REQUIRED FORM 10 – ENVIRONMENTAL PURCHASING RESPONSES

RFP # 269-2019-105

FURNITURE, INSTALLATION AND RELATED PRODUCTS AND SERVICES

Companies shall complete and submit the form below regarding the products or supplies required to perform the Services.

Question	Response
<p><u>Recycled Content.</u> Products must contain a certain percentage of recycled content. Please include the amount of recycled content, both pre- and post-consumer, included in your product.</p>	<p>Herman Miller’s Design for Environment protocol focuses on maintaining our high standards while incorporating increasingly more environmentally sustainable materials into our new product designs. Our goal is to maximize the amount of recycled content and recyclability of a product at the end of its useful life.</p> <p>For more information on recycled content for products, please refer to please refer to the “Environmental Calculator” (ecomedes) on our website: hermanmiller.ecomedes.com.</p>
<p><u>Recyclability.</u> Please include the types of materials included in your product, and if they are considered recyclable in typical municipal recycling streams.</p>	<p>For recyclability percentages of specific products, please refer to please refer to the “Environmental Calculator” (ecomedes) on our website: hermanmiller.ecomedes.com.</p>
<p><u>Biodegradability.</u> Products must be capable of decomposing under natural conditions. Please state whether each Product offered in your proposal is biodegradable.</p>	<p>Our products are not biodegradable.</p>
<p><u>Compostability.</u> Products must be capable of composting at a commercial composting facility. Please state whether each product offered in your proposal is compostable.</p>	<p>Not Applicable to our products.</p> <p>For many years, we have reported to the EPA WasteWise program with a focus on diverting materials from a landfill----including composting. Our most current 2019 reporting indicated 387.75 tons (775,504 pounds) of material composted. This includes paper towels from bathrooms along with utensils/plates/food waste from our on-site cafeterias.</p>
<p><u>Energy Consumption.</u> Please include the total amount of energy consumed for product or service manufacture, use and disposal. Different sources of energy are associated with different environmental impacts.</p>	<p>We use processes that eliminate waste from our facilities, borrow the water we need and manage it well, reduce energy intensity, and use renewable forms of energy.</p> <p>In FY2017, Herman Miller consumed 96,600 Megawatt hours or \$42.2 Megawatt hours/\$ million sales</p>

<p><u>Energy Efficiency.</u> Products must meet or exceed the Department of Energy (DOE) and Environmental Protection Agency criteria for use of the ENERGY STAR trademark label; or is in the upper 25% of efficiency for all similar products as designated by the U.S. Department of Energy’s Federal Energy Management Program.</p>	<p>Not Applicable to our products.</p>
<p><u>Water Efficiency.</u> Eligible products must meet or exceed the Environmental Protection Agency’s WaterSense program or be water-efficient or low-flow fixtures.</p>	<p>Not Applicable to our products.</p>
<p><u>Low VOCs.</u> Products should contain low or no volatile organic compounds (VOCs). Please indicate any VOC content in each applicable product offered in your proposal.</p>	<p>For VOC content information of specific products, please refer to please refer to the “Environmental Calculator” (ecomedes) on our website: hermanmiller.ecomedes.com.</p>
<p><u>Reduced Packaging.</u> Please include any efforts made to reduce the packaging of the products included in this proposal.</p>	<p>Larger scale domestic orders allow the use of minimal packaging, such as bulk packaging and blanket wrapping. Bulk packaging examples include stretch wrapping up to 40 worksurfaces or screens to a pallet, thus eliminating an individual box and multiple pieces of protective foam for each product. Another common bulk pack example includes placing up to 48 pieces of cladding in a single box with pallet truck access and a “zip-line” opening to allow easy access at the point of delivery.</p> <p>Blanket wrapping typically involves seating and metal storage products. In this scenario we wrap products in reusable blankets and ship them directly from the plant to the installation site. The transit company brings the blankets back to Herman Miller for a closed-loop packaging reuse system. Bulk packaging and blanket wrapping not only eliminate the need for corrugated boxes, foams and plastics, but typically increase unloading time by 25% or more, with similar savings in disposal reduction and transit efficiency.</p>
<p><u>Pollution Prevention.</u> Please state your company’s policy on source reduction. The Pollution Prevention Act defines source reduction to mean any practice that: (1) Reduces the amount of any hazardous substance, pollutant or contaminant entering any waste stream or</p>	<p>Herman Miller Safety and Sustainability Policy At Herman Miller, we approach safety and sustainability two ways.</p> <p>From the top down, we set goals for safety and sustainability and make performance to these goals part of our CEO’s scorecard.</p>

<p>otherwise released into the environment (including fugitive emissions) prior to recycling, treatment or disposal, and (2) Reduces the hazards to public health and the environment associated with the release of such substances, pollutants or contaminants. The term includes: equipment or technology modifications, process or procedure modifications, reformulation or redesign of products, substitution of raw materials, and improvements in housekeeping, maintenance, training or inventory control.</p>	<p>From the bottom up, we empower people with a passion for wellness and responsibility to lead by example and through organized programs.</p> <p>These approaches meet in the middle, always striving to improve through commitments to:</p> <p>Living, Working, and Being Safe Promoting safety knowledge, well-being both at work and at home, and the prevention of injuries and ill health.</p> <p>Being Resource Smart Acting on the prevention of pollution, the elimination of all forms of waste, and the efficient use of all resources.</p> <p>Being Eco Inspired Advocating for better, more sustainable products with safer material chemistry.</p> <p>Being Community Driven Sharing best practices with all stakeholders and going beyond compliance with regulations and other requirements.</p>
<p><u>Life Cycle Management.</u> Please state how many times your product may be reused. (Since reusable products generally require more upfront costs than disposable products, they are often subjected to a cost/benefit analysis in order to determine the life cycle cost).</p>	<p>As part of our Design for the Environment process, life cycle impacts are considered when making material choices. Additionally, full life cycle assessments (LCAs) have been conducted for major product categories/product lines.</p> <p>Herman Miller has been using LCAs since 2006 to identify the potential environmental impacts of our products. We perform life cycle analysis specifically according to ISO documents 14040 and 14044 and we conform to the most recent respective Product Category Rules for Environmental Product Declarations (EPDs). EPDs are now available for the majority of our performance seating products.</p>
<p><u>End of Life Management.</u> Will the manufacturer or designee accept the product back at the end-of-life? (who pays for the transportation of the product may be situation-specific).</p>	<p>The Herman Miller rePurpose program is an industry-leading resource for managing surplus corporate assets, including furniture, equipment, and supplies. By employing a thoughtful combination of resale, recycling, and donation on each project, rePurpose ensures assets reach their best destination. The rePurpose program is a single-source approach, which saves time and money, eliminates liability, and keeps 99 percent of product out of landfills. Fees for rePurpose vary based on size and scope.</p>
