Dear Sunnyvale Planning Commission,

The California Housing Defense Fund (“CalHDF”) submits this letter to remind the City of its obligation to abide by all relevant state laws when evaluating the proposed 172-unit housing development project at 1171 Sonora Court, which includes 136 low income units, and 34 moderate-income units. These laws include the Housing Accountability Act (“HAA”), the Density Bonus Law (“DBL”), AB 130, and California Environmental Quality Act (“CEQA”) guidelines.

The HAA provides the project legal protections. It requires approval of zoning and general plan compliant housing development projects unless findings can be made regarding specific, objective, written health and safety hazards. (Gov. Code, § 65589.5, subds. (d), (j).) The HAA also bars cities from imposing conditions on the approval of such projects that would render the project infeasible (*id.* at subd. (d)) or reduce the project’s density (*id.* at subd. (j)) unless, again, such written findings are made. As a development with at least two-thirds of its area devoted to residential uses, the project falls within the HAA’s ambit, and it complies with local zoning code and the City’s general plan. Increased density, concessions, and waivers that a project is entitled to under the DBL (Gov. Code, § 65915) do not render the project noncompliant with the zoning code or general plan, for purposes of the HAA (Gov. Code, § 65589.5, subd. (j)(3)). The HAA’s protections therefore apply, and the City may not reject the project except based on health and safety standards, as outlined above. Furthermore, if the City rejects the project or impairs its feasibility, it must conduct “a

www.calhdf.org**

thorough analysis of the economic, social, and environmental effects of the action.” (*Id.* at subd. (b).)

CalHDF also writes to emphasize that the DBL offers the proposed development certain protections. The City must respect these protections. In addition to granting the increase in residential units allowed by the DBL, the City must not deny the project the proposed waivers and concessions for ground floor plate height, roof form-flat roof variation, roof form-cornice detail, individual lockable storage, street setback, and division of building length. If the City wishes to deny requested waivers, Government Code section 65915, subdivision (e)(1) requires findings that the waivers would have a specific, adverse impact upon health or safety, and for which there is no feasible method to satisfactorily mitigate or avoid the specific adverse impact. If the City wishes to deny requested concessions, Government Code section 65915, subdivision (d)(1) requires findings that the concessions would not result in identifiable and actual cost reductions, that the concessions would have a specific, adverse impact on public health or safety, or that the concessions are contrary to state or federal law. The City, if it makes any such findings, bears the burden of proof. (Gov. Code, § 65915, subd. (d)(4).) Additionally, the California Court of Appeal has ruled that when an applicant has requested one or more waivers and/or concessions pursuant to the DBL, the City “may not apply any development standard that would physically preclude construction of that project as designed, even if the building includes ‘amenities’ beyond the bare minimum of building components.” (*Bankers Hill 150 v. City of San Diego* (2022) 74 Cal.App.5th 755, 775.)

Furthermore, the project may be eligible for a statutory exemption from CEQA review pursuant to either the Class 32 Infill Exemption (section 15332 of the CEQA guidelines) or AB 130 (Pub. Res. Code, § 21080.66), which was signed into law on June 30, 2025 and effective immediately (Assembly Bill No. 130, 2025-2026 Regular Session, Sec. 74, available [here](#)). Caselaw from the California Court of Appeal affirms that local governments err, and may be sued, when they improperly refuse to grant a project a CEQA exemption or streamlined CEQA review to which it is entitled. (*Hilltop Group, Inc. v. County of San Diego* (2024) 99 Cal.App.5th 890, 911.)

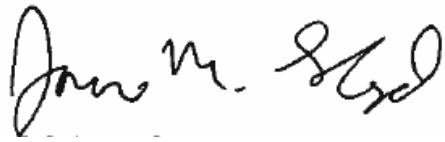

As you are well aware, California remains in the throes of a statewide crisis-level housing shortage. New housing such as this is a public benefit: by providing affordable housing, it will mitigate the state’s homelessness crisis; it will bring new customers to local businesses; and it will reduce displacement of existing residents by reducing competition for existing housing. It will also help cut down on transportation-related greenhouse gas emissions by providing housing in denser, more urban areas, as opposed to farther-flung regions in the state (and out of state). While no one project will solve the statewide housing crisis, the proposed development is a step in the right direction. CalHDF urges the City to approve it, consistent with its obligations under state law.

CalHDF is a 501(c)(3) non-profit corporation whose mission includes advocating for increased access to housing for Californians at all income levels, including low-income households. You may learn more about CalHDF at www.calhdf.org.
