SECTION 9.02 WATER AND SEWER CONNECTION FEES

Pursuant to Section 66001 of the Government Code, the City Council hereby determines:

- (1) The purpose of the water and sewer connection charges is to assure payment by developers of their pro rata share of the escalated cost of the City's water and sanitary sewer system.
- (2) The charge will be used to reimburse the City for the owner or developer's fair share of the use of the water system and sanitary sewer systems.
- (3) There is a reasonable relationship between the use of the fees, the need for a water system, a wastewater treatment plant, and the types of development projects upon which the fee is imposed. All development projects create varying needs for the consumption of water which cannot be fulfilled unless the project is connected to the municipal water system to assure an adequate supply of water to each project. Plus, each project creates a need for sewage conveyance, disposal and treatment. The degree to which each project is charged is based upon factors related to the degree of potential usage, such as: type and size of projects, number of units, and calculations of the escalated cost of the City's sanitary sewer system; the current system capacity; the cost of conveyance, treatment and disposal per equivalent single-family dwelling unit; and the estimated daily discharge for each facility to be connected to the sanitary sewer system, taking into account proportionate average daily discharge of sewage, total organic carbon, sewage, suspended solids, and ammonia nitrogen. The fees or charges shall be collected from the owner or developer of property either (1) prior to approval of the original connection of the property to the water or sanitary sewer system, or a redevelopment with incremental impact, or (2) in the event the uses being made of the property presently connected to the system are enlarged, added to, or further structures are constructed on the property.

A. Water Connection Fees.

The following definitions shall be used for the purpose of determining the connection fee in this section:

- (a) A residential "unit" shall mean one or more rooms used for living purposes by one family.
- (b) A commercial, industrial, or institutional "unit" shall mean each one hundred (100) gallons of expected daily water demand, commercial, industrial, or institutional purposes.
- (c) "Institutional property" shall mean property used only for the erection and maintenance of church, school, hospital, or public buildings.
- (d) Hotels shall be classified as low occupancy units per room

The connection fee to be paid for each parcel or property served through the same water lateral by the owner or developer of residential, commercial, industrial, or industrial property shall be computed as follows:

<u>Residential Units</u>	<u>\$6,000.00</u>	<u>\$6,180.00</u>	799918	3050	Water Connection Fees
