunnyvale avenues

How should we change the Caltrain crossings at Mary and Sunnyvale avenues?

### Question 4

- Car

### Question 5

- Car

### Question 6

- No, I would use vehicles the same amount

### Question 7

No response

### Question 8

- Getting to downtown Sunnyvale

### Question 9

- Underpass Tunnel of Sunnyvale Avenue underneath Evelyn Ave, Caltrain tracks, and Hendy Ave

### Question 10

- This has better circulation patterns for cars, buses, etc.
- Other - Eliminates Sunnyvale Ave traffic waiting at RR crossing; avoids carbon emissions from waiting cars or cars rerouted to Mathilda or Fair Oaks.

### Question 11

- Car

### Question 12

No response

### Question 13

- No, I would use vehicles the same amount

### Question 14

The pedestrian/bicycle-only option would hurt more people than it would help due to longer car travel times for Sunnyvale Ave. traffic, increased traffic on Mathilda and Fair Oaks, and the associated increased carbon emissions (at least until all of our powered vehicles are electric). We should not pay \$100M (or more) for something that does more net harm than good. The vehicular tunnel would be a worthwhile improvement for the city, but if we can't get that then doing nothing at all would be the

preferable option by far.

There are overpasses one block north and south for cars on Mathilda and Fair Oaks. This vehicle crossing is not necessary. Local traffic can continue to use foot or bike access and non-local traffic can route around in cars easily.

---

#### Name not available

July 1, 2022, 4:16 PM

#### Question 1

## Caltrain crossing options at Mary and Sunnyvale avenues

How should we change the Caltrain crossings at Mary and Sunnyvale avenues?

- Other - travelling to many sites, incl. businesses, community services, parks, and church south of the tracks

### Question 2

- Underpass of Mary Avenue with “jug handle” connection to Evelyn Avenue

### Question 3

- This has better circulation patterns for cars, buses, etc.
- This option has less construction impacts.
- This option has a lower construction cost estimate.

### Question 4

- Car

### Question 5

- Walking

### Question 6

No response

### Question 7

Almost all traffic is motor vehicles; despite the projections the primary traffic delay is, and will continue to be, the signal delay for vehicles on Mary and Evelyn crossing the other road. Both options presented eliminate the delay for Caltrains, but the option without the Jughandle does not eliminate the primary delay.

I am appalled that the option to build a bridge for Mary to cross over both the tracks and Evelyn appears to have already been eliminated, despite it manifestly having less impact, and I suspect being faster and cheaper to implement.

In any case, the Mary reconstruction should be scheduled to not overlap construction at nearby crossings of the tracks at Mathilda or the 237.

And prior to beginning construction, the delay to cross the tracks and Evelyn should be minimized by a simple (and extremely low cost) change of the signal phasing to make the Mary through phase occur immediately after the crossing gates are raised (currently, the Evelyn through phases occur immediately after a train passage, and sometimes the signal never reaches the Mary through phase before the next train passage - I have seen delays upwards of 5 minutes due to this).

### Question 8

- Other - travelling to a wide variety of places south of the tracks, incl. businesses, community services, parks, and church

### Question 9

- Underpass Tunnel of Sunnyvale Avenue underneath Evelyn Ave, Caltrain tracks, and Hendy Ave

### Question 10

- This has better circulation patterns for cars, buses, etc.
- This has better circulation patterns for bicyclists, scooters, etc.
- This has better circulation patterns for pedestrians.

### Question 11

- Car

### Question 12

- Bicycle
- Walking

### Question 13

- No, I would use vehicles the same amount

### Question 14

I have found the tracks to be an insignificant delay when on foot or bicycling, but I have found pedestrian/cycle underpasses at other locations to be far more unpleasant than a level crossing of tracks - bicycles passing in the confined space are a greater hazard than the trains, the tunnel confines people where they can be preyed upon by muggers and panhandlers, and they are noisy and collect unpleasant smells and debris.

I also wonder if the plan has considered the effects of flooding due to storm drain blockage and/or unusually heavy rains.

As to the effect on vehicle traffic, the narrowing of Sunnyvale Ave. to one lane and the grossly conservative timing of the signals has almost eliminated its value, even while the adjacent Fair Oaks crossing has been crippled by reconstruction there. Unless the recent degradation of vehicle traffic flow on Sunnyvale Ave. is reversed, the money for either of the proposed options would have been better spent adding another vehicle lane to Fair Oaks or Mathilda.

I also see no evidence that a bridge over the tracks was considered, despite it having manifestly lower impact, and I suspect lower cost and time to implement, and not creating or revealing a host of new and/or unforeseen problems by attempting to dig a big ditch in the densest part of the downtown area.

Vehicle traffic flow could instead be significantly improved by a simple (and very cheap) change in the phasing of the signal at Sunnyvale and Evelyn so that the north-south Sunnyvale Ave. through phases occur immediately after the crossing gates are raised (instead of the current configuration which makes the Evelyn through phases occur after the

## Caltrain crossing options at Mary and Sunnyvale avenues

How should we change the Caltrain crossings at Mary and Sunnyvale avenues?

crossing gates are raised, delaying the north-south through phases, sometimes until another train passes, resetting the signal to the Evelyn through phases again - potentially repeatedly). For a higher but still comparatively small cost, the Sunnyvale Caltrain station boarding platform could be moved a bit further west, so that it is not so close that it keeps the crossing gates down while trains board.

#### Question 6

### Caltrain crossing options at Mary and Sunnyvale avenues

How should we change the Caltrain crossings at Mary and Sunnyvale avenues?

- No, I would use vehicles the same amount

#### Question 7

I often travel on Evelyn going to and from Mountain View. The "jug handle" option seems to make this very confusing and slow.

#### Question 8

- Accessing businesses and amenities close to this location

#### Question 9

- Underpass Tunnel of Sunnyvale Avenue underneath Evelyn Ave, Caltrain tracks, and Hendy Ave

#### Question 10

- This is the safest option.
- This will best reduce noise from crossing gate bells and train horns.
- This has better circulation patterns for cars, buses, etc.

#### Question 11

- Car

#### Question 12

No response

#### Question 13

- No, I would use vehicles the same amount

#### Question 14

I strongly oppose the option that eliminates car traffic on Sunnyvale Ave to cross the tracks! It would be EXTREMELY inconvenient to go to Mathilda or Fair Oaks to cross. Both of those roads are already heavily traveled; no need to add more traffic. I am also disappointed to see that there would not be access to Hendy from Sunnyvale Ave. That is a convenient way to gain access to Home Depot and Kifer Rd.

July 2, 2022, 11:45 AM

### Question 1

- Getting to parks, trails, or other recreation spots

### Question 2

- Underpass of Mary and Evelyn intersection

### Question 3

- This has better circulation patterns for bicyclists, scooters, etc.
- This has better circulation patterns for pedestrians.

### Question 4

- Bicycle

### Question 5

- Car
- Bicycle
- Walking

### Question 6

- No, I would use vehicles the same amount

### Question 7

I am currently comfortable traveling through the intersection using non-vehicle modes. I would feel less safe traveling through the intersection by

bike in the jughandle option given the added intersections and left hand turns required when turning from Evelyn to Mary or Mary to Evelyn.

If walking from 991 Asilomar Terrace and Expressions of Sunnyvale in general, would we have to walk all the way to California first to be able to access Mary to cross under the railroad tracks? Is there an option to add a pedestrian stairs/ramp to avoid having to walk all the way to California and back in this case?

### Question 8

- Getting to downtown Sunnyvale

### Question 9

- Bicycle and Pedestrian only Underpass of Sunnyvale – No cars

### Question 10

- This has better circulation patterns for bicyclists, scooters, etc.
- This has better circulation patterns for pedestrians.
- This option has a lower construction cost estimate.

### Question 11

- Bicycle

### Question 12

- Car
- Bicycle
- Walking

### Question 13

- No, I would use vehicles the same amount

### Question 14

I currently feel comfortable using non-vehicle modes to travel through. Separating grade would not change that for me.

I assume the bicycle and pedestrian underpass only option would reduce vehicle traffic on Sunnyvale, which would make it nicer to use Sunnyvale for bicycling as a connector from bike paths on Evelyn to Borregas.

If we choose the cheaper option for the Sunnyvale Avenue crossing, will that make it easier to fund the more expensive option for the Mary crossing?

## Caltrain crossing options at Mary and Sunnyvale avenues

How should we change the Caltrain crossings at Mary and Sunnyvale avenues?

### Brent Miller

inside Sunnyvale

July 2, 2022, 11:51 AM

#### Question 1

- Commuting for work

#### Question 2

- Underpass of Mary Avenue with "jug handle" connection to Evelyn Avenue

#### Question 3

- This has better circulation patterns for cars, buses, etc.
- This has better circulation patterns for bicyclists, scooters, etc.
- This option has a lower construction cost estimate.

#### Question 4

- Bicycle

#### Question 5

- Car

#### Question 6

- No, I would use vehicles the same amount

#### Question 7

The fact that bicycling is listed as a non-vehicle mode of transportation is disconcerting. Perhaps this project's staffing needs to be adjusted?

#### Question 8

- Accessing businesses and amenities close to this location

#### Question 9

- Underpass Tunnel of Sunnyvale Avenue underneath Evelyn Ave, Caltrain tracks, and Hendy Ave

#### Question 10

- This has better circulation patterns for cars, buses, etc.
- This has better circulation patterns for bicyclists, scooters, etc.

#### Question 11

- Bicycle

#### Question 12

- Car
- Walking

#### Question 13

- No, I would use vehicles the same amount

#### Question 14

As a bicycle commuter/traveler (as opposed to recreational use), I consider an "ornamental path" as shown in the "bicycle and pedestrian" plan to be a non-starter. Sunnyvale Avenue is a cycling corridor with overpasses for 247 and 101. I would like you to understand that inserting narrow turns will be destructive to throughput for cyclists and/or create collision hazards with pedestrians.

The fact that bicycling is listed as a non-vehicle mode of transportation is disconcerting. Perhaps this project's staffing needs to be adjusted?

## Caltrain crossing options at Mary and Sunnyvale avenues

How should we change the Caltrain crossings at Mary and Sunnyvale avenues?

### Name not shown

inside Sunnyvale

July 4, 2022, 2:16 PM

#### Question 1

- Commuting for work

#### Question 2

- Underpass of Mary and Evelyn intersection

#### Question 3

- This is the safest option.
- This will best reduce noise from crossing gate bells and train horns.
- This has better circulation patterns for cars, buses, etc.

#### Question 4

- Car

#### Question 5

- Walking

#### Question 6

- No, I would use vehicles the same amount

#### Question 7

Adding additional unnecessary streetlights is bad for Evelyn Avenue and traffic congestion. The underpass is more straightforward and simple. Mary Avenue is currently 2-3 lanes in each direction, so I don't see it as a major bicycle route due to the quantity and speed of cars. Facilitating better car flow through this intersection is more important currently. I would like to see better bicycling/pedestrian options on Mary, but don't think that the "jug handle" approach would address those issues effectively.

#### Question 8

- Accessing businesses and amenities close to this location

#### Question 9

- Bicycle and Pedestrian only Underpass of Sunnyvale – No cars

#### Question 10

- This is the safest option.
- This has better circulation patterns for bicyclists, scooters, etc.
- This has better circulation patterns for pedestrians.

#### Question 11

- Car

#### Question 12

- Walking

#### Question 13

- Yes, because the project is adding bicycle and pedestrian improvements

#### Question 14

This is a wonderful idea. Sunnyvale Avenue has only a single lane in each direction, so closing the street to cars and making it more safe for pedestrians and bicyclists would be a welcome improvement. The other options for crossing the train tracks are better for cars (Matilda, Fair Oaks) due to having more lanes. I would love to see Sunnyvale Avenue become the main pedestrian and cycling infrastructure for traveling safely North/South through Sunnyvale. Currently the only North/South travel methods that are closed to cars are the Stevens Creek Trail and the Calabazas Creek Trail, neither of which go through the entire city North/South. I would love to see Sunnyvale Avenue become more exclusively bike/pedestrian -- with no cars -- over time.

#### Question 1

- Commuting for work

#### Question 2

- Underpass of Mary Avenue with "jug handle" connection to Evelyn Avenue

#### Question 3

- This option has less potential private property impacts.
- This option has less construction impacts.
- This option has a lower construction cost estimate.

#### Question 4

- Car

#### Question 5

- Walking

#### Question 6

- No, I would use vehicles the same amount

#### Question 7

No response

#### Question 8

- Getting to downtown Sunnyvale

#### Question 9

- Bicycle and Pedestrian only Underpass of Sunnyvale – No cars

#### Question 10

- This has better circulation patterns for pedestrians.
- This option has less construction impacts.
- This option has a lower construction cost estimate.

#### Question 11

- Walking

#### Question 12

- Car

#### Question 13

- No, I would use vehicles the same amount

#### Question 14

There will be many people who don't like the "no more cars" options, but Sunnyvale Avenue as currently constituted is just not set up for the massive amount of traffic that pours through it. As a pedestrian I have come within inches of being hit by a car before. Sunnyvale Av is not safe, making it more difficult for cars to get through will help with that.

## Caltrain crossing options at Mary and Sunnyvale avenues

How should we change the Caltrain crossings at Mary and Sunnyvale avenues?

### Question 13

- No, I would use vehicles more often

### Question 14

Any proposal should try to establish a walking option to cross under the tracks, since that and vehicle access are currently allowed

---

### Name not shown

inside Sunnyvale

July 5, 2022, 7:28 PM

### Question 1

- Accessing businesses and amenities close to this location

### Question 2

- Underpass of Mary Avenue with "jug handle" connection to Evelyn Avenue

### Question 3

- This option has less potential private property impacts.
- This option has a lower construction cost estimate.
- Other - Likely better traffic flow for cars and bicycles going straight on both Evelyn and Mary

### Question 4

- Transit – Caltrain

### Question 5

- Car

### Question 6

- No, I would use vehicles the same amount

### Question 7

I like the idea of keeping Evelyn at the current grade (same as the railroad tracks) and to have Mary crossing underneath both Caltrain tracks and Evelyn.

I don't know whether there is sufficient turn traffic between Evelyn and Mary to really need that jug-handle (possible cost saving).

While I do prefer this option, the other option (lowering Evelyn to intersect with the Mary underpass) would also be acceptable to me.

### Question 8

- Getting to downtown Sunnyvale

### Question 9

- Underpass Tunnel of Sunnyvale Avenue underneath Evelyn Ave, Caltrain tracks, and Hendy Ave

### Question 10

- This has better circulation patterns for cars, buses, etc.
- Other - This is the only option that preserves access to downtown Sunnyvale by car

### Question 11

- Car

### Question 12

- Transit – Caltrain

### Question 13

- No, I would use vehicles the same amount

### Question 14

I strongly prefer the option that preserves car access to Downtown Sunnyvale. Mathilda and Fair Oaks are already congested at certain times of the day and closing Sunnyvale Avenue for car traffic would make that situation worse.

---

### Name not available

July 5, 2022, 7:36 PM

### Question 1

- Other - I live at the intersection of Mary Ave with the railroad tracks.

### Question 2

- Underpass of Mary and Evelyn intersection

### Question 3

- This has better circulation patterns for bicyclists, scooters, etc.
- Other - If Mary Ave goes under Evelyn Ave as well as under the tracks, I'm concerned it will be like the University Ave tunnel in Palo Alto: dark and dismal, trash, graffiti, homeless people, etc

### Caltrain crossing options at Mary and Sunnyvale avenues

How should we change the Caltrain crossings at Mary and Sunnyvale avenues?

#### Question 4

- Transit – Caltrain

#### Question 5

- Car
- Bicycle
- Walking

#### Question 6

- No, I would use vehicles the same amount

#### Question 7

No response

#### Question 8

- I do not or rarely travel through here

#### Question 9

- Bicycle and Pedestrian only Underpass of Sunnyvale – No cars

#### Question 10

- This option has a lower construction cost estimate.
- Other - Moving vehicle traffic from Sunnyvale Ave to Mathilda seems reasonable, but I really have no idea what the impacts might be.

#### Question 11

- Car

#### Question 12

- Bicycle
- Walking

#### Question 13

- No, I would use vehicles the same amount

### Caltrain crossing options at Mary and Sunnyvale avenues

How should we change the Caltrain crossings at Mary and Sunnyvale avenues?

#### Question 12

- Car

#### Question 13

- No, I would use vehicles the same amount

#### Question 14

The no-vehicle choice does involve some inconvenience for the folks who currently live on Sunnyvale Ave near the crossing -- but it's a LOT less expensive, and if they are driving it's not that big a deal to go to Mary or Fair Oaks (when the Fair Oaks overcrossing is done). And maybe this will encourage people to walk or bike to downtown when they might have driven previously.

- This has better circulation patterns for cars, buses, etc.
- This option has less construction impacts.
- This option has a lower construction cost estimate.

#### Question 4

- Car

#### Question 5

- Other - No other travel modes, but primary travel by car; this is not on the list of options.

#### Question 6

- No, I would use vehicles the same amount

#### Question 7

The current intersection at Mary Ave is subject to substantial delays. Routing traffic away from railroad tracks is imperative, both for safety and traffic flow.

#### Question 8

- Accessing businesses and amenities close to this location

#### Question 9

- Underpass Tunnel of Sunnyvale Avenue underneath Evelyn Ave, Caltrain tracks, and Hendy Ave

#### Question 10

- This has better circulation patterns for cars, buses, etc.

### Caltrain crossing options at Mary and Sunnyvale avenues

How should we change the Caltrain crossings at Mary and Sunnyvale avenues?

- Other - Presumably, the "no cars" option assumes that more traffic will need to clog N Mathilda and N Fair Oaks. Neither option is good, but vehicle access along Sunnyvale Ave seems imperative.

#### Question 11

- Car

#### Question 12

- Walking

#### Question 13

- No, I would use vehicles the same amount

#### Question 14

I walk into town from the SNAIL neighborhood as often as possible vs driving. I'm not qualified to develop a traffic flow analysis that would account for the impact of the tremendous increase in residential housing that is in construction. That housing will eventually add hundreds of vehicles to the surrounding roads, even if some take public transit or cycle to their destination. Cutting off vehicular transportation between Evelyn and Hendy would result in serious traffic problems on adjacent roads (Washington, McKinley, Olive, etc.). It is certainly unfortunate that allowing motorized vehicles (buses, cars, etc.) through a tunnel will cost so much more and require reconstruction of so many driveways. If I could see the traffic flow model and find that a healthy road capacity is maintainable, I would much prefer to walk through a tunnel without motorized vehicles traveling adjacent to the pedestrian walkway.

### Question 1

- Other - Mostly to get to Kaiser; average once every two weeks; also any time I want to get to Central Expwy eastbound - maybe once a month; Occasionally to get to somewhere else (a dentist at Maude & Mathilda); maybe once every two months).

### Question 2

- Underpass of Mary Avenue with "jug handle" connection to Evelyn Avenue

### Question 3

- This has better circulation patterns for cars, buses, etc.

### Question 4

- Car

### Question 5

- Other - I used to commute to Blue Coat on foot or by bicycle, but not since they laid me off in 2012.

### Question 6

- No, I would use vehicles the same amount

### Question 7

I've been unable to ride a bicycle since I had bad side effects from chemotherapy in 2018, but even when I did, I primarily used the Sunnyvale Avenue grade crossing when commuting to Edify by bicycle (1999-2006) because I found it hard to climb the Fair Oaks over-crossing. Even if I were able to ride a bicycle, I would probably have a hard time using the Mary Avenue under-crossing. But with the jughandle, taking a bicycle from Mary to Evelyn would not require me to climb a hill in any direction. The other option would not work for me (I'd take Washington instead of Evelyn in that case).

### Question 8

- Other - I used to use the Sunnyvale Avenue grade crossing when commuting by bicycle to Edify (1999-2006) because it did not require me to climb a hill (as at the Fair Oaks overpass). Now, I might drive that way once a year.

### Question 9

- Bicycle and Pedestrian only Underpass of Sunnyvale – No cars

### Question 10

- This option has a lower construction cost estimate.

### Question 11

- Car

### Question 12

No response

### Question 13

- No, I would use vehicles the same amount

### Question 14

I don't care as much about the Sunnyvale Avenue crossing, as I no longer use it very often.

**Caltrain crossing options at Mary and Sunnyvale avenues**

How should we change the Caltrain crossings at Mary and Sunnyvale avenues?

- Commuting for work

**Question 9**

- Underpass Tunnel of Sunnyvale Avenue underneath Evelyn Ave, Caltrain tracks, and Hendy Ave

**Question 10**

- This has better circulation patterns for cars, buses, etc.
- Other - I'd feel safer sharing tunnel with cars, and wouldn't have to do a weird merge back into Sunnyvale Ave traffic.

**Question 11**

- Car

**Question 12**

- Walking

**Question 13**

- No, I would use vehicles the same amount

**Question 14**

I turn onto Hendy from Sunnyvale to get home (it's a nasty left turn) so both options mean I have to detour. The business on the first block of Hendy past Sunnyvale will suffer.

I lot of people doing Caltrain pickup wait on Hendy then access Sunnyvale Ave

I don't think I'd feel safe in a pedestrian/bike underpass, without vehicular traffic, so I hope the parts are well separated.

#### Question 14

Bike & Ped underpass leaving Sunnyvale Ave intact between Washington and Evelyn leave the small business district intact, does not degrade the businesses along this section, allows for large trucks to service the local business, and provides for better use of the limited parking available to the area. It does not fragment our downtown by a lowered barrier roadway while also sustains better pedestrian access to the area with unifying aspect to Sunnyvale's downtown.

- This option has a lower construction cost estimate.

#### Question 4

- Car

#### Question 5

## Caltrain crossing options at Mary and Sunnyvale avenues

How should we change the Caltrain crossings at Mary and Sunnyvale avenues?

- Bicycle

### Question 6

- Yes, because I would feel safer without the train tracks

### Question 7

I do not think this is immediately necessary. I would prioritize resources to grade separation of Sunnyvale Ave since this is impacted by long delays due to the nearby station and the consequent long delays due to trains stopped at the station.

### Question 8

- Getting to downtown Sunnyvale

### Question 9

- Underpass Tunnel of Sunnyvale Avenue underneath Evelyn Ave, Caltrain tracks, and Hendy Ave

### Question 10

- This is the safest option.
- This has better circulation patterns for cars, buses, etc.
- This has better circulation patterns for bicyclists, scooters, etc.

### Question 11

- Car

### Question 12

- Bicycle

### Question 13

- Yes, because the project is adding bicycle and pedestrian improvements

### Question 14

I would prioritize resources to grade separation of Sunnyvale Ave since this is impacted by long delays due to the nearby station and the consequent long delays due to trains stopped at the station. This is a major route to access downtown stores and services for the north side of Sunnyvale. The delays due to trains stopping at the nearby station are long and will be worse when more trains are running. I do not think Sunnyvale Ave will be an option to access downtown as more trains are added without the underpass.

### Name not available

July 11, 2022, 11:07 AM

### Question 1

- Accessing businesses and amenities close to this location

### Question 2

- Underpass of Mary and Evelyn intersection

### Question 3

- This has better circulation patterns for cars, buses, etc.
- This has better circulation patterns for bicyclists, scooters, etc.
- This has better circulation patterns for pedestrians.

### Question 4

- Car

### Question 5

- Car

### Question 6

- No, I would use vehicles the same amount

### Question 7

I think the "Underpass of Mary and Evelyn intersection" is the better long term solution for this intersection. This solution provides the communities north of the tracks and business and retail traffic to have easy access into Sunnyvale. It also better supports pedestrians and bicycle safer movement through the intersections, promoting more non-vehicle use in this area.

### Question 8

- Accessing businesses and amenities close to this location

### Question 9

- Underpass Tunnel of Sunnyvale Avenue underneath Evelyn Ave, Caltrain tracks, and Hendy Ave

### Question 10

- This has better circulation patterns for cars, buses, etc.
- This has better circulation patterns for bicyclists, scooters, etc.

## Caltrain crossing options at Mary and Sunnyvale avenues

How should we change the Caltrain crossings at Mary and Sunnyvale avenues?

- This has better circulation patterns for pedestrians.

### Question 11

- Car

### Question 12

- Car
- Walking

### Question 13

- No, I would use vehicles the same amount

### Question 14

I think the "Underpass Tunnel of Sunnyvale Avenue underneath Evelyn Ave, Caltrain tracks, and Hendy Ave" is the better long term solution for this intersection. If Sunnyvale Ave is chopped in half at the tracks, you will separate Sunnyvale into "the haves" and "have-nots". After all the long hard work to create a thriving downtown Sunnyvale, you will be cutting off access for the communities, business and retail traffic from 'the other side of the tracks' to get to the new downtown. This then also reduces the economic growth potential for all the downtown retail businesses.

inside Sunnyvale  
July 11, 2022, 6:36 PM

#### Question 1

- Getting to downtown Mountain View

#### Question 2

- Underpass of Mary Avenue with "jug handle" connection to Evelyn Avenue

#### Question 3

- This will best reduce noise from crossing gate bells and train horns.
- This has better circulation patterns for bicyclists, scooters, etc.
- This option has a lower construction cost estimate.

#### Question 4

- Bicycle

#### Question 5

- Scootering

#### Question 6

- Yes, because the project is adding bicycle and pedestrian improvements

#### Question 7

I try to use a bicycle as my primary local transport and Evelyn is about the best east/west way of getting to/from Sunnyvale downtown. Very happy with any option that improves cycling options along Evelyn, and would prefer to have Evelyn stay at grade, while Mary is lowered (which is also the cheaper of the two options).

#### Question 8

- Getting to downtown Sunnyvale

#### Question 9

- Bicycle and Pedestrian only Underpass of Sunnyvale – No cars

#### Question 10

- This has better circulation patterns for bicyclists, scooters, etc.
- This has better circulation patterns for pedestrians.

## Caltrain crossing options at Mary and Sunnyvale avenues

How should we change the Caltrain crossings at Mary and Sunnyvale avenues?

- This option has a lower construction cost estimate.

### Question 11

- Bicycle

### Question 12

- Walking

### Question 13

- No, I would use vehicles the same amount

### Question 14

I would prefer the bicycle/pedestrian underpass option. Cheaper option, and better for encouraging cyclists and pedestrians. Sunnyvale lacks good/safe/quiet options for travel in north/south directions. Making Sunnyvale Ave a bicycle/pedestrian underpass would help speed bike/foot traffic through the intersection while also causing a reduction in car traffic on the north section of Sunnyvale Ave, helping to make it a great cycling route. (North/south vehicle traffic is already well served by the nearby Fairoaks and Mathilda, neither of which are very bicycle friendly.) Thanks for looking to make cycling safer in Sunnyvale!

- No, I would use vehicles the same amount

#### Question 7

No response

#### Question 8

- Getting to downtown Sunnyvale

#### Question 9

- Underpass Tunnel of Sunnyvale Avenue underneath Evelyn Ave, Caltrain tracks, and Hendy Ave

#### Question 10

- This will best reduce noise from crossing gate bells and train horns.
- This will best reduce noise from vehicle traffic.
- This has better circulation patterns for cars, buses, etc.

#### Question 11

- Car

#### Question 12

- Walking

#### Question 13

- Yes, both of the above

#### Question 14

My primary concern with option #2 is that vehicles will no longer be able

to travel North <-> South on Sunnyvale Ave beyond that point and will be forced to re-route to Mathilda Ave (adding more traffic to that road, and distance to their trips). I live close to Sunnyvale Ave and it's my primary means of crossing the Caltrain tracks via car (e.g. to travel between Maude and El Camino). Would prefer it not be closed off to cars there!

### Question 12

- Bicycle
- Walking

## Caltrain crossing options at Mary and Sunnyvale avenues

How should we change the Caltrain crossings at Mary and Sunnyvale avenues?

### Question 13

- Yes, both of the above

### Question 14

I live at 186 N. Sunnyvale Avenue. Vehicles currently speed by at 40 to 50 mph. A vehicle underpass would likely result in even faster traffic. There have been many accidents at the Sunnyvale/California intersection under the current configuration. (Please check your records). Enabling faster traffic on this two lane neighborhood street is a recipe for disaster. My wife and I have both been "rear-ended" pulling into our driveway from the north bound direction.

---

### Andrew Fisher

inside Sunnyvale

July 12, 2022, 8:12 PM

### Question 1

- Accessing businesses and amenities close to this location

### Question 2

- Underpass of Mary Avenue with "jug handle" connection to Evelyn Avenue

### Question 3

- This has better circulation patterns for bicyclists, scooters, etc.
- This option has less construction impacts.
- Other - This option has lower execution risk and can get done faster

### Question 4

- Car

### Question 5

- Bicycle

### Question 6

- Yes, both of the above

### Question 7

In the design where the whole intersection is lowered, cyclists traveling along Evelyn passing Mary will encounter a stoplight at the bottom of the underpass. This is more burdensome for cyclists since they'd have to stop at the light (if red) and then would have to work back up the hill. For

the jughandle option, the traffic along Evelyn avoids the potential of a stop at the bottom of a new valley, which would be more favorable and potentially safer for cycling along Evelyn.

### Question 8

- Getting to downtown Sunnyvale

### Question 9

- Bicycle and Pedestrian only Underpass of Sunnyvale – No cars

### Question 10

- This has better circulation patterns for cars, buses, etc.
- This has better circulation patterns for bicyclists, scooters, etc.
- This option has a lower construction cost estimate.

### Question 11

- Car

### Question 12

- Bicycle
- Walking

### Question 13

- Yes, both of the above

### Question 14

The yes-cars underpass tunnel option seems like it is substantially more expensive, higher execution risk, would take longer to complete, and the proposed design would make it harder to get from Evelyn Ave to the downtown side of Sunnyvale Ave and vice-versa than the no-cars option would. I prefer the no-cars option, especially when it's so close to our downtown area.

#### Question 1

- Getting to downtown Mountain View

#### Question 2

- Underpass of Mary Avenue with "jug handle" connection to Evelyn Avenue

#### Question 3

- This is the safest option.
- This has better circulation patterns for bicyclists, scooters, etc.
- Other - Evelyn is a big bike corridor between sunnyvale and MTV, depressing it and keeping that 7 lane intersection seems sketchy for bikes. Keeping evelyn flat also will encourage folks to keep biking

#### Question 4

- Bicycle

#### Question 5

- Car

#### Question 6

- Yes, because the project is adding bicycle and pedestrian improvements

#### Question 7

tunnels and bike lanes are always sketchy, what exactly are the proposed improvements to the biking/walking infra? I see the diagrams propose bike lane is level with the roadway - which means cars can still veer into it, and with now decreased visibility due to the depression.

#### Question 8

### Caltrain crossing options at Mary and Sunnyvale avenues

How should we change the Caltrain crossings at Mary and Sunnyvale avenues?

- Commuting for work

#### Question 9

- Bicycle and Pedestrian only Underpass of Sunnyvale – No cars

#### Question 10

- Other - Tunnels with bike lanes at the same level as cars are spooky.

#### Question 11

- Bicycle

#### Question 12

No response

#### Question 13

- Yes, because the project is adding bicycle and pedestrian improvements

#### Question 14

not having to wait for the train would be convenient

Not adding a dedicated bike lane in Proposal A (car tunnel) is a huge missed opportunity, and would probably discourage biking. That crossing is bad enough with the bike lane suddenly going away, also making it a tunnel (without dedicated, separated bike lane) would feel more dangerous for biking than what we have now.

#### Question 1

- Commuting for work

#### Question 2

- I like both options equally.

#### Question 3

- Other - I personally think the intersection should be eliminated altogether

#### Question 4

- Walking

#### Question 5

- Transit – Caltrain
- Bicycle

#### Question 6

- Yes, both of the above

#### Question 7

I think it would be best if the Evelyn x Mary intersection would be removed altogether. It would improve the flow of traffic on both streets.

#### Question 8

- Accessing businesses and amenities close to this location

#### Question 9

- Bicycle and Pedestrian only Underpass of Sunnyvale – No cars

#### Question 10

- This is the safest option.
- This will best reduce noise from vehicle traffic.
- This has better circulation patterns for cars, buses, etc.

#### Question 11

- Walking

#### Question 12

- Transit – Caltrain

#### Question 13

- Yes, both of the above

#### Question 14

No response

---

#### Name not available

#### Question 1

- Other - Visiting friends via Evelyn

#### Question 2

- Underpass of Mary Avenue with "jug handle" connection to Evelyn Avenue

#### Question 3

- This option has less potential private property impacts.
- This option has less construction impacts.
- This option has a lower construction cost estimate.

#### Question 4

- Car

#### Question 5

- Car

### Caltrain crossing options at Mary and Sunnyvale avenues

How should we change the Caltrain crossings at Mary and Sunnyvale avenues?

#### Question 6

- No, I would use vehicles the same amount

#### Question 7

No response

#### Question 8

- Accessing businesses and amenities close to this location

#### Question 9

- Bicycle and Pedestrian only Underpass of Sunnyvale – No cars

#### Question 10

- This option has less potential private property impacts.
- This option has less construction impacts.
- This option has a lower construction cost estimate.

#### Question 11

- Car

#### Question 12

- Transit – Caltrain

#### Question 13

- No, I would use vehicles the same amount

#### Question 14

My primary use of this intersection is along Sunnyvale Ave. My choice (that impacts me negatively the most) is based on the cost and impact to other peoples property. Both Mary and Fairoaks provide alternative over the railway, and are not too far away.

## Caltrain crossing options at Mary and Sunnyvale avenues

How should we change the Caltrain crossings at Mary and Sunnyvale avenues?

### Question 14

No response

- This has better circulation patterns for cars, buses, etc.
- This option has less potential private property impacts.

### Name not available

July 19, 2022, 4:44 PM

### Question 1

- Getting to downtown Sunnyvale

### Question 2

- Underpass of Mary and Evelyn intersection

### Question 3

- This has better circulation patterns for cars, buses, etc.
- This has better circulation patterns for bicyclists, scooters, etc.
- This has better circulation patterns for pedestrians.

### Question 4

- Car

### Question 5

- Car

### Question 6

- No, I would use vehicles the same amount

### Question 7

This may cost more money, but it is less confusing to travel in a straight line, especially at night.

### Question 8

- Accessing businesses and amenities close to this location

### Question 9

- Underpass Tunnel of Sunnyvale Avenue underneath Evelyn Ave, Caltrain tracks, and Hendy Ave

### Question 10

- This is the safest option.

### Question 11

- Car

### Question 12

- Car

### Question 13

- Yes, both of the above

### Question 14

The less complex the traffic pattern is the better. Keeping the feel of the City is also importance, by the way you're doing a terrible job with that! Keeping the property owners way of life is very importance. Way of life is importance!! The City of Sunnyvale Government ruined my way of life three time now with quote progress!

#### Question 2

- Underpass of Mary and Evelyn intersection

#### Question 3

- This has better circulation patterns for bicyclists, scooters, etc.
- This option has less potential private property impacts.
- Other - The cost estimates and private property impacts on the jughandle look incorrect since the proposal includes significant additional road and demolition of property.

#### Question 4

## Caltrain crossing options at Mary and Sunnyvale avenues

How should we change the Caltrain crossings at Mary and Sunnyvale avenues?

- Bicycle

### Question 5

- Car

### Question 6

- Yes, because I would feel safer without the train tracks

### Question 7

Biking up Mary still has the central expressway intersection and this is far more dangerous when biking than the rail intersection.

### Question 8

- Commuting for work

### Question 9

- Bicycle and Pedestrian only Underpass of Sunnyvale – No cars

### Question 10

- This option has less construction impacts.
- This option has a lower construction cost estimate.

### Question 11

- Bicycle

### Question 12

No response

### Question 13

- Yes, because the project is adding bicycle and pedestrian improvements

### Question 14

My bike ride is easy on Evelyn turning left to go north on Sunnyvale. The rail crossing is annoying but not particularly hazardous.

A concern I have about the design is that there will be sufficient space that cyclists will not be at risk of colliding with pedestrians. Ideally there would be separation.

### Question 1

- I do not or rarely travel through here

### Question 2

- Underpass of Mary Avenue with "jug handle" connection to Evelyn Avenue

### Question 3

- This option has less potential private property impacts.
- This option has less construction impacts.
- This option has a lower construction cost estimate.

### Question 4

- Car

### Question 5

- Transit – Caltrain

### Question 6

- No, I would use vehicles the same amount

### Question 7

No response

### Question 8

- Getting to parks, trails, or other recreation spots

### Question 9

- Underpass Tunnel of Sunnyvale Avenue underneath Evelyn Ave, Caltrain tracks, and Hendy Ave

### Question 10

- This has better circulation patterns for cars, buses, etc.
- This has better circulation patterns for bicyclists, scooters, etc.
- This has better circulation patterns for pedestrians.

### Question 11

- Car

### Question 12

- Walking

### Question 13

- Yes, both of the above

### Question 14

Not allowing vehicle traffic to move through this intersection is not fair as it cuts off people who live North of it from easily accessing downtown via car. How would someone drive to Whole Foods or Target if that intersection is closed to them? Go all the way back to Mathilda or over to fair oaks? These roads are busy and congested enough. I guess there is that other small overpass through residential street, but this would then increase their vehicle traffic. This intersection is too important for accessing downtown to be cut off to traffic and we should do what makes the most sense long term rather than a cheaper bandaid.

### Caltrain crossing options at Mary and Sunnyvale avenues

How should we change the Caltrain crossings at Mary and Sunnyvale avenues?

#### Question 9

- Underpass Tunnel of Sunnyvale Avenue underneath Evelyn Ave, Caltrain tracks, and Hendy Ave

#### Question 10

- This has better circulation patterns for cars, buses, etc.

#### Question 11

- Bicycle

#### Question 12

- Car
- Transit – buses or shuttles

#### Question 13

- Yes, because the project is adding bicycle and pedestrian improvements

#### Question 14

The first option does not show how bicycles get across the tracks. It is critical that there be bicycle lanes in the underpass, or that there be a bicycle path that crosses the tracks at grade. Preventing bicycles from crossing the tracks at this intersection is unacceptable.

The bicycle-only tunnel option is also awful because it cuts many lower-income people off from vehicular access to downtown.

## Caltrain crossing options at Mary and Sunnyvale avenues

How should we change the Caltrain crossings at Mary and Sunnyvale avenues?

### Question 2

- Underpass of Mary and Evelyn intersection

### Question 3

- This has better circulation patterns for cars, buses, etc.
- This has better circulation patterns for bicyclists, scooters, etc.
- This option has less potential private property impacts.

### Question 4

- Car

### Question 5

- Car

### Question 6

- No, I would use vehicles the same amount

### Question 7

This is a the most straightforward design. Jughandle intersections will interrupt the efficient flow of traffic through the area.

### Question 8

- I do not or rarely travel through here

### Question 9

- Underpass Tunnel of Sunnyvale Avenue underneath Evelyn Ave, Caltrain tracks, and Hendy Ave

### Question 10

- This is the safest option.
- This option has less construction impacts.
- This option has a lower construction cost estimate.

### Question 11

- I do not travel through this crossing

### Question 12

- I do not travel through this crossing

### Question 13

- No, I would use vehicles the same amount

### Question 14

There is no good option that will preserve the current auto travel patterns. The underpass preserves the connectivity of neighborhoods on either side of the railroad tracks.

Are both plans compatible with the High Speed Rail track design through Sunnyvale?

---

### Name not available

July 21, 2022, 9:23 AM

### Question 1

- Getting to downtown Mountain View

### Question 2

- Underpass of Mary Avenue with "jug handle" connection to Evelyn Avenue

### Question 3

- This has better circulation patterns for bicyclists, scooters, etc.

### Question 4

- Bicycle

### Question 5

- Car
- Transit – Caltrain

### Question 6

- No, I would use vehicles more often

### Question 7

Evelyn is good for biking so it should stay road-level. Mary is good for driving if it is separated from the tracks. I currently avoid Mary because of having to cross the tracks. I take Mathilda instead.

### Question 8

- Getting to downtown Sunnyvale

## Caltrain crossing options at Mary and Sunnyvale avenues

How should we change the Caltrain crossings at Mary and Sunnyvale avenues?

### Question 9

- Underpass Tunnel of Sunnyvale Avenue underneath Evelyn Ave, Caltrain tracks, and Hendy Ave

### Question 10

- This has better circulation patterns for cars, buses, etc.
- This has better circulation patterns for bicyclists, scooters, etc.
- This has better circulation patterns for pedestrians.

### Question 11

- Car

### Question 12

- Transit – Caltrain
- Bicycle
- Walking

### Question 13

- No, I would use vehicles the same amount

### Question 14

I don't like either option much but I HATE the option of closing the entire intersection to cars. I use this intersection A LOT to go to downtown Sunnyvale and Whole Foods to buy groceries. I can't take groceries home on my bicycle or walking. Please DO NOT close this intersection to cars.

### Question 1

- Getting to parks, trails, or other recreation spots

### Question 2

- Underpass of Mary Avenue with "jug handle" connection to Evelyn Avenue

### Question 3

- This is the safest option.
- This has better circulation patterns for bicyclists, scooters, etc.
- This option has a lower construction cost estimate.

### Question 4

- Bicycle

### Question 5

- Transit – Caltrain
- Walking

### Question 6

- Yes, both of the above

### Question 7

No response

### Question 8

- Commuting for work

### Question 9

- Bicycle and Pedestrian only Underpass of Sunnyvale – No cars

### Question 10

- This is the safest option.
- This has better circulation patterns for bicyclists, scooters, etc.

### Question 11

- Bicycle

### Question 12

- Transit – Caltrain
- Walking

### Question 13

- Yes, both of the above

### Question 14

Another option to consider would be making Sunnyvale Ave a one way, north to south, street from Maude to Evelyn. That will allow for enough bike lane space around school and connect Borregas bike lanes to South Sunnyvale bike lanes. Also, it wont cut off access to downtown for lowlanders and snail areas.

#### Question 13

- No, I would use vehicles the same amount

## Caltrain crossing options at Mary and Sunnyvale avenues

How should we change the Caltrain crossings at Mary and Sunnyvale avenues?

### Question 14

1. I don't like either option, neither offers sufficient benefit to justify the cost and effort.
2. The Bicycle and Pedestrian only Underpass option will likely result in the tunnel being used as a homeless habitat and toilet.
3. Noise and traffic delay at this crossing could be significantly reduced by simply fixing the crossing sensor system so that the gates are not down with alarms sounding while trains are sitting stopped at Sunnyvale Station.
4. The optimal solution here would seem to be, leave the traffic intersections as they are and instead lower the railway to pass underneath Sunnyvale Ave. although it would require lowering the platform at Sunnyvale Station.
5. Regardless of what modification is implemented, how is potential flooding being addressed for the lowered area(s)?

- Bicycle
- Walking
- Scootering

#### Question 13

- No, I would use vehicles the same amount

## Caltrain crossing options at Mary and Sunnyvale avenues

How should we change the Caltrain crossings at Mary and Sunnyvale avenues?

### Question 14

This is a bad idea because it would push more traffic to California Ave and Mathilda. California cannot support additional traffic (it's not wide enough), and Mathilda is already busy, and will already have to support more traffic due to the new housing options on Mathilda and in downtown. It also cuts off a normal route for neighborhoods North if the train tracks from downtown and businesses along El Camino Real.

#### Per Bjornsson

inside Sunnyvale

July 23, 2022, 1:01 PM

#### Question 1

- Accessing businesses and amenities close to this location

## Caltrain crossing options at Mary and Sunnyvale avenues

How should we change the Caltrain crossings at Mary and Sunnyvale avenues?

### Question 2

- Underpass of Mary Avenue with "jug handle" connection to Evelyn Avenue

### Question 3

- This option has less construction impacts.
- This option has a lower construction cost estimate.
- Other - The smaller impacts are attractive but mitigations to make sure that bike and pedestrian traffic works well are critical

### Question 4

- Car

### Question 5

- Bicycle

### Question 6

- Yes, because I would feel safer without the train tracks

### Question 7

The jughandle option has a lot of potential conflict points between car and bike/ped traffic but if all intersections are designed to be protected this concern is reduced or eliminated.

### Question 8

- Getting to parks, trails, or other recreation spots

### Question 9

- Bicycle and Pedestrian only Underpass of Sunnyvale – No cars

### Question 10

- This is the safest option.
- This has better circulation patterns for bicyclists, scooters, etc.
- This has better circulation patterns for pedestrians.

### Question 11

- Car

### Question 12

- Bicycle

- Walking

### Question 13

- Yes, because the project is adding bicycle and pedestrian improvements

### Question 14

My answer that this would be an improvement for bikes and pedestrians is only true for the bike/ped-only option. The checker traffic tunnel actually makes the curtains much less desirable for non-vehicle traffic since it'll require significant detours. This is not a great vehicle crossing now, adding cars through this corridor at the expense of non-vehicle movement seems entirely contrary to stated city goals.

How should we change the Caltrain crossings at Mary and Sunnyvale avenues?

No response

### Question 8

- Getting to downtown Sunnyvale

### Question 9

- Bicycle and Pedestrian only Underpass of Sunnyvale – No cars

### Question 10

- This has better circulation patterns for bicyclists, scooters, etc.
- This has better circulation patterns for pedestrians.
- This option has a lower construction cost estimate.

### Question 11

- Car

### Question 12

- Transit – buses or shuttles
- Transit – Caltrain
- Bicycle
- Walking
- Other - running, biking with my elementary and middle school aged kids

### Question 13

- Yes, because the project is adding bicycle and pedestrian improvements

### Question 14

I strongly prefer the bike/ped only option. This will reduce traffic on Sunnyvale Ave, hopefully reduce speeds, and pair nicely with the bike lanes being constructed this summer. I live in SNAIL. Even though I will have fewer options get to downtown by car, this isn't a hardship. It will likely encourage me to walk and bike more often. This option also keeps the grid structure of downtown. The auto undercrossing creates a canyon that divides downtown at Sunnyvale Avenue, making it inhospitable and not in line with the great improvements, pedestrian amenities, shops, offices, housing being constructed in downtown today. My only qualm with the bike/ped only crossing is it will require the 55 to significantly re-route.

#### Question 1

- I do not or rarely travel through here

#### Question 2

- Underpass of Mary and Evelyn intersection

#### Question 3

- This is the safest option.
- This has better circulation patterns for bicyclists, scooters, etc.
- This has better circulation patterns for pedestrians.

#### Question 4

- Other - I do not generally pass through this crossing, but I have on occasion on my bike, which is my transportation mode in Sunnyvale.

#### Question 5

- Other - .

#### Question 6

- Yes, because I would feel safer without the train tracks

#### Question 7

Separating vehicles from bikes and peds is THE best way for safety, which in turn encourages bicycles, scooters, and walkers. Both formal surveys and anecdotes tell us that people are reluctant to use bicycles in Sunnyvale because of safety concerns. Separation makes sense for vehicles so they do not need to be so watchful for bikes and peds and for the latter so they can safely get to their destinations.

#### Question 8

- I do not or rarely travel through here

#### Question 9

- Bicycle and Pedestrian only Underpass of Sunnyvale – No cars

#### Question 10

- This is the safest option.
- This has better circulation patterns for bicyclists, scooters, etc.
- This has better circulation patterns for pedestrians.

#### Question 11

- Bicycle

#### Question 12

- Bicycle

#### Question 13

- Yes, because I would feel safer without the train tracks

#### Question 14

### Caltrain crossing options at Mary and Sunnyvale avenues

How should we change the Caltrain crossings at Mary and Sunnyvale avenues?

#### Question 13

- No, I would use vehicles the same amount

#### Question 14

I think we could afford to remove car traffic from this crossing. Mary Ave and Fair Oaks Ave would be able to handle the routed traffic.

---

#### Name not available

July 23, 2022, 8:41 PM

#### Question 1

- Accessing businesses and amenities close to this location

#### Question 2

- I like both options equally.

#### Question 3

- Other - IDC about this one

#### Question 4

- Car

#### Question 5

- Transit – buses or shuttles
- Transit – Caltrain

#### Question 6

- No, I would use vehicles the same amount

#### Question 7

I don't have options about this one, I only wanted to leave feedback for the Sunnyvale ave proposal

#### Question 8

- Commuting for work

#### Question 9

- I don't like either option.

#### Question 10

- This has better circulation patterns for bicyclists, scooters, etc.
- This has better circulation patterns for pedestrians.

#### Question 11

- Transit – buses or shuttles

#### Question 12

- Car
- Transit – buses or shuttles

#### Question 13

- No, I would use vehicles the same amount

#### Question 14

I dislike both options. Please consider a pedestrian-only over/underpass and leave the car intersection as-is. This isn't a busy intersection and cars can wait, even with increased train traffic.

July 23, 2022, 10:38 PM

#### Question 1

- Getting to parks, trails, or other recreation spots

#### Question 2

- I don't like either option.

#### Question 3

- Other - Neither option has safety enhancements for bikes included

#### Question 4

- Bicycle

#### Question 5

- Car
- Walking

#### Question 6

## Caltrain crossing options at Mary and Sunnyvale avenues

How should we change the Caltrain crossings at Mary and Sunnyvale avenues?

- Yes, because the project is adding bicycle and pedestrian improvements

### Question 7

Neither option is good for cyclists unless safety enhancements are made to these designs. For the Depressed Intersection option, I'd like to see protected intersections and No Turn On Red. For the Jughandle option, there needs to be protected intersections, No Turn On Red, bike/ped ramps from the future Evelyn trail down to Mary Ave, and bike-specific traffic signals for crossings at all intersections. This will make it safer and less stressful for cyclists.

### Question 8

- Accessing businesses and amenities close to this location

### Question 9

- Bicycle and Pedestrian only Underpass of Sunnyvale – No cars

### Question 10

- This is the safest option.
- This has better circulation patterns for bicyclists, scooters, etc.
- This has better circulation patterns for pedestrians.

### Question 11

- Bicycle

### Question 12

- Car

### Question 13

- Yes, both of the above

### Question 14

The pedestrian-bicycle only underpass will make moving around downtown safer and more pleasant.

### Name not shown

inside Sunnyvale

July 24, 2022, 10:39 AM

### Question 1

- Other - Getting to Caltrain by bike (generally I use Evelyn a lot more than ever crossing Mary). Otherwise, if I am driving, this crossing is only used for getting to Central Expressway.

### Question 2

- I don't like either option.

### Question 3

- Other - Both have disadvantages

### Question 4

- Bicycle

## Caltrain crossing options at Mary and Sunnyvale avenues

How should we change the Caltrain crossings at Mary and Sunnyvale avenues?

### Question 5

- Transit – Caltrain
- Walking

### Question 6

No response

### Question 7

I'm worried about the extra effort required to go down and up an incline on a bike when on Evelyn for lowering Evelyn (since sometimes you will have to stop for Mary Ave traffic, instead of being able to re-use the energy gained from descending), but I am also worried that the jughandle will introduce more opportunities for collisions, as it introduces more intersection points on the road. I prefer what is safest for bikes and pedestrians, but I do not have the expertise or data to know which option that would be.

### Question 8

- Getting to parks, trails, or other recreation spots

### Question 9

- Bicycle and Pedestrian only Underpass of Sunnyvale – No cars

### Question 10

- This is the safest option.
- This has better circulation patterns for cars, buses, etc.
- This has better circulation patterns for bicyclists, scooters, etc.

### Question 11

- Bicycle

### Question 12

- Transit – Caltrain
- Walking

### Question 13

No response

### Question 14

I hope this encourages more bike usage! DTSV should not be a place for cars anyway.

ALSO for the naysayers about traffic increases, it's not always true that removing a pathway increases traffic elsewhere - in fact sometimes, it can decrease traffic (I think partly due to less intersections, as intersections increase waiting). There may also be secondary effects of encouraging people who once drove to now bike as they feel like they have a safe enough option to do so (half the point of this survey I think).

### Name not available

July 24, 2022, 10:59 AM

### Question 1

- Getting to downtown Sunnyvale

### Question 2

- Underpass of Mary Avenue with "jug handle" connection to Evelyn Avenue

July 24, 2022, 12:53 PM

#### Question 1

- I do not or rarely travel through here

#### Question 2

- Underpass of Mary Avenue with “jug handle” connection to Evelyn Avenue

#### Question 3

- This will best reduce noise from vehicle traffic.

#### Question 4

- Bicycle

#### Question 5

- Walking

#### Question 6

- Yes, because I would feel safer without the train tracks

#### Question 7

I would rather the city be focusing on better bike infrastructure in this intersection, but I hope that as an alternative, the city will take the smaller of these two options, and use the extra funds (and space!) to make some fully protected intersections at this underpass, for bicycle travel.

#### Question 8

- Getting to downtown Sunnyvale

#### Question 9

- Bicycle and Pedestrian only Underpass of Sunnyvale – No cars

#### Question 10

- This is the safest option.
- This will best reduce noise from vehicle traffic.
- This has better circulation patterns for bicyclists, scooters, etc.

#### Question 11

- Bicycle

#### Question 12

- Walking

#### Question 13

- Yes, because the project is adding bicycle and pedestrian improvements

#### Question 14

I bike here once a week (to attend a social gathering in Downtown Sunnyvale), and I'd be very excited to make use of a bike-and-pedestrian underpass! Downtown Sunnyvale has the potential to be low-car hub of activity, and making the underpass bike-and-ped-only would really contribute to this! Moreso than other areas of Sunnyvale, this spot is well suited for connecting bike trails and high-density pedestrian paths.

#### Question 4

- Bicycle

#### Question 5

- Car

## Caltrain crossing options at Mary and Sunnyvale avenues

How should we change the Caltrain crossings at Mary and Sunnyvale avenues?

### Question 6

- Yes, both of the above

### Question 7

The jughandle option is better for cyclists heading north on Evelyn (which I do often) because there is never traffic turning/coming from the left side. In the underpass plan, cyclists on Evelyn have to deal with turning cars (which is already bad with the lack of a dedicated right turn lane on Evelyn northbound at Mary).

Similarly, cyclists going westbound on Mary no longer have conflicts with vehicles on the right.

The jughandle also keeps Evelyn at grade, so cyclists don't have to climb up the slope from the underpass to surface level.

Please lay out the bicycle lanes on the jughandle in a way that gives cyclists a green left turn lane, and make the right auto lane on the jughandle northbound a dedicated right turn lane.

If you make the bicycle lane on Evelyn northbound a separated lane, and the bicycle lane on Mary westbound a separated lane, it would allow for cyclists to always have a green signal. This would encourage cycling in this area.

### Question 8

- Getting to downtown Sunnyvale

### Question 9

- Bicycle and Pedestrian only Underpass of Sunnyvale – No cars

### Question 10

- This has better circulation patterns for bicyclists, scooters, etc.
- This option has less potential private property impacts.
- This option has less construction impacts.

### Question 11

- Bicycle

### Question 12

- Car

### Question 13

- Yes, both of the above

### Question 14

The tunnel option is hugely disruptive, and cuts off Evelyn from Sunnyvale Ave. As a cyclist I would not enjoy biking through this tunnel without separated bike lanes.

The ped/bicycle underpass option is less disruptive to Evelyn and Hendy. However, as a cyclist the ramp on the Hendy looks like it has a very sharp corner which looks dangerous to navigate on a bike. If you want to encourage cyclists to use this underpass, the bike flow should be smooth without sharp turns. There's space next to the tracks on the north side; can that be used for a more smoothly-flowing ramp? The Evelyn-side ramp also needs to provide a smooth transition for cyclists taking any of the three directions from that side.

Alternatively, has a bicycle/pedestrian bridge been considered for this intersection? It could curve to the north to meet Hendy.

Since this under crossing option prevents auto traffic between Sunnyvale Ave at this point, it will increase traffic accessing Lowlanders via California Ave from Mathilda to Sunnyvale Ave. That section of California Ave is narrow, with parked cars and the turn onto Central, and I think with increased traffic you'd need to ban parking from it to ease flow.

#### Question 8

- Getting to downtown Sunnyvale

#### Question 9

- Underpass Tunnel of Sunnyvale Avenue underneath Evelyn Ave, Caltrain tracks, and Hendy Ave

#### Question 10

- This has better circulation patterns for cars, buses, etc.
- This has better circulation patterns for bicyclists, scooters, etc.
- This has better circulation patterns for pedestrians.

#### Question 11

- Car

#### Question 12

- Transit – Caltrain
- Bicycle
- Walking

#### Question 13

- Yes, both of the above

#### Question 14

The traffic patterns of completely removing vehicle traffic are untenable and would likely reduce my time spent at the downtown Sunnyvale businesses

#### Question 1

- Accessing businesses and amenities close to this location

#### Question 2

- Underpass of Mary Avenue with “jug handle” connection to Evelyn Avenue

## Caltrain crossing options at Mary and Sunnyvale avenues

How should we change the Caltrain crossings at Mary and Sunnyvale avenues?

### Question 3

- This is the safest option.
- This has better circulation patterns for cars, buses, etc.
- This has better circulation patterns for bicyclists, scooters, etc.

### Question 4

- Car

### Question 5

- Bicycle

### Question 6

- Yes, because the project is adding bicycle and pedestrian improvements

### Question 7

The jug handle option seems to have better visibility at intersections.

### Question 8

- Commuting for work

### Question 9

- Bicycle and Pedestrian only Underpass of Sunnyvale – No cars

### Question 10

- This is the safest option.
- This has better circulation patterns for bicyclists, scooters, etc.
- This has better circulation patterns for pedestrians.

### Question 11

- Bicycle

### Question 12

- Car

### Question 13

- Yes, because the project is adding bicycle and pedestrian improvements

### Question 14

The bicycle and pedestrian only underpass is the much safer option here. I am quite comfortable cycling on city streets, but would feel unsafe sharing a lane with cars in a block long tunnel.

### Name not available

### Name not available

July 26, 2022, 7:28 AM

#### Question 1

- Other - commute to work, park and others. All above

#### Question 2

- Underpass of Mary and Evelyn intersection

#### Question 3

- This is the safest option.
- This will best reduce noise from crossing gate bells and train horns.
- This will best reduce noise from vehicle traffic.

#### Question 4

- Bicycle

#### Question 5

- Car
- Bicycle
- Walking

#### Question 6

- Yes, because I would feel safer without the train tracks

#### Question 7

I think this is the safest option since it will keep the biker safer without competing with the cars. Currently it is kind of dangerous. I always use the pedestrian light instead for the left turn from Mary to Evelyn since too many cars to not to make safe to do the left turn. Not sure the underpass also for the pedestrian, right? So it will make it safer.

#### Question 8

- I do not or rarely travel through here

#### Question 9

- I don't like either option.

#### Question 10

- This is the safest option.
- This will best reduce noise from crossing gate bells and train horns.
- This will best reduce noise from vehicle traffic.

#### Question 11

- Transit – Caltrain

#### Question 12

- Car
- Transit – Caltrain
- Bicycle
- Walking

#### Question 13

- Yes, because I would feel safer without the train tracks

### Question 9

- Bicycle and Pedestrian only Underpass of Sunnyvale – No cars

### Question 10

- This is the safest option.
- This will best reduce noise from vehicle traffic.
- This has better circulation patterns for bicyclists, scooters, etc.

### Question 11

- Bicycle

### Question 12

- Car
- Transit – buses or shuttles
- Transit – Caltrain
- Bicycle
- Walking

### Question 13

- Yes, because the project is adding bicycle and pedestrian improvements

### Question 14

"Sunnyvale Avenue Underpass Tunnel" option is hostile to North/South cyclists. Sunnyvale Ave between Evelyn and Maude is currently the worst part of the bike-lane network running North/South between the Bay Trail and Saratoga. The proposed underpass tunnel makes this section notably worse by adding elevation without adding separated bicycle infrastructure. "Sunnyvale Avenue Ped/Bicycle Undercrossing" however, swaps car access for ped access, which organically change traffic flows to encourage Fair Oaks & Mathilda for North/South driving, while encouraging Sunnyvale/Saratoga+Boregas for low-carbon (bikes, pedestrians, etc) North/South users.

### Question 1

- Commuting for work

### Question 2

- Underpass of Mary and Evelyn intersection

### Question 3

- This is the safest option.
- This has better circulation patterns for cars, buses, etc.
- This has better circulation patterns for bicyclists, scooters, etc.

### Question 4

- Bicycle

### Question 5

- Car

### Question 6

- No, I would use vehicles the same amount

### Question 7

As a cyclist, turns through intersections are risky, especially going left. The jug handle option adds an additional left hand turn: Going north on

## Caltrain crossing options at Mary and Sunnyvale avenues

How should we change the Caltrain crossings at Mary and Sunnyvale avenues?

Mary and wanting to go East: Left hand turn into jughandle, right on to Evelyn. Going South and intending to go West: Right onto jughandle and turn left onto Evelyn.

Maintaining the current turn patterns is safest in my opinion. I expect left hand turns are also riskier in intersections for cars too.

### Question 8

- Commuting for work

### Question 9

- Underpass Tunnel of Sunnyvale Avenue underneath Evelyn Ave, Caltrain tracks, and Hendy Ave

### Question 10

- This is the safest option.
- This has better circulation patterns for cars, buses, etc.
- This has better circulation patterns for bicyclists, scooters, etc.

### Question 11

- Bicycle

### Question 12

- Car

### Question 13

- Yes, because the project is adding bicycle and pedestrian improvements

### Question 14

Removing options for left and right hand turns on Evelyn and Hendy reduces risk. Second option for pedestrian/bike only underpass cuts off vehicle access going north, and is a poor experience for cyclists.

## Caltrain crossing options at Mary and Sunnyvale avenues

How should we change the Caltrain crossings at Mary and Sunnyvale avenues?

### Question 1

- Getting to downtown Mountain View

### Question 2

- Underpass of Mary Avenue with "jug handle" connection to Evelyn Avenue

### Question 3

- This has better circulation patterns for bicyclists, scooters, etc.
- This has better circulation patterns for pedestrians.
- This option has less potential private property impacts.

### Question 4

- Bicycle

### Question 5

- Car
- Transit – Caltrain

### Question 6

- No, I would use vehicles the same amount

### Question 7

The lower cost jughandle just seems all around better. It prioritizes bicycles and pedestrian safety and throughput by getting rid of the massive four way intersection. That's a win. Realistically either option will work, but why spend money lowering Evelyn at all?

### Question 8

- Commuting for work

### Question 9

- Bicycle and Pedestrian only Underpass of Sunnyvale – No cars

### Question 10

- This has better circulation patterns for bicyclists, scooters, etc.
- This has better circulation patterns for pedestrians.
- This option has a lower construction cost estimate.

### Question 11

- Bicycle

### Question 12

- Car
- Transit – Caltrain
- Bicycle
- Walking

### Question 13

- No, I would use vehicles the same amount

### Question 14

Is it wise to cut those neighborhoods off from easy downtown car access? Are emergency (fire) services impacted in either direction? I don't live there but I expect residents to have loud opinions on this.

---

## Caltrain crossing options at Mary and Sunnyvale avenues

How should we change the Caltrain crossings at Mary and Sunnyvale avenues?

- Accessing businesses and amenities close to this location

### Question 2

- Underpass of Mary Avenue with “jug handle” connection to Evelyn Avenue

### Question 3

- This option has less construction impacts.
- This option has a lower construction cost estimate.
- Other - Construction time would be shorter around Mary. Lowering a big section of Evelyn would take so much time

### Question 4

- Walking

### Question 5

- Car
- Bicycle

### Question 6

- No, I would use vehicles the same amount

### Question 7

Whatever is built underground, I would like to see good lighting and some security presence so that I'd feel comfortable as a pedestrian. I don't want to run into people camping under there, or using illegal drugs, or trying to mug me.

### Question 8

- Getting to downtown Sunnyvale

### Question 9

- Bicycle and Pedestrian only Underpass of Sunnyvale – No cars

### Question 10

- This option has less potential private property impacts.
- This option has less construction impacts.
- This option has a lower construction cost estimate.

### Question 11

- Car

### Question 12

- Bicycle
- Walking

### Question 13

- No, I would use vehicles the same amount

### Question 14

For the underground section I would like to see frequent patrolling by security so that I'd feel safe as a single female walking or bicycling in an underground tunnel. Good lighting is key, and perhaps internet connection so that a distress call/text would reach its destination. I would hope that a dark tunnel wouldn't attract illegal drug use, muggers, homeless encampments.

### Question 1

- Accessing businesses and amenities close to this location

### Question 2

- I don't like either option.

### Question 3

- This is the safest option.
- This has better circulation patterns for bicyclists, scooters, etc.
- This has better circulation patterns for pedestrians.

### Question 4

- Bicycle

### Question 5

- Walking

### Question 6

- Yes, because the project is adding bicycle and pedestrian improvements

### Question 7

## Caltrain crossing options at Mary and Sunnyvale avenues

How should we change the Caltrain crossings at Mary and Sunnyvale avenues?

Neither option is good for cyclists unless safety enhancements are made to these designs. For the Depressed Intersection option, I'd like to see protected intersections and No Turn On Red. For the Jughandle option, there need to be protected intersections, No Turn On Red, bike/ped ramps from the future Evelyn trail down to Mary Ave, and bike-specific traffic signals for crossings at all intersections. This will make it safer and less stressful for cyclists.

### Question 8

- Accessing businesses and amenities close to this location

### Question 9

- Bicycle and Pedestrian only Underpass of Sunnyvale – No cars

### Question 10

- This has better circulation patterns for bicyclists, scooters, etc.
- This option has less construction impacts.
- This option has a lower construction cost estimate.

- Underpass of Mary Avenue with "jug handle" connection to Evelyn Avenue

##### Question 3

- This has better circulation patterns for bicyclists, scooters, etc.
- This option has less construction impacts.
- This option has a lower construction cost estimate.

##### Question 4

- Bicycle

##### Question 5

- Car
- Walking

##### Question 6

- Yes, because the project is adding bicycle and pedestrian improvements

## Caltrain crossing options at Mary and Sunnyvale avenues

How should we change the Caltrain crossings at Mary and Sunnyvale avenues?

### Question 7

No response

### Question 8

- I do not or rarely travel through here

### Question 9

- Bicycle and Pedestrian only Underpass of Sunnyvale – No cars

### Question 10

- This has better circulation patterns for bicyclists, scooters, etc.
- This option has less construction impacts.
- This option has a lower construction cost estimate.

### Question 11

- Bicycle

### Question 12

- Car
- Walking

### Question 13

- Yes, because the project is adding bicycle and pedestrian improvements

- This will best reduce noise from vehicle traffic.
- This has better circulation patterns for bicyclists, scooters, etc.

### Question 11

- Bicycle

### Question 12

## Caltrain crossing options at Mary and Sunnyvale avenues

How should we change the Caltrain crossings at Mary and Sunnyvale avenues?

- Car
- Walking

### Question 13

- Yes, both of the above

### Question 14

I can't tell how the undercrossing would be laid out from the map, but if it's going to be a bike thoroughfare I think it's important for bikes (including cargo bikes and bikes with trailers) to be separated from pedestrians and be able to ride through. If some people want to walk their bikes uphill they could walk on the pedestrian part, but I think it's important for the plan to include a safe way for bikes to go through without dismounting.

Also, I know this isn't directly related, but I'd like to see an additional bike/pedestrian level crossing just west of the Sunnyvale train platform, basically connecting Mathilda Pl directly to the parking lot under Mathilda without having detour onto the train platform or walk up that annoying pedestrian bridge. Since there's already a level crossing on the platform it's not much more complicated from a logistical standpoint, it just requires a path and an extra set of crossing gates. And once the Sunnyvale Ave underpass is done there should be some gates left over.

July 26, 2022, 6:58 PM

### Question 1

- Commuting for work

### Question 2

- Underpass of Mary and Evelyn intersection

### Question 3

- This is the safest option.
- This has better circulation patterns for bicyclists, scooters, etc.

### Question 4

- Bicycle

### Question 5

- Car
- Transit – Caltrain
- Bicycle

### Question 6

- Yes, because I would feel safer without the train tracks

### Question 7

Of the two, the underpass is better, but would need protected bike lanes at the intersection.

The jughandle would be acceptable, but only if it includes bike-specific turn signals and infrastructure related to the proposed bike path between Evelyn and Caltrain.

I bike Evelyn almost daily between my home in Sunnyvale and my job at Moffett Field, and the intersection at Mary is already the worst part of that ride, mainly because of the lack of dedicated bike lanes and the overgrown trees in the eastbound direction forcing a merge into traffic. It's important that we use this construction opportunity to make this better for cyclists, and not worse.

### Question 8

- Getting to downtown Sunnyvale

### Question 9

- Bicycle and Pedestrian only Underpass of Sunnyvale – No cars

### Question 10

- This will best reduce noise from crossing gate bells and train horns.
- This has better circulation patterns for bicyclists, scooters, etc.
- This has better circulation patterns for pedestrians.

## Caltrain crossing options at Mary and Sunnyvale avenues

How should we change the Caltrain crossings at Mary and Sunnyvale avenues?

### Question 11

- Walking

### Question 12

- Car
- Bicycle
- Walking

### Question 13

- Yes, because the project is adding bicycle and pedestrian improvements

### Question 14

I live on Sunnyvale Ave, less than a block north of the crossing, and travel though that crossing multiple times a day, both to access downtown Sunnyvale for shopping/dining/recreation, and to commute to my job in Mountain View, so I am directly impacted by this project.

As someone who crosses the tracks regularly on foot, by bike, and in car, I am convinced that the pedestrian/bike only option is best. It would allow safe access to downtown as a pedestrian, faster than the current intersection, since waiting for trains would not be an option. Driving downtown or south of there, even from my close proximity, already takes only one or two minutes longer using Mathilda, and, according to google maps, Mathilda is already faster than Sunnyvale Ave for anyone living north of Maude accessing downtown by car. Sunnyvale Ave is already very heavily used by bicyclists and pedestrians, so the reduced traffic flow would encourage more bike/ped use, and make it safer for them. I will happily detour on Fair Oaks or Mathilda to get south of the tracks on the days I choose or need to use my car; the improvements to my [much more frequent] use as a pedestrian and cyclist, having a car-free intersection there, will be worth it.

#### Question 1

- Getting to parks, trails, or other recreation spots

#### Question 2

- I don't like either option.

#### Question 3

- This is the safest option.

#### Question 4

- Bicycle

#### Question 5

- Car

#### Question 6

## Caltrain crossing options at Mary and Sunnyvale avenues

How should we change the Caltrain crossings at Mary and Sunnyvale avenues?

- No, I would use vehicles the same amount

### Question 7

Neither option is good for cyclists unless safety enhancements are made to these designs. For the Depressed Intersection option, I'd like to see protected intersections and No Turn On Red. For the Jughandle option, there need to be protected intersections, No Turn On Red, bike/ped ramps from the future Evelyn trail down to Mary Ave, and bike-specific traffic signals for crossings at all intersections. This will make it safer and less stressful for cyclists.

### Question 8

- Getting to parks, trails, or other recreation spots

### Question 9

- Bicycle and Pedestrian only Underpass of Sunnyvale – No cars

### Question 10

- This is the safest option.

### Question 11

- Bicycle

### Question 12

- Car

### Question 13

- Yes, because I would feel safer without the train tracks

No response

#### Question 14

No response

#### Name not available

July 27, 2022, 8:46 AM

#### Question 1

- Commuting for work

#### Question 2

- I don't like either option.

#### Question 3

- Other - The traffic patterns have dramatically changes to the better (during and after COVID). We should be looking to reduce traffic rather than spending the amount of money and impact to the area by the construction.

#### Question 4

- Car

#### Question 5

- Other - None of the above. Just travel via car.

#### Question 6

- No, I would use vehicles the same amount

#### Question 7

No response

#### Question 8

### Caltrain crossing options at Mary and Sunnyvale avenues

How should we change the Caltrain crossings at Mary and Sunnyvale avenues?

- Commuting for work

#### Question 9

- I don't like either option.

#### Question 10

- Other - I don't like either option. We should look at options to reduce traffic.

#### Question 11

- Car

#### Question 12

- Other - None. Just car.

#### Question 13

- No, I would use vehicles the same amount

#### Question 14

No response

---

### Name not available

July 27, 2022, 9:31 AM

#### Question 1

- Getting to downtown Sunnyvale

#### Question 2

- I don't like either option.

#### Question 3

- This is the safest option.
- This has better circulation patterns for bicyclists, scooters, etc.
- This has better circulation patterns for pedestrians.

#### Question 4

- Car

#### Question 5

- Transit – Caltrain
- Walking

#### Question 6

- Yes, both of the above

#### Question 7

Neither option is good for cyclists unless safety enhancements are made to these designs. The intent of the designs should be to follow city policy which is to enhance bike and pedestrian access to downtown while discouraging private car use downtown. Protected intersections and No Turn On Red are important for the Depressed Intersection option. For the Jughandle option, there needs to be protected intersections, No Turn On Red, bike/ped ramps from the future Evelyn trail down to Mary Ave, and bike-specific traffic signals for crossings at all intersections. This will make it safer and less stressful for cyclists.

#### Question 8

- Getting to downtown Sunnyvale

#### Question 9

- Bicycle and Pedestrian only Underpass of Sunnyvale – No cars

#### Question 10

- This is the safest option.
- This has better circulation patterns for bicyclists, scooters, etc.
- This has better circulation patterns for pedestrians.

#### Question 11

- Car

#### Question 12

- Transit – Caltrain
- Walking

#### Question 13

- Yes, both of the above

#### Question 14

Again, prioritizing bike and pedestrian access should be the priority. Car access to downtown will choke its vibrancy!

## Caltrain crossing options at Mary and Sunnyvale avenues

How should we change the Caltrain crossings at Mary and Sunnyvale avenues?

- Bicycle and Pedestrian only Underpass of Sunnyvale – No cars

### Question 10

- This is the safest option.
- This has better circulation patterns for bicyclists, scooters, etc.
- This has better circulation patterns for pedestrians.

### Question 11

- Bicycle

### Question 12

- Car
- Transit – Caltrain

### Question 13

- Yes, both of the above

### Question 14

This is frequently stressful for me while biking especially because the signals to close the gate at the crossing behave a bit erratically. Sometimes not remaining green for more than even 10s. I also take a right turn from Sunnyvale Ave to Evelyn Ave (usually in the dark). A dedicated bike path would greatly help reduce the stress and waiting time here.

---

### Amy Hewett

inside Sunnyvale

July 27, 2022, 4:31 PM

### Question 1

- Other - It's my closest large corner intersection so I use it 4-5x weekly for all the items listed except school.

### Question 2

- I don't like either option.

### Question 3

- This option has a lower construction cost estimate.
- Other - I strongly dislike losing the Valero gas / service station that I've used for thirty years. I also do not like the option that removes the 7-11 and Kuykendall's either. These three businesses have served our neighborhood since the 70s. HUGE LOSSES

### Question 4

- Bicycle

### Question 5

- Car
- Bicycle
- Walking

### Question 6

- Yes, both of the above

### Question 7

Overall, I love the progress Sunnyvale is making but I'm going to sound like a grouchy old person wanting you off my lawn. Please forgive me in advance. I've lived in this neighborhood for 46 years so I am very confident travelling through this intersection - and find the car traffic far more problematic than the train traffic. I'm also used to / comforted by the noise. The intersection itself (which was \*just\* remodeled at the corners/crosswalks) is well separated with good signage and signals. I understand progress and change needed for growth. However, it's heartbreaking to think of losing 1-2 Sunnyvale Resident Owned Businesses (Valero, Kuykendall's) that have been around for 40 years; plus also potentially the 7-11 which is an absolute lifeline to the neighborhood. I prefer the less expensive option that saves more local businesses. Thank you for your time and understanding.

### Question 8

- Getting to parks, trails, or other recreation spots

### Question 9

- Bicycle and Pedestrian only Underpass of Sunnyvale – No cars

### Question 10

- Other - Lower cost - and also the nine potential right of way acquisitions are not listed but would logically impact many local small businesses (Hendy Auto Repair, etc.). Vehicular access can be rerouted to Fair Oaks with its new overpass and Mathilda Ave.

### Question 11

- Car

#### Question 12

- Car

#### Question 13

## Caltrain crossing options at Mary and Sunnyvale avenues

How should we change the Caltrain crossings at Mary and Sunnyvale avenues?

- No, I would use vehicles the same amount

### Question 14

Allow cars to go through to Downtown Sunnyvale on Sunnyvale Ave. I would have to drive down to Mathilda or FairOaks to cross over the overpass to head to El Camino. Then I would have to backtrack to get to Sunnyvale Ave/El Camino. This will in turn spew more carbon in the air contributing to further climate change because I would have to take the longer way around, sit in traffic with everyone else going the same way, and use more gas. It will also take away from people gaining access to Downtown from the Snail neighborhood. So sad our small town feel is becoming a concrete jungle. When is too much enough?!

## Caltrain crossing options at Mary and Sunnyvale avenues

How should we change the Caltrain crossings at Mary and Sunnyvale avenues?

### Robert Catanzaro

inside Sunnyvale

July 28, 2022, 11:48 AM

#### Question 1

- Accessing businesses and amenities close to this location

#### Question 2

- Underpass of Mary Avenue with “jug handle” connection to Evelyn Avenue

#### Question 3

- This is the safest option.
- This will best reduce noise from crossing gate bells and train horns.
- This option has a lower construction cost estimate.

#### Question 4

- Car

#### Question 5

- Transit – Caltrain
- Bicycle

#### Question 6

- Yes, both of the above

#### Question 7

With high speed rail coming it will be safer and faster for all involved

#### Question 8

- Getting to downtown Sunnyvale

#### Question 9

- Bicycle and Pedestrian only Underpass of Sunnyvale – No cars

#### Question 10

- This will best reduce noise from vehicle traffic.
- This has better circulation patterns for cars, buses, etc.
- This option has a lower construction cost estimate.

#### Question 11

- Walking

#### Question 12

- Car
- Transit – Caltrain
- Bicycle

#### Question 13

- Yes, both of the above

#### Question 14

As a resident of N. Sunnyvale Ave. we can see this option (pedestrians only) as traffic mitigation and will also reduce the temptation to use N. Sunnyvale Ave as a raceway between Evelyn and Maude, which is how it is currently used! Not to mention less traffic at/around Bishop School at Maude and N. Sunnyvale. Fair Oaks and Matilda, being two and three lanes, are more than capable to handle the additional traffic as N. Sunnyvale is only one lane between Maude and Hendy.

- Getting to downtown Mountain View

### Question 2

- Underpass of Mary Avenue with "jug handle" connection to Evelyn Avenue

### Question 3

- This option has less potential private property impacts.
- This option has less construction impacts.

- This option has a lower construction cost estimate.

### Question 4

- Car

### Question 5

- Other - I don't travel any other way thru this intersection and that wouldn't change

### Question 6

- No, I would use vehicles the same amount

### Question 7

Why do we have to pay \$100s of millions of dollars because of Caltrain changes? Why doesn't Caltrain pay for this?

### Question 8

- Accessing businesses and amenities close to this location

### Question 9

- I don't like either option.

### Question 10

- This option has less construction impacts.
- This option has a lower construction cost estimate.
- Other - Why don't we build an overpass for bikes and pedestrians or leave as is? That would be cheaper.

### Question 11

- Car

### Question 12

- Other - None

### Question 13

- No, I would use vehicles the same amount

### Question 14

The City didn't care at all when they decided to drastically increase the noise level at my house. They only wanted to do whatever Sand Hill Properties wanted. Why is there so much concern with this? Do City

## Caltrain crossing options at Mary and Sunnyvale avenues

How should we change the Caltrain crossings at Mary and Sunnyvale avenues?

Council members live in this area? My bet is that some do. They only care about themselves. They are incapable of considering the impacts of their decisions on others.

---

### Jonathan Blum

inside Sunnyvale

July 28, 2022, 9:37 PM

#### Question 1

- Accessing businesses and amenities close to this location

#### Question 2

- I don't like either option.

#### Question 3

- Other - Need improved bicycle accommodations. Options for bikes to cross the tracks are widely spaced so all crossings should be fully accessible, and safe, for bicycles.

#### Question 4

- Bicycle

#### Question 5

- Car

#### Question 6

- No, I would use vehicles the same amount

#### Question 7

Neither option is adequate for cyclists unless changes are made to enhance safety. For the Depressed Intersection option, there should be protected intersections and No Turn On Red. For the Jughandle option, there need to be protected intersections, No Turn On Red, and bike/pedestrian ramps from the future Evelyn trail down to Mary Ave.

#### Question 8

- I do not or rarely travel through here

#### Question 9

- Bicycle and Pedestrian only Underpass of Sunnyvale – No cars

#### Question 10

- This has better circulation patterns for bicyclists, scooters, etc.

#### Question 11

- I do not travel through this crossing

#### Question 12

No response

#### Question 13

- No, I would use vehicles the same amount

#### Question 14

In the Underpass Tunnel option, the green lines indicating bike routes disappear from the plan at the tunnel. I don't think new crossings should lack bicycle accommodations. By the time this is built, commuting by e-bike will be very popular. If there are safe bicycle routes, I think this plan is OK.

### Question 4

- Car

### Question 5

- Transit – Caltrain
- Bicycle
- Walking

### Question 6

- No, I would use vehicles the same amount

### Question 7

I believe that underpass is the best option in terms of traffic congestion and the least impact to the current neighborhood.

### Caltrain crossing options at Mary and Sunnyvale avenues

How should we change the Caltrain crossings at Mary and Sunnyvale avenues?

#### Question 8

- Accessing businesses and amenities close to this location

#### Question 9

- Underpass Tunnel of Sunnyvale Avenue underneath Evelyn Ave, Caltrain tracks, and Hendy Ave

#### Question 10

- This has better circulation patterns for cars, buses, etc.
- This option has less potential private property impacts.
- Other - Will not impact level of traffic during commute times on Fair Oaks and Sunnyvale-Saratoga. Without Sunnyvale Ave access traffic will definitely increase on those two thoroughfares

#### Question 11

- Car

#### Question 12

- Car
- Transit – Caltrain
- Bicycle
- Walking

#### Question 13

- No, I would use vehicles the same amount

#### Question 14

Traffic on Fair Oaks during commute and non-commute hours is usually very heavy, even prior to the construction on the Fair Oaks overpass. Sometimes I have to wait up to 5 minutes before I can exit my street. Fair Oaks is not patrolled and cars are constantly speeding and blocking the road. I'm extremely concerned that the traffic will become more congested and extreme if Sunnyvale Ave were to be closed to car traffic.

- Walking

#### Question 13

## Caltrain crossing options at Mary and Sunnyvale avenues

How should we change the Caltrain crossings at Mary and Sunnyvale avenues?

- Yes, both of the above

### Question 14

Invest now for our long-term success.

---

### Name not available

July 29, 2022, 2:04 PM

#### Question 1

- Commuting for work

#### Question 2

- I don't like either option.

#### Question 3

- This option has less potential private property impacts.
- This option has less construction impacts.
- Other - You're going to eliminate the best place to get propane and take away property from an established local business

#### Question 4

- Car

#### Question 5

- Bicycle
- Walking

#### Question 6

- No, I would use vehicles the same amount

#### Question 7

If you're going to go ahead with this, then use the jug handle

#### Question 8

- Commuting for work

#### Question 9

- Underpass Tunnel of Sunnyvale Avenue underneath Evelyn Ave, Caltrain tracks, and Hendy Ave

#### Question 10

- This has better circulation patterns for cars, buses, etc.
- This has better circulation patterns for bicyclists, scooters, etc.

#### Question 11

- Car

#### Question 12

- Bicycle
- Walking

#### Question 13

- No, I would use vehicles the same amount

#### Question 14

Both options will have a severe impact on adjacent neighborhoods as people will use them as a path between Sunnyvale and Evelyn

---

### Name not available

July 29, 2022, 2:53 PM

#### Question 1

- Getting to downtown Mountain View

#### Question 2

- Underpass of Mary Avenue with "jug handle" connection to Evelyn Avenue

#### Question 3

- This option has less potential private property impacts.
- This option has less construction impacts.
- This option has a lower construction cost estimate.

#### Question 4

- Car

#### Question 5

- Bicycle

#### Question 6

### Caltrain crossing options at Mary and Sunnyvale avenues

How should we change the Caltrain crossings at Mary and Sunnyvale avenues?

- No, I would use vehicles the same amount

#### Question 7

No response

#### Question 8

- Other - All the above I live on N Sunnyvale Ave and use this crossing and Mathilda Ave to get in and out of my neighborhood

#### Question 9

- I don't like either option.

#### Question 10

- Other - Neither option works if u R a resident in the neighborhood north of the RR tracks, Evelyn and Hendy. This will increase car traffic on California Avenue as drivers still need to go South to get to El Camino and beyond. Traffic heavy on CA Ave now.

#### Question 11

- Car

#### Question 12

- Bicycle
- Walking

#### Question 13

- No, I would use vehicles the same amount

#### Question 14

What about an overpass like the ones on Fair Oaks and Wolfe.

July 29, 2022, 2:55 PM

#### Question 1

- Commuting for work

#### Question 2

- Underpass of Mary Avenue with "jug handle" connection to Evelyn Avenue

#### Question 3

- This option has less potential private property impacts.
- This option has a lower construction cost estimate.
- Other - I mainly use Evelyn and this would not impact my route. I do not often use Mary Ave.

#### Question 4

- Car

#### Question 5

- Bicycle

#### Question 6

- No, I would use vehicles the same amount

#### Question 7

I understand the proposed change for the Mary intersection as that is a very large area and more traffic.

\*\*\*\*\*However the Sunnyvale Ave x Evelyn intersection is small and traffic does not back up during the many times each day that I pass through. I regard this intersection for providing a small town feel to Sunnyvale. I do not feel that Sunnyvale X Evelyn warrants such reconstruction.

\*\*\* I highly recommend that ANYONE on the board that will be making the final decision, should make MANY visits to each of these intersections and sit for awhile watching the traffic and empathizing with the people who actually use these intersections.

#### Question 8

- Getting to downtown Sunnyvale

#### Question 9

- Underpass Tunnel of Sunnyvale Avenue underneath Evelyn Ave, Caltrain tracks, and Hendy Ave

#### Question 10

- This has better circulation patterns for cars, buses, etc.
- Other - Through traffic on Sunnyvale Ave is important!!!

July 29, 2022, 5:51 PM

### Question 1

- Getting to downtown Mountain View

### Question 2

- Underpass of Mary Avenue with "jug handle" connection to Evelyn Avenue

### Question 3

- This option has less construction impacts.
- This option has a lower construction cost estimate.

### Question 4

- Bicycle

### Question 5

- Car
- Transit – Caltrain

### Question 6

- Yes, because the project is adding bicycle and pedestrian improvements

### Question 7

If the jughandle option is selected, it's important that cyclists be able to access Evelyn from the undercrossing without using the jughandle.

### Question 8

- Getting to downtown Sunnyvale

### Question 9

## Caltrain crossing options at Mary and Sunnyvale avenues

How should we change the Caltrain crossings at Mary and Sunnyvale avenues?

- Bicycle and Pedestrian only Underpass of Sunnyvale – No cars

### Question 10

- This is the safest option.
- This has better circulation patterns for cars, buses, etc.
- This option has a lower construction cost estimate.

### Question 11

- Bicycle

### Question 12

- Car
- Transit – Caltrain

### Question 13

- Yes, because the project is adding bicycle and pedestrian improvements

### Question 14

The car tunnel is not a good idea. It will cause serious damage to the downtown street grid, sever the eastern portion of the downtown from the rest of the BID, be far less safe for cyclists and pedestrians, and worst of all, it's much more expensive. Do the bicycle/pedestrian underpass only.

## Caltrain crossing options at Mary and Sunnyvale avenues

How should we change the Caltrain crossings at Mary and Sunnyvale avenues?

July 29, 2022, 8:23 PM

### Question 1

- Commuting for work

### Question 2

- I don't like either option.

### Question 3

- Other - See note below

### Question 4

- Bicycle

### Question 5

- Car
- Transit – Caltrain
- Walking

### Question 6

- Yes, both of the above

### Question 7

Neither option is good for cyclists unless safety enhancements are made to these designs. For the Depressed Intersection option, I'd like to see protected intersections and No Turn On Red. For the Jughandle option, there needs to be protected intersections, No Turn On Red, bike/ped ramps from the future Evelyn trail down to Mary Ave, and bike-specific traffic signals for crossings at all intersections. This will make it safer and less stressful for cyclists.

### Question 8

- Accessing businesses and amenities close to this location

### Question 9

- Bicycle and Pedestrian only Underpass of Sunnyvale – No cars

### Question 10

- This is the safest option.
- This has better circulation patterns for bicyclists, scooters, etc.
- This has better circulation patterns for pedestrians.

## James Keller

inside Sunnyvale

July 31, 2022, 1:28 PM

### Question 1

- Accessing businesses and amenities close to this location

### Question 2

- I don't like either option.

### Question 3

- This is the safest option.

- This option has a lower construction cost estimate.
- Other - Put the train underground. BART built 1 mile underground in Fremont for \$125M. Same distance as Mary to Sunnyvale Ave. We can use the top for a park! Level crossing for bikes. No train noise. Less construction/property impact.

### Question 4

- Car

### Question 5

- Bicycle
- Transit – Caltrain

### Question 6

- No, I would use vehicles more often

### Question 7

Have they looked at separating the tracks instead of the roads? It's one track mile from Sunnyvale Ave to Mary Ave. BART built a one mile, 2 track tunnel "under" Lake Elizabeth for \$125M. Looks to me like a train subway would cost less than either proposed project, and solve both crossing problems, and give us a park! With the train underground, the grade level railroad right of way can be repurposed. It is a one mile long corridor 75 feet wide would make a very nice downtown park. With land around here going for \$10M/acre, that's a \$90M benefit to the community.

I briefly looked at RR grade requirements. SPRR's freight requirement is the strictest, allowing a 1% grade. US rail tunnel heights vary, the tallest I could find is 24 feet. For argument, assume we need to lower the railbed 30 feet to allow for a 24 foot tall tunnel plus 6 feet (guess) for the cover structure. At 1% grade, that would stretch the project 3000 feet on each end, roughly to the N. Fair Oaks Ave overcrossing on the south end, and near the 237 overcrossing on the north end.

I'm not in construction, but 3 existing tracks fit in that 75 foot easement parallel to Hendy Ave, and there's 4 tracks in an 80 foot easement near Wolfe Ave. So maybe both tracks can be lowered while keeping two tracks operating. If not, the two existing Caltrain/UPRR tracks could be lowered one at a time, using the current easement for 2 operating tracks plus space to construct the third. There's no other at grade road crossings or expensive looking infrastructure. At downtown is the Caltrain "station," a simple concrete platform. Construction would go under the existing Fair Oaks Ave overcrossing. Also at the south end is a short section with 4 existing tracks. If the RR companies need the entire length of the 4 track section, there is space in the rail easement near Bowers Ave where the 4 tracks merge to two. The entire 4 track section could be shifted south during construction.

## Caltrain crossing options at Mary and Sunnyvale avenues

How should we change the Caltrain crossings at Mary and Sunnyvale avenues?

Benefits: Cheaper. Less construction disruption. Less disruption afterwards. Maintain level roads, much friendlier for cycling. Improved traffic flow with no rail gates. Safer. Space for a park (or other use). Less train noise.

Note on the city's proposed under-crossings and bikes: flat roads are much better for cycling than the artificial hills created by under-crossings. Under-crossings also make the car exhaust problem worse by containing it.

### Question 8

- Accessing businesses and amenities close to this location

### Question 9

- I don't like either option.

### Question 10

- This is the safest option.
- This option has a lower construction cost estimate.
- Other - See my Mary Ave response. Combine the projects. Put the tracks underground. It's one mile. BART put 1 mile underground in Fremont for \$125M. Cheaper! Safer! 9 acres new open space! Quiet!

### Question 11

- Bicycle

### Question 12

- Car
- Transit – Caltrain
- Walking

### Question 13

- No, I would use vehicles more often

### Question 14

Copying my Mary Ave comments. We should combine the problems into one project - put the train in a subway.

Have we looked at separating the tracks instead of the roads? It's one track mile from Sunnyvale Ave to Mary Ave. BART built a one mile, 2 track tunnel "under" Lake Elizabeth for \$125M. Looks to me like a train subway would cost less than either proposed project, and solve both crossing problems, and give us a park! With the train underground, the grade level railroad right of way can be repurposed..It is a one mile long corridor 75 feet wide would make a very nice downtown park. With land around here

going for \$10M/acre, that's a \$90M benefit to the community.

I briefly looked at RR grade requirements. SPRR's freight requirement is the strictest, allowing a 1% grade. Looks like rail tunnel heights vary, the tallest I could find is 24 feet. For argument, assume we need to lower the railbed 30 feet to allow for a 24 foot tall tunnel plus 6 feet (guess) for the cover structure. At 1% grade, that would stretch the project 3000 feet on each end, roughly to the N. Fair Oaks Ave overcrossing on the south end, and near the 237 overcrossing on the north end.

I'm not in construction, but 3 existing tracks fit in that 75 foot easement parallel to Hendy Ave, and there's 4 tracks in an 80 foot easement near Wolfe Ave. So maybe both tracks can be lowered at once. If not, the two existing Caltrain/UPRR tracks could be lowered one at a time, using the current easement for 2 tracks plus space to construct one subway track at a time. There's no other at grade road crossings or expensive looking infrastructure. Downtown is the Caltrain "station," a simple concrete platform. Construction would go under the existing Fair Oaks Ave overcrossing. Also at the south end is a short section with 4 existing tracks. If the RR companies need the entire length of the 4 track section, there is space in the rail easement near Bowers Ave where the 4 tracks merge to two. The entire 4 track section could be shifted south during construction.

Benefits: Cheaper. Less construction disruption. Less disruption afterwards. Maintain level roads, much friendlier for cycling. Improved traffic flow with no rail gates. Safer. Space for a park (or other use). Less train noise.

## Caltrain crossing options at Mary and Sunnyvale avenues

How should we change the Caltrain crossings at Mary and Sunnyvale avenues?

### Question 12

- Transit – Caltrain
- Bicycle
- Walking

### Question 13

- No, I would use vehicles the same amount

### Question 14

My main issue with the Pedestrian/Bicycle option is that blocking off Sunnyvale Ave car access would divert traffic to California Ave (cutting over to either Fair Oaks or Mathilda). This stretch of California Ave is already way too busy as it is - it is a residential area with a lot of traffic, with the Central Expressway connection for cars as well as bicycles & pedestrians traveling down Frances to access the Caltrain station. Between Sunnyvale Ave and Mathilda, there is not a single crosswalk or any method of car traffic control (stop signs, speed tables/humps) and the road is so narrow that there is no bike lane at all, making biking feel unsafe.

The speed limit on Cal Ave is 25 (from Fair Oaks to Sunnyvale Ave to Mathilda to Mary) and people drive MUCH faster on all those stretches. It is already difficult and unsafe to cross California Ave at Frances or to cross any direction at the three-way intersection where San Anselmo connects to Central.

California Ave at least feels safer to walk/bike between Fair Oaks & Sunnyvale and between Mathilda & Mary - the street is much wider, there is an all-way stop at California & Sobrante (the connection to Central Expwy South on the other side of Mathilda), a somewhat decent crosswalk at Northrop Grumman. If the Pedestrian/Bicycle Underpass option is chosen, I would strongly urge the addition of safety measures on California Ave and consideration of the effect that increased traffic through this residential area might have.
