We prefer blanket wrapping as the most environmentally and economically friendly option, but if that is not possible, the KD or partially assembled box is going to be significantly smaller than what most other manufacturers are able to achieve with their cartons. Exemplis is committed to environmental leadership. We are dedicated to improving our environmental performance and to reducing water, air, land and health impacts. Our approach includes implementation of pollution prevention measures and continuous improvement; as well as compliance with all local, state, and national environmental regulations at a minimum.

recycling, treatment or disposal, and (2) Reduces the hazards to public health and the environment associated with the release of such substances, pollutants or contaminants. The term includes: equipment or technology modifications, process or procedure modifications, reformulation or redesign of products, substitution of raw materials, and improvements in housekeeping, maintenance, training or inventory control.

During assembly, our team uses environmentallyfriendly water-based adhesives. Our precision design and state-of-the-art cutting machines minimize waste during production.

Each month, we collect material waste like leather and fabric scraps, plastic drums, carboard and metal and recycle them at local recycling centers.

We are committed to reducing the human and ecosystem health impacts of our products and processes through regularly evaluating our chemical management and hazard communication plans. We will continuously evaluate and monitor the chemicals used in our facility and maintain current Safety Data Sheets through an electronic filing system. Using this process, we will build a chemical inventory system to identify and track all existing chemicals within and leaving our facility, as well as all future purchased chemicals that are not currently in our system.

Reducing the environmental impacts of our products begins with our new product development process. All new products or major design modifications on existing products go through our Design for Environment process, which seeks to incorporate energy and water efficiency, renewable, recycled, recyclable and biodegradable materials and to account for end-of-life impacts.

Life Cycle Management.

Please state how many times your product may be reused. (Since reusable products generally require more upfront costs than disposable products, they are often subjected to a cost/benefit analysis to determine the life cycle cost).

Exemplis LLC's products are brand new, custom built-to-order. Our lifetime warranty (excluding any exceptions) provides multi-year coverage for our products which encourages our customers to maximize its use over a period of time.

End of Life Management.

Will the manufacturer or designee accept the product back at the end-of-life? (who pays for the transportation of the product may be situation-specific). Exemplis LLC offers the Take-Back Program to minimize product waste and make environmental responsibility easy for our customers. To honor this, we have partnered with the nonprofit environmental organization ANEW to offer a return program for surplus product—regardless of condition.
