ATTN: Shetal Divatia,

STOP CAFÉ

Stop Café's hours will be from 6 am. to 12 pm. The business plan for the Stop Café will focus on breakfast and late evening dinner. Breakfast will be served all day featuring specialty coffees and baked goods. The menu will also offer gourmet salads and juices. Take out service will be a large portion of Stop Café's business plan. Stop Café is targeting a health conscious clientele by offering the highest quality organic foods with the freshest ingredients.

Stop Café is targeting the high tech business community. It is essential for business development that Stop Café be able to offer the adult customers beer and wine. Beer and wine will be kept in the back of the restaurant. Stop Café has no design on providing a conventional bar business and is only offering beer and wine to compliment the menu for late evening adult customers.

The previous business, Dairy Belle, was attractive to a younger crowd due to the type of menu, burger, fries and shakes. The large open patio in the front of the business allowed high school students a place to hang out and meet friends. Stop Café is targeting an older crowd with a building layout that provides a much more intimate surrounding. The proposed patio enclosure would provide this type of atmosphere and eliminate the open area where the younger crowd could hang out and meet friends. Access to the patio space will only be allowed from the two sides only. The open space by the side walk will be closed off.

The new floor plan for Stop Café will incorporate a new accessible unisex restroom which will be accessible from the outside only. The exterior access is necessary due to the small interior space available inside. The restroom will be monitored from inside by keeping the restroom locked and only accessible to customers by using a key provided by staff. The exterior plan is to provide new lighting to the parking lot and restroom area to promote a safe environment.

Good Morning Andy

In an effort to get the SDP approved for the awning, I will take the beer and wine off the application. I also propose to board off the wood storage on two sides by installing two landscaping strips. By proposing the new landscaping we would like to remove the tree wells.

Thank You

Jonathan <
