SCOPE OF THE STUDY

What precipitated this study?

The City's study issue process provides a method for identifying, prioritizing, and analyzing policy issues important to the community. It provides a structured approach for addressing the large number of issues that are raised each year, allowing Council to rank the issues, and set priorities within the limits of time and resources. It also allows staff to balance the work required to thoroughly study an issue such as a new program or policy with the work required to continue delivering high quality ongoing City services. According to the current Study Issues Process policy (7.3.26), any substantive policy change (large or relatively small) is subject to the study issues process. Policy related issues include such items as proposed ordinances, new or expanded service delivery programs, changes to existing Council policy, and/or amendments to the General Plan

At the January 25, 2024 Council Strategic Workshop, Councilmember Mehlinger sponsored a study issue related to improving innovation and agility in the City's study issue process.

What are the key elements of the study?

This Study would evaluate the current Study Issues Process for improved efficiencies.

Additionally, the Study may include:

- Identifying potential changes to the Study Issues Process policy, including changes in sponsorship, selection, deadlines, and ranking method.
- Identifying potential changes in staffing levels to support a defined process.
- Identifying potential system changes to track a Study.
- Identifying strengths and weakness in the current process.
- Developing criteria for a Study, triggers that would determine when a Study is required.
- Identifying alternative processes for when a Study is not required.
