Document Type: Site Screening
Date Completed: 4/30/1990
Comments: ON CORTESE LIST SAMPLE RESULTS SOIL: TCE (8500 PPB), PCE (130), AND 200,000 PPB OF TCE AT THE ONSITE GROUND- WATER. SITE IS CURRENTLY VACANT AND FORMERLY WAS USED AS A FACILITY FOR ELECTRONIC INDUSTRY. EXCAVATION WAS CONDUCTED TO INVESTIGATE BURIED PIPES, LOCATION AND THEIR CONDI- TION, AND THE SOIL IN THE SITE VICINITY OF THOSE PIPES. SITE SCREENING DONE RECOMMEND PEA (HIGH PRIORITY). A SIGNIF- ICANT LEVEL OF SEVERAL CONTAMINANTS ARE PRESENT AT THE ON-SITE SOIL AND GROUND WATER. ADDITIONAL INVESTIGATION IS NECESSARY.

Site History:

A Phase I Environmental site Assessment determined that the site had been occupied by a gasoline service station from at least 1963 until at least 1974. No documentation was found that indicated the removal of the fuel or waste oil USTs or of the removal of any sumps related to the auto service facility. The property is currently developed with an office building. In August 2007, 3 borings (B1 through B3) were advanced downgradient of the former pump island and former USTs and station building, which were located based on historical aerial photographs. Grab groundwater samples were reported to have maximum concentrations of 3,700 ppb TPHg, 550 ppb TPHd, 47 ppb Toluene. In August 2009, 3 monitoring wells (MW1 through MW3) were installed onsite. Soil samples only reported one detection of 12 ppm TPHd, all other constituents were not reported to be present above the laboratory reporting limits.

Cleanup Oversight Agencies:	SANTA CLARA COUNTY LOP (LEAD) - CASE #: 06S1W29D03f SAN FRANCISCO BAY RWQCB (REGION 2) - CASE #: 14-782 CASE MANAGER: Regional Water Board
CUF Claim No:	
CUF Priority Assig:	
CUF Amount Paid:	
WDR Place Type:	
WDR File No:	
WDR Order No:	
Project Oversight Agencies:	
Facility Type:	
Composting Method:	
Grndwtr Monitoring Frequency:	
Designated Beneficial Use Desc:	Municipal and Domestic Supply, Agricultural Supply, Industrial Service Supply, Industrial Process Supply
Site History:	

A Phase I Environmental site Assessment determined that the site had been occupied by a gasoline service station from at least 1963 until at least 1974. No documentation was found that indicated the removal of the fuel or waste oil USTs or of the removal of any sumps related to the auto service facility. The property is currently developed with an office building.

In August 2007, 3 borings (B1 through B3) were advanced downgradient of the former pump island and former USTs and station building, which were located based on historical aerial photographs. Grab groundwater samples were reported to have maximum concentrations of 3,700 ppb TPHg, 550 ppb TPHd, 47 ppb Toluene.

In August 2009, 3 monitoring wells (MW1 through MW3) were installed onsite. Soil samples only reported one detection of 12 ppm TPHd, all other constituents were not reported to be present above the laboratory reporting limits.

Site History:

Background: The site is located at 1077 East Arques Avenue near Lawrence Expressway in eastern Sunnyvale (see site location map). Land use in the area is predominantly commercial and light industrial. The Site is 15.8 acres. CAE-Link (now CAE USA, Inc.) and several predecessor companies including TransTechnology Corporation operated an electronics manufacturing facility at the site from approximately 1967 to 1992. Volatile organic compounds (VOCs) and two sumps were used in manufacturing operations at the site. The property is currently owned by the Wise Trusts and is leased to Fry's Electronics, which operates a retail electronics store. In February 2007, TransTechnology Corporation became Breeze-Eastern Corporation. The primary responsible parties are CAE USA, Inc. and Breeze-Eastern Corporation. The site is currently owned by the Wise Trusts and is leased to Fry's Electronics, which operates a retail electronics store. The Regional Water Quality Control Board (Water Board) is the lead agency overseeing soil and groundwater investigation and cleanup activities at this site under Stewart Drive Operable Unit (SDOU) Subunit 3 Order 99-098 and Subunit 4 Order 99-099. Subunit 3 is former location of CAE and currently Fry's Electronics retail. Site Investigation: In 1993, CAE-Link discovered evidence of VOCs in soil and groundwater near the northeast corner of the building located at the site. Identified VOCs include: tetrachloroethene (PCE), trichloroethene (TCE), and cis-1,2,-dichloroethene (cis-1,2-DCE). CAE-Link performed additional investigations to characterize the extent of VOCs in groundwater. The current maximum concentration of PCE, TCE and cis-1,2-DCE in shallow groundwater beneath the site are 14 micrograms per liter (µg/L), 460 µg/L and 240 µg/L, respectively. These concentrations exceed drinking water standards. There are several other sites in the vicinity where soil and/or groundwater have also been impacted by VOCs. The VOC groundwater plumes from some of these sites have commingled with the site VOC plume. The commingled groundwater plume extends north to East Duane Avenue. A risk assessment was performed in 1999 to evaluate the potential human health risks posed by these VOCs in groundwater. Shallow groundwater was found to exceed human health risk-based targets for drinking water. At the time, the potential health risk from volatilization of VOCs in groundwater was not considered significant for existing commercial or residential land uses. The shallow groundwater beneath the site is not used for drinking or other purposes. The City of Sunnyvale supplies drinking water to the site and its vicinity. Site Cleanup: In 1995, CAE-Link excavated and removed two underground sumps that were located near the northeast corner of the building at the site. Impacted soil surrounding the two sumps was also excavated and removed. In 1998, groundwater remediation began with the installation and operation of four extraction wells and a treatment system. The groundwater extraction and treatment system (GWETS) pumped and treated approximately 46,000 gallons of groundwater per day and removed approximately 838 pounds of VOCs. Treatment effectiveness and groundwater quality are being monitored on a regular basis by sampling 25 wells at this site. Monitoring data indicate VOC concentrations in groundwater beneath the site are gradually decreasing. On June 20, 2013, the Regional Water Board approved a workplan for evaluation of a natural attenuation of VOCs in groundwater and revision to self-monitoring programs and curtailment of the GWETS was implemented on June 28, 2013. Monitored natural attenuation is the current remedy. Current Status: Groundwater monitoring and reporting will continue into the foreseeable future. The site monitoring program of Order was updated on June 1, 2006. Currently, the groundwater monitoring is completed annually in October. On October 6, 2017 a request to destroy groundwater monitoring and extraction wells, and curtailment of the GWETS was submitted. The wells proposed for destruction are located in SDOU Subunit 4 on the 1 AMD Place property which will be redeveloped with residential housing and a public park. The request was approved on February 1, 2018. Well destructions are pending access with the property owner of 1 AMD Place. On March 7, 2018, we approved a soil vapor investigation workplan in Subunit 3 and Subunit 4 near 1004, 1010, 1012, and 1020 Stewart Drive. After the January 25, 2018, meeting we accepted completing the soil vapor investigation to evaluate the conditions and submit a feasibility study, if needed. In 2018, the maximum PCE and TCE concentrations in soil vapor in Subunit 3 are 7,800 and 9,200 micrograms per cubic meter (ug/m3) which exceed the current environmental screening levels. PCE and TCE indoor air concentrations inside the former CAE building (currently Fry's Electronics) did not exceed current ESLs. Maximum PCE and TCE concentrations in soil vapor near in SDOU Subunit 4 were 3,700 and 28,000 ug/m3 which exceed the current ESLs. Indoor air sampling in the commercial buildings located at 1012 – 1020 Stewart Drive in SDOU Subunit 4 is in progress.

GeoTracker Search - Cleanup Action Report (as of June 5, 2024)

Action Type:	PUMP & TREAT (P&T) GROUNDWATER
Begin Date:	7/1/1998
End Date:	6/28/2013
Phase:	Water
Contaminant Mass Removed:	838 Pounds
Description:	Operation started in July 1998 and ceased on June 28, 2013 with concurrence from the Regional Water Board. Three wells are screened in the A zone and 1 is screened in the B1 zone. All four are located on the One AMD Place property.

Action Type:	EXCAVATION
Begin Date:	1/1/1995
End Date:	1/1/1995
Phase:	Soil
Contaminant Mass Removed:	
Description:	Removal of sumps at northeast corner of site was completed in 1995. Soils remaining in place met the 1 mg/kg cleanup level for total VOCs.

Site History:

Water Board issued September 21, 2000, letter recommending no further investigation or remedial action is needed by Western Pacific. The July 3, 2000 Request for Removal from Commercial Street Operable Unit Discharger List summarizes the results of several investigation conducted (see report for details). The PCE, TCE, and DCE concentrations in groundwater are higher on the upgradient site of the property than on the downgradient side. Groundwater contamination originated from the Mohawk Laboratories site at 932 Kifer Road. See Water Board's September 21, 2000, letter for more information.

1,2-DICHLOROETHYLENE (CIS)
TETRACHLOROETHYLENE (PCE)
TRICHLOROETHYLENE (TCE)

Site History:

The Sunnyvale Corporation Yard is located near the intersection of Commercial and California Street in the city of Sunnyvale. The site covers about 9 acres of land. The site is used for storage and maintenance of equipment and materials. The site is paved with asphalt. There were one underground gasoline tank and an waste oil tank. In 1986, the gasoline tank was tested and determined to be leaking. Between 1987 and 1988, both the gasoline tank and the waste oil tank were removed from the site. Soil samples confirmed that both tanks had leaked. In 1988, a soil and groundwater investigation was conducted by the Regional Water Quality Control Board (RWQCB) to identify the sources of groundwater contamination in the region. Elevated levels of volatile organic compounds (VOCs)were detected at the site. In 1994, RWQCB issued an site cleanup Order to the City of Sunnyvale. Since 1988, a number of monitoring wells have been installed on the site. In 1999, the RWQCB determined that the groundwater data collected on site and offsite indicate that the groundwater contamination plume beneath the site is most likely the results of off-site upgradient releases of VOCs, as opposed to an on-site source. An rescission order of the site cleanup was issued in 1999.

Waste Code Details

Hazardous Waste Code: D035
Waste Code Description: METHYL ETHYL KETONE

Hazardous Waste Code: F005
Waste Code Description: THE FOLLOWING SPENT NONHALOGENATED SOLVENTS: TOLUENE, METHYL ETHYL KETONE, CARBON DISULFIDE, ISOBUTANOL, PYRIDINE, BENZENE, 2-ETHOXYETHANOL, AND 2-NITROPROPANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE NONHALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F001, F002, OR F004; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Hazardous Waste Code: U154
Waste Code Description: METHANOL (I) (OR) METHYL ALCOHOL (I)

Hazardous Waste Code: U161
Waste Code Description: 4-METHYL-2-PENTANONE (I) (OR) METHYL ISOBUTYL KETONE (I) (OR) PENTANOL, 4-METHYL-

Hazardous Waste Code: U220
Waste Code Description: BENZENE, METHYL- (OR) TOLUENE

Hazardous Waste Code: U239
Waste Code Description: BENZENE, DIMETHYL- (I,T) (OR) XYLENE (I)

Hazardous Waste Code: F003
Waste Code Description: THE FOLLOWING SPENT NONHALOGENATED SOLVENTS: XYLENE, ACETONE, ETHYL ACETATE, ETHYL BENZENE, ETHYL ETHER, METHYL ISOBUTYL KETONE, N-BUTYL ALCOHOL, CYCLOHEXANONE, AND METHANOL; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONLY THE ABOVE SPENT NONHALOGENATED SOLVENTS; AND ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONE OR MORE OF THE ABOVE NONHALOGENATED SOLVENTS, AND A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THOSE SOLVENTS LISTED IN F001, F002, F004, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Hazardous Waste Handler Details

Sequence No: 4
Receive Date: 20160210
Handler Name: APPLIED MATERIALS, INC - ARQUES
Federal Waste Generator Code: 1
Generator Code Description: Large Quantity Generator
Source Type: Annual/Biennial Report update with Notification
TSD Activity: N

Waste Code Details

Hazardous Waste Code: 122
Waste Code Description: Alkaline solution without metals (pH > 12.5)

Hazardous Waste Code: 134
Waste Code Description: Aqueous solution with <10% total organic residues

Hazardous Waste Code: 141
Waste Code Description: Off-specification, aged, or surplus inorganics

Hazardous Waste Code: 181
Waste Code Description: Other inorganic solid waste

Hazardous Waste Code: 212
Waste Code Description: Oxygenated solvents (acetone, butanol, ethyl acetate, etc.)

Hazardous Waste Code: 213
Waste Code Description: Hydrocarbon solvents (benzene, hexane, Stoddard, etc.)

Hazardous Waste Code: 214
Waste Code Description: Unspecified solvent mixture

Hazardous Waste Code: 331
Waste Code Description: Off-specification, aged, or surplus organics

Hazardous Waste Code: 341
Waste Code Description: Organic liquids (nonsolvents) with halogens

Hazardous Waste Code: 343
Waste Code Description: Unspecified organic liquid mixture

Hazardous Waste Code: 352
Waste Code Description: Other organic solids

Hazardous Waste Code: 551
Waste Code Description: Laboratory waste chemicals

Hazardous Waste Code: 725
Waste Code Description: Liquids with mercury > 20 mg/l

Hazardous Waste Code: 791
Waste Code Description: Liquids with pH < 2

Hazardous Waste Code: 792
Waste Code Description: Liquids with pH < 2 with metals

Map Key	Number of Records	Direction	Distance (mi/ft)	Elev/Diff (ft)	Site	DB

Hazardous Waste Code: D001
Waste Code Description: IGNITABLE WASTE

Hazardous Waste Code: D002
Waste Code Description: CORROSIVE WASTE

Hazardous Waste Code: D003
Waste Code Description: REACTIVE WASTE

Hazardous Waste Code: D004
Waste Code Description: ARSENIC

Hazardous Waste Code: D007
Waste Code Description: CHROMIUM

Hazardous Waste Code: D008
Waste Code Description: LEAD

Hazardous Waste Code: D009
Waste Code Description: MERCURY

Hazardous Waste Code: D038
Waste Code Description: PYRIDINE

Hazardous Waste Code: F003
Waste Code Description: THE FOLLOWING SPENT NONHALOGENATED SOLVENTS: XYLENE, ACETONE, ETHYL ACETATE, ETHYL BENZENE, ETHYL ETHER, METHYL ISOBUTYL KETONE, N-BUTYL ALCOHOL, CYCLOHEXANONE, AND METHANOL; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONLY THE ABOVE SPENT NONHALOGENATED SOLVENTS; AND ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONE OR MORE OF THE ABOVE NONHALOGENATED SOLVENTS, AND A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THOSE SOLVENTS LISTED IN F001, F002, F004, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Hazardous Waste Code: F005
Waste Code Description: THE FOLLOWING SPENT NONHALOGENATED SOLVENTS: TOLUENE, METHYL ETHYL KETONE, CARBON DISULFIDE, ISOBUTANOL, PYRIDINE, BENZENE, 2-ETHOXYETHANOL, AND 2-NITROPROPANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE NONHALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F001, F002, OR F004; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Calenviroscreen 4 Score: 35-40%
File Location: All Files are on GeoTracker or in the Local Agency Database
Site History:

Background: The Site is located at 974 East Arques Avenue near the intersection of Commercial Street and Central Expressway in east Sunnyvale (see Site location map). Land use in this area is light industrial and commercial. The site is approximately 10 acres. The groundwater plume is commingled with Mohawk Labs (Mohawk), Case # 43S0223, which is located southwest of the Site and Mohawk is responsible for groundwater monitoring and remediation. A summary is presented below. In 1967, Fairchild Semiconductor Corporation (Fairchild) constructed a manufacturing facility at the Site. Fairchild owned and occupied the Site from 1968 to 1972. Manufacturing processes at the Site included photo resist, screen printing, etching, alodining,

and spray painting. Hewlett & Packard Company (HP) purchased the property in 1972 and continued manufacturing operations at the Site until 1993. HP's manufacturing process included light assembly, alodining, metal fabrication, and painting. An acid neutralization sump located at the western edge of the building was used in the manufacturing processes. Volatile organic compounds (VOCs) such as trichloroethylene (TCE) were typically used during these processes. Applied Materials, Inc., purchased the Site in 1995 and remains the current owner. Site Investigation: The Site investigations identified VOCs such as cis-1,2-dichloroethene (cis-1,2-DCE) and TCE in soil and groundwater. The onsite source area has been identified as the former acid neutralization sump. The Site investigation also identified VOCs migrating onto the Site from the south. These VOCs originated at a facility operated by Mohawk Labs at 932 Kifer Road. The Site VOC plume and Mohawk VOC plume commingle and extend north to Duane Avenue. Because of this commingling, Mohawk is also a responsible party for the Site. The current maximum TCE and cis-1,2-DCE concentrations in groundwater are 200 micrograms per liter (µg/L) and 1,000 µg/L, respectively. The risk assessment performed by Mohawk for the Site indicates that VOC contaminated groundwater beneath the Site does not present an unacceptable health risk to Site occupants. The shallow groundwater beneath the Site is not used for drinking or other purposes. The City of Sunnyvale supplies drinking water to the Site and its vicinity. Site Cleanup: In 1986 and 1987, HP completed the following cleanup actions: 1) excavated and disposed of the former acid neutralization sump, 2) excavated and disposed of more than 3,000 cubic yards of soil, and 3) installed a groundwater extraction and treatment system (GWETS). In 1995, HP installed an iron filings trench in the vicinity of the former sump. The iron filings react with the VOCs in groundwater and break them down into carbon dioxide, water and salt. In 1998, Fairchild installed a new GWETS at the site. The GWETS consisted of two extraction wells and an air stripper. The operation of the GWETS and iron filings trench has gradually decreased VOC concentrations in groundwater beneath the site. In 2007, Mohawk incurred responsibilities for Applied Materials groundwater monitoring and remediation (Order No. 00-123). On September 25, 2009, curtailment of the GWETS was implemented per the July 6, 2010 Groundwater Extraction Curtailment Request, 2nd Revision, which was approved by the Regional Water Board on February 7, 2011. Currently, the remedial action is monitored natural attenuation. Groundwater monitoring occurs semi-annually. Hydrogeology: 1) Groundwater flow direction – north/northeast 2) First encountered groundwater – 6 to 12 fbg 3) Monitor conditions in three different aquifers: 3a) A1-zone - up to 25 fbg 3b) A2-zone – approximately 25 to 35 fbg 3c) B-zone – approximately 35 to 100 fbg (total depth explored) Next Steps: Groundwater monitoring and reporting will continue into the foreseeable future until Water Board-established cleanup standards for the Site are met. See Mohawk Laboratories for recent correspondence and reports, CASE #: 43S0223

Site History:

Background:

The Site is located at 974 East Arques Avenue near the intersection of Commercial Street and Central Expressway in east Sunnyvale (see Site location map). Land use in this area is light industrial and commercial. The site is approximately 10 acres. The groundwater plume is commingled with Mohawk Labs (Mohawk), Case # 43S0223, which is located southwest of the Site and Mohawk is responsible for groundwater monitoring and remediation. A summary is presented below.

In 1967, Fairchild Semiconductor Corporation (Fairchild) constructed a manufacturing facility at the Site. Fairchild owned and occupied the Site from 1968 to 1972.

Manufacturing processes at the Site included photo resist, screen printing, etching, alodining, and spray painting. Hewlett & Packard Company (HP) purchased the property in 1972 and continued manufacturing operations at the Site until 1993. HP's manufacturing process included light assembly, alodining, metal fabrication, and painting. An acid neutralization sump located at the western edge of the building was used in the manufacturing processes. Volatile organic compounds (VOCs) such as trichloroethylene (TCE) were typically used during these processes. Applied Materials, Inc., purchased the Site in 1995 and remains the current owner.

Site Investigation:

The Site investigations identified VOCs such as cis-1,2-dichloroethene (cis-1,2-DCE) and TCE in soil and groundwater. The onsite source area has been identified as the former acid neutralization sump.

The Site investigation also identified VOCs migrating onto the Site from the south. These VOCs originated at a facility operated by Mohawk Labs at 932 Kifer Road. The Site VOC plume and Mohawk VOC plume commingle and extend north to Duane Avenue. Because of this commingling, Mohawk is also a responsible party for the Site. The current maximum TCE and cis-1,2-DCE concentrations in groundwater are 200 micrograms per liter (µg/L) and 1,000 µg/L, respectively.

The risk assessment performed by Mohawk for the Site indicates that VOC contaminated groundwater beneath the Site does not present an unacceptable health risk to Site occupants. The shallow groundwater beneath the Site is not used for drinking or other purposes. The City of Sunnyvale supplies drinking water to the Site and its vicinity.

Site Cleanup:

In 1986 and 1987, HP completed the following cleanup actions: 1) excavated and disposed of the former acid neutralization sump, 2) excavated and disposed of more than 3,000 cubic yards of soil, and 3) installed a groundwater extraction and treatment system (GWETS). In 1995, HP installed an iron filings trench in the vicinity of the former sump. The iron filings react with the VOCs in groundwater and break them down into carbon dioxide, water and salt. In 1998, Fairchild installed a new GWETS at the site. The GWETS consisted of two extraction wells and an air stripper. The operation of the GWETS and iron filings trench has gradually decreased VOC concentrations in groundwater beneath the site.

In 2007, Mohawk incurred responsibilities for Applied Materials groundwater monitoring and remediation (Order No. 00-123).

On September 25, 2009, curtailment of the GWETS was implemented per the July 6, 2010 Groundwater Extraction Curtailment Request, 2nd Revision, which was approved by the Regional Water Board on February 7, 2011. Currently, the remedial action is monitored natural attenuation. Groundwater monitoring occurs semi-annually.

Hydrogeology:

1) Groundwater flow direction - north/northeast

2) First encountered groundwater - 6 to 12 fbg

3) Monitor conditions in three different aquifers:
3a) A1-zone - up to 25 fbg
3b) A2-zone - approximately 25 to 35 fbg
3c) B-zone - approximately 35 to 100 fbg (total depth explored)

Next Steps:

Groundwater monitoring and reporting will continue into the foreseeable future until Water Board-established cleanup standards for the Site are met.
See Mohawk Laboratories for recent correspondence and reports,
CASE #: 43S0223

GeoTracker Search - Cleanup Action Report (as of June 5, 2024)

Action Type: PUMP & TREAT (P&T) GROUNDWATER
Begin Date: 1/1/1987
End Date: 9/30/2009
Phase: Water
Contaminant Mass Removed: 620 Pounds
Description: Treated volume is for 1998 - 2009. The Treated volume is not known for 1987 - 1995

Action Type: IN SITU PHYSICAL/CHEMICAL TREATMENT (OTHER THAN SVE)
Begin Date: 1/1/1995
End Date: 12/1/2001
Phase: Water
Contaminant Mass Removed:
Description: Groundwater treated by iron filings wall. The treated volume is not available.

Action Type: EXCAVATION
Begin Date: 1/1/1986
End Date: 9/30/1995
Phase: Soil
Contaminant Mass Removed:
Description: soil excavated from the former acid neutralization sump. 190 cy in 1986 and 3,000 cy in 1995.

Action Type: PERMEABLE REACTIVE BARRIER
Begin Date: 9/1/1995
End Date: 9/30/1995
Phase: Water
Contaminant Mass Removed:
Description: 43-foot-long and 5 feet tall granular iron permeable reactive barrier (PRB) near former sump installed during backfilling of excavation. The base of the wall was placed at a depth of 25 ft. See January 11, 1996, Report of Remedial Activities

Site History:

Background The Site is approximately 3.64 acres of land at 695 East Arques Avenue and 698 East Taylor Avenue, located on the west side of Britton Avenue between East Arques Avenue and East Taylor Avenue in Sunnyvale. The southern portion of the Site was occupied by T-M Manufacturing, a metal machining business. The northern portion of the Site was improved with a light commercial structure occupied by Lefco, a refrigeration supply and maintenance company. The Site has been occupied by the existing commercial structures from prior to 1956 until approximately 2015. Historic operations at T-M Manufacturing have included metal planning, grinding, and cutting. T-M Manufacturing has historically operated a TCE vapor degreaser, a former gasoline underground storage tank (UST), and currently utilizes a 5,000-gallon metal working fluid UST. The Site is surrounded by commercial and residential. Along the eastern property boundary is a drainage channel which separates the Site from another residential development. Shallow groundwater beneath the Site is approximately 12 to 13.5 feet below ground grade (fbg) and groundwater flow directions is towards the northeast. Groundwater is not currently used for drinking or domestic purposes. The City of Sunnyvale supplies drinking water to the Site and the vicinity. The Water Board is the lead agency overseeing soil and groundwater investigation and cleanup at this Site. The site has been redeveloped into a condominium complex. The redevelopment was transferred to several developers including Olson Company, Warmington Taylor Avenue Associates, and lastly Taylor Morrison of California LLC (Taylor Morrison). Taylor Morrison implemented the remedial soil excavation and installation of passive vapor intrusion mitigation systems for select buildings. Site Investigation Several environmental investigations were performed at the Site between 2003 and 2006 to evaluate potential soil and groundwater contamination.These investigations have indicated that groundwater beneath the majority of the Site is impacted with TCE. Gasoline range hydrocarbons were not detected in groundwater at the UST location. The soil contamination appears to be localized and limited to the soil in the vicinity of the on-Site vapor degreaser. Based on groundwater analytical data, it appears that a release of TCE occurred from the vapor degreaser. The Olson Company prepared a human health risk assessment report in July 2005 to evaluate health risks associated with TCE leached from the vapor degreaser. The report concluded that after removal of TCE-impacted soil, the relatively low concentrations of TCE in soil-gas and groundwater beneath the Site will not pose unacceptable health risks to occupants of the future buildings at this Site. Previous Cleanup Activities Records indicate that the underground storage tank was removed in 1984. Gasoline range petroleum hydrocarbons were not detected in a soil sample taken from the base of the excavated tank pit. The initial remedial action plan was approved in 2006. However, because the developer changed hands, remediation did not occur until 2015. Below is a summary. The building demolition activities at the Site were performed in March 2015 and included post-demolition soil sampling. The results are presented in the December 12, 2015 Report on Post-Demolition Sampling. Remedial soil excavations occurred between April and July 2015 in accordance with the Remedial Action Work Plan, Revision 4 dated June 26, 2015. Eight areas were identified for soil excavation to cleanup lead, petroleum hydrocarbons, and volatile organic compounds (VOCs). A total of 6,562.74 tons of soil profiled as non-hazardous waste were excavated from the Site and disposed off-site to address elevated concentrations of TPHmo, VOCs, PCBs, metals (arsenic and lead). A total of 794.96-tons tons of soil profiled as hazardous waste were excavated from the Site and disposed off-site to address elevated concentrations of VOCs. The results of the remedial soil excavation activities was submitted in a report dated April 26, 2016. In May 2015, 10 groundwater monitoring wells were installed across the Site (MW-1 through MW-10). The total depth of the wells is 20 fbg and the screens are approximately 7 to 20 fbg. The activities are summarized in the October 8, 2015, Report on Well Installation Activities. The results of the wells sampling completed in June and November 2015 are presented in the February 25, 2016 Report on Post Remediation Groundwater Monitoring. May through June 2015 soil vapor sampling for buildings 680, 695, 698, and 351 was completed. This occurred after the remedial soil excavations at least those completed prior to May soil vapor sampling event. In November 2015 (only a few samples were collected in December 2015 and January 2015), soil vapor sampling was completed following demolition of the existing buildings to characterize the lateral extent of VOCs in soil vapor at buildings 400, 500 through 502, and 600 through 607. The results for all soil vapor sampling are presented in the February 25, 2016, Report on Confirmation Soil Vapor Sampling. Taylor Morrison submitted a vapor intrusion mitigation system (VIMS) design and operation and maintenance manual on August 30, 2016 which was approved on March 10, 2017. The VIMS consists of a passive venting system and vapor barriers beneath 5 of the 12 residential buildings (500, 501, 502, 602, and 605) where soil vapor concentrations were greater than screening levels. On the Regional Water Board approved the March 30, 2018, VIMS installation completion report that documents the installation and testing of the VIMS. On July 14, 2017, the Regional Water Board approved the May 8, 2017, revised financial assurance plan prepared by Taylor Morrison to complete VIMS O&M tasks. The plan also indicates the transfer of O&M tasks (i.e. long-term monitoring) from Taylor Morrison to the homeowners association will occur once the VIMS is deemed operational by the Regional Water Board. See the May 8, 2017, revised financial assurance plan for more details. In 2017, Taylor Morrison completed well destructions and onsite sampling of newly installed soil vapor probes and remaining groundwater monitoring wells which was required by the Regional Water Board's June 16, 2017, letter. TCE concentrations in groundwater ranged from 9.1 to 77 ug/L. TCE concentrations in soil vapor ranged from 3.3 to 2,000 ug/m3 along the eastern perimeter of the site. On April 26, 2018, the Regional Water Board approved the January 30, 2018, Report on Additional Investigation Activities, Rev. 1 and required an offsite investigation workplan (east of the Channel) and semiannual groundwater and soil vapor monitoring reports. The first VIMS performance monitoring was completed in October 2017 (report dated January 8, 2018). The Regional Water Board conditionally approved the performance monitoring report and required a revised report and addendum to the VIMS O&M manual for the revised sampling procedures. The Regional Water Board approved the VIMS O&M addendum on April 3, 2018 that collects vapor samples from building stub outs only (no roof risers) where PID reading exceeded 70 ppbv threshold per the VIMS O&M manual using summa canisters. The offsite investigation was completed and no PCE or TCE was detected in grab-groundwater samples. On October 19, 2018, we approved the September 21, 2018 report that included offsite investigation results, and sampling of onsite soil vapor probes and groundwater monitoring wells. We required annual VIMS monitoring and sampling of soil vapor and groundwater to evaluate post-remediation and post-construction conditions and to evaluate the need for VIMS operations. For more information see the Site Documents. Current Status VIMS performance monitoring will be completed annually and will include sampling of existing onsite soil vapor probes and groundwater monitoring wells. Per the Water Board's October 19, 2018, letter monitoring reports are due by September 30 of each year.

Map Key	Number of Records	Direction	Distance (mi/ft)	Elev/Diff (ft)	Site	DB

Background
The Site is approximately 3.64 acres of land at 695 East Arques Avenue and 698 East Taylor Avenue, located on the west side of Britton Avenue between East Arques Avenue and East Taylor Avenue in Sunnyvale. The southern portion of the Site was occupied by T-M Manufacturing, a metal machining business. The northern portion of the Site was improved with a light commercial structure occupied by Lefco, a refrigeration supply and maintenance company. The Site has been occupied by the existing commercial structures from prior to 1956 until approximately 2015. Historic operations at T-M Manufacturing have included metal planning, grinding, and cutting. T-M Manufacturing has historically operated a TCE vapor degreaser, a former gasoline underground storage tank (UST), and currently utilizes a 5,000-gallon metal working fluid UST.

The Site is surrounded by commercial and residential. Along the eastern property boundary is a drainage channel which separates the Site from another residential development. Shallow groundwater beneath the Site is approximately 12 to 13.5 feet below ground grade (fbg) and groundwater flow directions is towards the northeast. Groundwater is not currently used for drinking or domestic purposes. The City of Sunnyvale supplies drinking water to the Site and the vicinity.

The Water Board is the lead agency overseeing soil and groundwater investigation and cleanup at this Site. The site has been redeveloped into a condominium complex. The redevelopment was transferred to several developers including Olson Company, Warmington Taylor Avenue Associates, and lastly Taylor Morrison of California LLC (Taylor Morrison). Taylor Morrison implemented the remedial soil excavation and installation of passive vapor intrusion mitigation systems for select buildings.

Site Investigation
Several environmental investigations were performed at the Site between 2003 and 2006 to evaluate potential soil and groundwater contamination. These investigations have indicated that groundwater beneath the majority of the Site is impacted with TCE. Gasoline range hydrocarbons were not detected in groundwater at the UST location. The soil contamination appears to be localized and limited to the soil in the vicinity of the on-Site vapor degreaser. Based on groundwater analytical data, it appears that a release of TCE occurred from the vapor degreaser.

The Olson Company prepared a human health risk assessment report in July 2005 to evaluate health risks associated with TCE leached from the vapor degreaser. The report concluded that after removal of TCE-impacted soil, the relatively low concentrations of TCE in soil-gas and groundwater beneath the Site will not pose unacceptable health risks to occupants of the future buildings at this Site.

Previous Cleanup Activities
Records indicate that the underground storage tank was removed in 1984. Gasoline range petroleum hydrocarbons were not detected in a soil sample taken from the base of the excavated tank pit. The initial remedial action plan was approved in 2006. However, because the developer changed hands, remediation did not occur until 2015. Below is a summary.

The building demolition activities at the Site were performed in March 2015 and included post-demolition soil sampling. The results are presented in the December 12, 2015 Report on Post-Demolition Sampling.

Remedial soil excavations occurred between April and July 2015 in accordance with the Remedial Action Work Plan, Revision 4 dated June 26, 2015. Eight areas were identified for soil excavation to cleanup lead, petroleum hydrocarbons, and volatile organic compounds (VOCs). A total of 6,562.74 tons of soil profiled as non-hazardous waste were excavated from the Site and disposed off-site to address elevated concentrations of TPHmo, VOCs, PCBs, metals (arsenic and lead). A total of 794.96-tons tons of soil profiled as hazardous waste were excavated from the Site and disposed off-site to address elevated concentrations of VOCs. The results of the remedial soil excavation activities was submitted in a report dated April 26, 2016.

In May 2015, 10 groundwater monitoring wells were installed across the Site (MW-1 through MW-10). The total depth of the wells is 20 fbg and the screens are approximately 7 to 20 fbg. The activities are summarized in the October 8, 2015, Report on Well Installation Activities. The results of the wells sampling completed in June and November 2015 are presented in the February 25, 2016 Report on Post Remediation Groundwater Monitoring.

May through June 2015 soil vapor sampling for buildings 680, 695, 698, and 351 was completed. This occurred after the remedial soil excavations at least those completed prior to May soil vapor sampling event. In November 2015 (only a few samples were collected in December 2015 and January 2015), soil vapor sampling was completed following demolition of the existing buildings to characterize the lateral extent of VOCs in soil vapor at buildings 400, 500 through 502, and 600 through 607. The results for all soil vapor sampling are presented in the February 25, 2016, Report on Confirmation Soil Vapor Sampling.

Taylor Morrison submitted a vapor intrusion mitigation system (VIMS) design and operation and maintenance manual on August 30, 2016 which was approved on March 10, 2017. The VIMS consists of a passive venting system and vapor barriers beneath 5 of the 12 residential buildings (500, 501, 502, 602, and 605) where soil vapor concentrations were greater than screening levels. On the Regional Water Board approved the March 30, 2018, VIMS installation completion report that documents the installation and testing of the VIMS.

On July 14, 2017, the Regional Water Board approved the May 8, 2017, revised financial assurance plan prepared by Taylor Morrison to complete VIMS O&M tasks. The plan also indicates the transfer of O&M tasks (i.e. long-term monitoring) from Taylor Morrison to the homeowners association will occur once the VIMS is deemed operational by the Regional Water Board. See the May 8, 2017, revised financial assurance plan for more details.

In 2017, Taylor Morrison completed well destructions and onsite sampling of newly installed soil vapor probes and remaining groundwater monitoring wells which was required by the Regional Water Board's June 16, 2017, letter. TCE concentrations in groundwater ranged from 9.1 to 77 ug/L. TCE concentrations in soil vapor ranged from 3.3 to 2,000 ug/m3 along the eastern perimeter of the site. On April 26, 2018, the Regional Water Board approved the January 30, 2018, Report on Additional Investigation Activities, Rev. 1 and required an offsite investigation workplan (east of the Channel) and semiannual groundwater and soil vapor monitoring reports.

The first VIMS performance monitoring was completed in October 2017 (report dated January 8, 2018). The Regional Water Board conditionally approved the performance monitoring report and required a revised report and addendum to the VIMS O&M manual for the revised sampling procedures. The Regional Water Board approved the VIMS O&M addendum on April 3, 2018 that collects vapor samples from building stub outs only

(no roof risers) where PID reading exceeded 70 ppbv threshold per the VIMS O&M manual using summa canisters.

The offsite investigation was completed and no PCE or TCE was detected in grab-groundwater samples. On October 19, 2018, we approved the September 21, 2018 report that included offsite investigation results, and sampling of onsite soil vapor probes and groundwater monitoring wells. We required annual VIMS monitoring and sampling of soil vapor and groundwater to evaluate post-remediation and post-construction conditions and to evaluate the need for VIMS operations.

For more information see the Site Documents.

Current Status
VIMS performance monitoring will be completed annually and will include sampling of existing onsite soil vapor probes and groundwater monitoring wells. Per the Water Board's October 19, 2018, letter monitoring reports are due by September 30 of each year.

GeoTracker Search - Cleanup Action Report (as of June 5, 2024)

Action Type: OTHER (USE DESCRIPTION FIELD)
Begin Date: 10/1/2017
End Date: 6/1/2022
Phase: Soil Vapor
Contaminant Mass Removed:
Description: VIMS installed for all residential buildings; monitoring only completed for select buildings; Initial VIMS monitoring began in October 2017 and continue through June 2022, when a 5-year review report is due to evaluate the VIMS

Action Type: EXCAVATION
Begin Date: 4/23/2015
End Date: 7/6/2015
Phase: Soil
Contaminant Mass Removed: 7,358 Tons
Description: Soil excavation at 8 areas across the site to cleanup arsenic, lead, petroleum hydrocarbons, PCBs, and VOCs (e.g. benzene, PCE, and TCE).

RB Case No:
Local Case No: 06S1W30F01s
Begin Date: 10/22/2010
Lead Agency: SANTA CLARA COUNTY LOP
Local Agency: SANTA CLARA COUNTY LOP
CUF Case: NO
CalEnvScreen Score:
EPA Region: 9
Qty Rlsd Gallons:
Potential COC: Trichloroethylene (TCE), Other Petroleum
How Discovered: Property Sale/Transaction, Site Assessment/Site Investigation
Stop Method: Other Means
Stop Description:
Case Worker: DEH
Military DoD Site: No
Leak Reported Dt: 2010-11-01 00:00:00
No Further Action Dt: 2012-03-20 00:00:00
Potential Media of Concern: Indoor Air, Other Groundwater (uses other than drinking water), Soil
How Discovered Description:
Calwater Watershed Name: Santa Clara - Palo Alto (205.50)
DWR GW Subbasin Name: Santa Clara Valley - Santa Clara (2-009.02)
Disadvantaged Community:
Coordinate Source: Google Map Move
Discharge Cause: Unknown
Discharge Source: Other
Facility Project Sub Type:
Calenviroscreen 3 Score: 31-35%
Calenviroscreen 4 Score: 35-40%
File Location: All Files are on GeoTracker or in the Local Agency Database
Site History:

Phase II investigation conducted for a property transaction found 80 ppb TCE, 64 ppb TPHg, 550 ppb TPHd, and 320 ppb TPHo in groundwater. Subsequent investigation conducted, but not yet submitted for review. Site to be redeveloped residentially. Developer is proposing a vapor barrier to address possible vapor intrusion concerns. Site is located near to within a regional plume. To protect residents from health affects related to potential vapor intrusion, a vapor barrier was constructed beneath all of the buildings. Supplemental Declarations (the Document) were recorded with the Santa Clara County Recorder on December 21, 2011. The Document describes the requirements and responsibilities of property owners to notify future prospective buyers and to protect the vapor barrier. A copy of the Document is included with the attached Site Closure Summary.

Cleanup Status Detail: COMPLETED - CASE CLOSED AS OF 3/15/1999
Project Status:
Cleanup History Link: https://geotracker.waterboards.ca.gov/profile_report_include?global_id=T0608524342&tabname=regulatoryhistory
Potential COC: GASOLINE
Potential Media of Concern: OTHER GROUNDWATER (USES OTHER THAN DRINKING WATER)
File Location: STORED ON MICROFICHE
User Defined Beneficial Use:
Designated Beneficial Use: MUN, AGR, IND, PROC
DWR GW Sub Basin: Santa Clara Valley - Santa Clara (2-009.02)
Calwater Watershed Name: Santa Clara - Palo Alto (205.50)
Post Closure Site Management:
Future Land Use:
Cleanup Oversight Agencies: SANTA CLARA COUNTY LOP (LEAD)
CASE MANAGER: DEH CASEWORKER
SAN FRANCISCO BAY RWQCB (REGION 2)
CASE MANAGER: Regional Water Board
SANTA CLARA VALLEY WATER DISTRICT - CASE #: 06S1W30J04f
CUF Claim No:
CUF Priority Assig:
CUF Amount Paid:
WDR Place Type:
WDR File No:
WDR Order No:
Project Oversight Agencies:
Facility Type:
Composting Method:
Grndwtr Monitoring Frequency:
Designated Beneficial Use Desc: Municipal and Domestic Supply, Agricultural Supply, Industrial Service Supply, Industrial Process Supply

Site History:

The former United Technologies Corporation (UTC) facility was located at 1050 E. Arques Avenue, Sunnyvale, Santa Clara County, California. This 10-acre parcel was the eastern side of a 23 acre parcel of land utilized by UTC since 1963 for the purpose of research, development and small-scale testing of rocket propellants. This site was bound by the Central Expressway on the south, East Arques Avenue on the north, Hewlett Packard (HP) property on the west and O'Donnell Brigham property to the east. Two buildings were present on the 10-acre parcel: the research laboratory building (UTL BLDG. 5200), which is located on the nothern section of the parcel, and the test building (UTL BLDG. 5400), located on the southern section. HP bought the property from UTC between 1982 and 1983 and removed the UTC buildings and auxiliary facilities. HP subsequently constructed a park, conference facility and parking facilities on the site. In 1995, Applied Materials purchased the 1050 E. Arques Avenue site from HP. However, a site reconnaissance conducted by DTSC on September 20, 2000 showed that the 1050 E. Arques Avenue address is currently occupied by Mitsubishi Electronics. According to Mr. O'Leary, a consultant for Applied Materials, it appears that the 1050 E. Arques address had been reassigned and does not currently reflect where UTC was formerly located. The entire 974 E. Arques property including the former 1050 E. Arques property is currently owned and occupied by Applied Materials. During the period that UTC occupied the site, serveral outdoor areas were used for chemical drum storage and/or rocket propellant testing. In addition, three underground flow-through acid neutralization sumps were used. When HP occupied the site, neighboring production facilities included Signetics and the City Corporation Yard to the southwest MIPS Computer systems to the west; Advanced Micro Devices, TRW, Signetics, and Westinghouse to the northwest; Monolithic Memories Inc. to the northeast; Inprint and TRW to the north; National Semiconductor Corporation (NSC) to the southeast; and Mohawk Chemical Company to the south.

Completed Activities

Title: Preliminary Endangerment Assessment Report
Title Link: https://www.envirostor.dtsc.ca.gov/public/final_documents2?global_id=43360136&doc_id=5002474
Area Name:
Area Link:
Sub Area:
Sub Area Link:
Document Type: Preliminary Endangerment Assessment Report
Date Completed: 1/29/2001
Comments: Completed PEA. Completed a Preliminary Assessment for the site under the US EPA PA/SI grant. The former UTC facility was located in an urban area within the North Santa Clara County groundwater sub-basin. Most of the land surface in the region is paved. Few tress remain in the area and any unpaved soil has been colonized by ruderal plant species. Information obtained from the US EPA GIS Center shows that within four miles of the site, there has been one occurrence of the California Clapper Rail and two occurrences of the Salt-marsh Harvest Mouse, both of which are endangered species. A search to identify drinking water wells within miles of the facility revealed a listing of 121 wells. Ninety-one of the 121 wells are active, 7 are on standby, 11 are inactive, 8 have been destroyed, and 4 have been abandoned. The chemicals used on the site included trichloroethylene (TCE), 1,1,1-trichloroethane

Map Key	Number of Records	Direction	Distance (mi/ft)	Elev/Diff (ft)	Site	DB

(TCA), freon, toluene, methyl ethyl ketone (MEK), methyl isobutyl ketone (MIK), methylene chloride, ethyl acetate, sulfuric acid, hydrochloric acid, ammonium perchlorate, aluminum, magnesium, zinc carbide, and chromium. Chemical use at the facility was in research-scale rather than production-scale quantities. Although no chemical inventory records were provided, UTC personnel advise Woodward-Clyde Consultants that chemicals used onsite were delivered in 1-gallon bottles to 55-gallon drum shipments, rather than in tank-truck or railroad tank-car quantities. No chemical storage tanks were used at the facility. Soil and groundwater testing on the site have shown that TCE, 1,1,1-TCA, 1,2-DCE, and Freon 113 are the primary chemicals of concern. Between 1982 and 1986 and in 1990, several studies were performed at the former UTC site to identify potential source areas. During these studies, soil and groundwater samples were collected adjacent to identified potential source areas. Chemical analyses indicate that primarily TCE and 1,1,1-TCA have been introduced to the soil and groundwater. Results of soil samples taken in 1982 showed that at shallow depth (0-5 feet), TCE concentrations ranged from

Site History:	

Background This 14-acre site is located in a mixed residential, commercial and office park area. It is bounded by East Duane Avenue and single-family residences to the north, an office building to the south, De Guigne Drive and office building complexes to the east and west (see Site Location Map). The majority of the site was cultivated for crops for several decades, with no other use known. During the course of agricultural use, pesticides were applied to crops in the normal course of farming operations. There is no indication of any unlawful or uncontrolled release of pesticides or other chemical compounds at the site. A service station (Jim's Exxon) was formerly located and operated on a small portion of the northwest portion of this site from the early 1960s through 1997. Two 10,000-gallon gasoline underground storage tanks (USTs) and one 280-gallon waste oil UST historically were located at the service station. All related equipment was removed after the station ceased operation. Several industrial facilities in the site vicinity have documented releases of volatile organic compounds (VOCs), hazardous materials to the environment. These VOCs are primarily trichloroethene (TCE) and perchloroethene (PCE) and cis-1,2,-dichloroethene (Cis-1,2-DCE). The VOCs have migrated in low concentrations via groundwater transport under a large area of Sunnyvale that includes the site. These off-site properties are the subject of ongoing Regional Water Board approved site cleanups being performed by others. In 2006, the Riding Group purchased the subject site from AMD, and received approval from the City of Sunnyvale Planning Department to develop the site with up to 260 three-story, at-grade townhouse units. A two-acre public park is planned to the southwest of the development. Riding sold the site to John Laing Homes, who developed a few townhouses on the northern portion of the site. John Laing Homes filed bankruptcy in 2009. Sunnyvale Associates LLC purchased the site in 2011, and plans to develop it with up to 260 three-story, at-grade townhouse units. Private, traditional rear yards are not planned. Individual private open spaces consist of ground floor, at-grade garages, open concrete patios and small second floor decks. There will not be any individual private open space area consisting of planter areas of any type for each unit. The development also includes new landscaping, all of which will be common areas maintained by the Homeowner's Association. The Regional Water Board is the lead

agency overseeing the investigation and cleanup at this site and at several other facilities in the site vicinity. Site Investigations Several environmental investigations have been performed at the site. Limited soil sampling in 2004-2006 revealed minor detections of common pesticides, including Dieldrin, Endrin and DDT in shallow soil in the southern half of the site with some Dieldrin concentrations slightly above the Water Board's residential direct contact environmental screening level (ESL). More extensive soil sampling was performed in 2011by Sunnyvale Associates LLC in the same areas sampled previously, as well as in soil stockpiles located in the southern area. The 2011 soil sampling showed that the Dieldrin concentrations on site were below the ESL. The results of the 2011 and 2004-2006 soil testing were evaluated together in the proposed report, which has concluded that the risk from the residual Dieldrin in soil was insignificant and that the no further action alternative was appropriate. The 2007 cleanup plan for the site determined that the low level concentrations of PCE and TCE in groundwater located beneath the eastern and northeastern portions of the site from offsite sources did not raise a health concern. However, the previous developer (John Laing Homes) proposed to voluntarily install vapor intrusion barriers beneath townhouse buildings located beneath the eastern and northeastern portions of at the site. Subsequent groundwater testing performed by others show that VOC concentrations continue to decrease due to the offsite remedial efforts of others and natural attenuation processes. The proposed report also evaluated the potential risk from groundwater and determined that it did not present a significant risk for indoor air intrusion. Shallow groundwater beneath the site is not currently used for drinking or any other purpose. The City of Sunnyvale supplies drinking water to the site and the vicinity. Previous Cleanup Activities Two 10,000-gallon gasoline underground storage tanks (USTs) and one 280-gallon waste oil UST were removed from the service station property in 1997. Approximately 875 gallons of water were removed from the tank pits to help reduce residual fuel compounds in the groundwater. The most recent sampling event in 2007 did not reveal any residual fuel compounds in groundwater. Proposed Case Closure The proposed report concludes that based on additional soil sampling and risk assessment performed using the combined 2004-2006 and 2011 analytical data, current site environmental conditions show no significant risk from the pesticides in soil or VOCs in groundwater to future resident at this site. Therefore, in the proposed report, Sunnyvale Associates LLC has requested the Regional Water Board for no further action and case closure for the site.

Site History:

Background
This 14-acre site is located in a mixed residential, commercial and office park area. It is bounded by East Duane Avenue and single-family residences to the north, an office building to the south, De Guigne Drive and office building complexes to the east and west (see Site Location Map). The majority of the site was cultivated for crops for several decades, with no other use known. During the course of agricultural use, pesticides were applied to crops in the normal course of farming operations. There is no indication of any unlawful or uncontrolled release of pesticides or other chemical compounds at the site.

A service station (Jim's Exxon) was formerly located and operated on a small portion of the northwest portion of this site from the early 1960s through 1997. Two 10,000-gallon gasoline underground storage tanks (USTs) and one 280-gallon waste oil UST historically were located at the service station. All related equipment was removed after the station ceased operation.

Several industrial facilities in the site vicinity have documented releases of volatile organic compounds (VOCs), hazardous materials to the environment. These VOCs are primarily trichloroethene (TCE) and perchloroethene (PCE) and cis-1,2,-dichloroethene (Cis-1,2-DCE). The VOCs have migrated in low concentrations via groundwater transport under a large area of Sunnyvale that includes the site. These off-site properties are the subject of ongoing Regional Water Board approved site cleanups being performed by others.

In 2006, the Riding Group purchased the subject site from AMD, and received approval from the City of Sunnyvale Planning Department to develop the site with up to 260 three-story, at-grade townhouse units. A two-acre public park is planned to the southwest of the development.
Riding sold the site to John Laing Homes, who developed a few townhouses on the northern portion of the site. John Laing Homes filed bankruptcy in 2009. Sunnyvale Associates LLC purchased the site in 2011, and plans to develop it with up to 260 three-story, at-grade townhouse units. Private, traditional rear yards are not planned. Individual private open spaces consist of ground floor, at-grade garages, open concrete patios and small second floor decks. There will not be any individual private open space area consisting of planter areas of any type for each unit. The development also includes new landscaping, all of which will be common areas maintained by the Homeowner's Association.

The Regional Water Board is the lead agency overseeing the investigation and cleanup at this site and at several other facilities in the site vicinity.

Site Investigations
Several environmental investigations have been performed at the site. Limited soil sampling in 2004-2006 revealed minor detections of common pesticides, including Dieldrin, Endrin and DDT in shallow soil in the southern half of the site with some Dieldrin concentrations slightly above the Water Board's residential direct contact environmental screening level (ESL). More extensive soil sampling was performed in 2011by Sunnyvale Associates LLC in the same areas sampled previously, as well as in soil stockpiles located in the southern area. The 2011 soil sampling showed that the Dieldrin concentrations on site were below the ESL. The results of the 2011 and 2004-2006 soil testing were evaluated together in the proposed report, which has concluded that the risk from the residual Dieldrin in soil was insignificant and that the no further action alternative was appropriate.

The 2007 cleanup plan for the site determined that the low level concentrations of PCE and TCE in groundwater located beneath the eastern and northeastern portions of the site from offsite sources did not raise a health concern. However, the previous developer (John Laing Homes) proposed to voluntarily install vapor intrusion barriers beneath townhouse buildings located beneath the eastern and northeastern portions of at the site. Subsequent groundwater testing performed by others show that VOC concentrations continue to decrease due to the offsite remedial efforts of others and natural attenuation processes. The proposed report also evaluated the potential risk from groundwater and determined that it did not present a significant risk for indoor air intrusion.

Shallow groundwater beneath the site is not currently used for drinking or any other purpose. The City of Sunnyvale supplies drinking water to the site and the vicinity.

Previous Cleanup Activities
Two 10,000-gallon gasoline underground storage tanks (USTs) and one 280-gallon waste oil UST were removed from the service station property in 1997. Approximately 875 gallons of water were removed from the tank pits to help reduce residual fuel compounds in the groundwater. The most recent sampling event in 2007 did not reveal any residual fuel compounds in groundwater.

Proposed Case Closure
The proposed report concludes that based on additional soil sampling and risk assessment performed using the combined 2004-2006 and 2011 analytical data, current site environmental conditions show no significant risk from the pesticides in soil or VOCs in groundwater to future resident at this site. Therefore, in the proposed report, Sunnyvale Associates LLC has requested the Regional Water Board for no further action and case closure for

Site History:

The site was the headquarters of Advanced Micro Devices, Inc. (AMD), was a 32.5-acre property with two commercial buildings and paved parking lots formerly. The Property was formerly owned by Sunny Chip 14 LLC and Sunny Chip 15 LLC. As of August 2016, the Property is currently owned by 1090 East Duane Avenue LLC (1090 EDA, Irvine Company) and is leased to AMD. The Property will be redeveloped as residential with a City park. Apartments will consist of four walk-up buildings and one of four mid-rise buildings located at 1 AMD Place and 975 Stewart Drive. The townhomes will consist of 22 buildings with multiple three-story townhomes located at the remaining 1 AMD Place property and includes a park. The apartments and townhomes will be constructed with an active vapor intrusion mitigation system (VIMS). A phase I and phase II environmental site assessment were completed by Roux Associates (Roux) and the results are presented in a July 1, 2016 report. The investigation identified trichloroethylene (TCE), tetrachloroethylene (PCE) and associated volatile organic compounds (VOCs) in groundwater and soil vapor, which have been identified at other offsite sources in the area. Additional investigations have been completed in 2017 and also at 975 Stewart Drive, which the property owner acquired in 2016/2017. The Regional Water Board issued a July 15, 1994 Determination Letter confirming that VOCs in groundwater were not from releases at the site but migrated from offsite sources, and the recently re-affirmed this finding in an “Offsite Comfort Letter,” to 1090 EDA, dated October 24, 2016. Offsite sources have been identified as 999 Arques, CAE, and Texas Instruments. 999 Arques and CAE responsible party have requested well destructions on the 1 AMD property due to conflicts with the planned redevelopment. The Regional Water Board has responded and the correspondence is in the Geotracker case file for 999 Arques and CAE. Groundwater monitoring wells have been destroyed. On August 18, 2018 issued approval of the March 1, 2018, Site Management Plan (SMP) for properties at 1 AMD Place and 975 Stewart Drive and requested vapor intrusion mitigation system (VIMS) design and operation and maintenance plan (OMM). Public notice on the redevelopment activities was mailed to the surrounding properties in May 2018 and the only comments were from 999 Arques. On July 11, 2019, Water Board approved the VIMS design and OMM reports for the apartments and townhomes, the following technical reports are required: 1) VIMS design report for three mid-rise apartments will be submitted at a later date 2) Completion reports for each building that includes preoccupancy indoor air sampling results 3) Annual O&M monitoring reports for each building Roux Associates provided a redevelopment status update in March 2020 (see GeoTracker site documents). Grading for basements of low-rise buildings and the first mid-rise buildings in mid-March 2020. A separate GeoTracker page was made for the townhomes section of the development, Ov8tion, which has a different RP (Taylor Morrison).

Site History:

The site was the headquarters of Advanced Micro Devices, Inc. (AMD), was a 32.5-acre property with two commercial buildings and paved parking lots formerly. The Property was formerly owned by Sunny Chip 14 LLC and Sunny Chip 15 LLC. As of August 2016, the Property is currently owned by 1090 East Duane Avenue LLC (1090 EDA, Irvine Company) and is leased to AMD. The Property will be redeveloped as residential with a City park. Apartments will consist of four walk-up buildings and one of four mid-rise buildings located at 1 AMD Place and 975 Stewart Drive. The townhomes will consist of 22 buildings with multiple three-story townhomes located at the remaining 1 AMD Place property and includes a park. The apartments and townhomes will be constructed with an active vapor intrusion mitigation system (VIMS).

A phase I and phase II environmental site assessment were completed by Roux Associates (Roux) and the results are presented in a July 1, 2016 report. The investigation identified trichloroethylene (TCE), tetrachloroethylene (PCE) and associated volatile organic compounds (VOCs) in groundwater and soil vapor, which have been identified at other offsite sources in the area. Additional investigations have been completed in 2017 and also at 975 Stewart Drive, which the property owner acquired in 2016/2017.

The Regional Water Board issued a July 15, 1994 Determination Letter confirming that VOCs in groundwater were not from releases at the site but migrated from offsite sources, and the recently re-affirmed this finding in an "Offsite Comfort Letter," to 1090 EDA, dated October 24, 2016. Offsite sources have been identified as 999 Arques, CAE, and Texas Instruments.

999 Arques and CAE responsible party have requested well destructions on the 1 AMD property due to conflicts with the planned redevelopment. The Regional Water Board has responded and the correspondence is in the Geotracker case file for 999 Arques and CAE. Groundwater monitoring wells have been destroyed.

On August 18, 2018 issued approval of the March 1, 2018, Site Management Plan (SMP) for properties at 1 AMD Place and 975 Stewart Drive and requested vapor intrusion mitigation system (VIMS) design and operation and maintenance plan (OMM). Public notice on the redevelopment activities was mailed to the surrounding properties in May 2018 and the only comments were from 999 Arques.

On July 11, 2019, Water Board approved the VIMS design and OMM reports for the apartments and townhomes, the following technical reports are required:

1) VIMS design report for three mid-rise apartments will be submitted at a later date
2) Completion reports for each building that includes preoccupancy indoor air sampling results
3) Annual O&M monitoring reports for each building

Roux Associates provided a redevelopment status update in March 2020 (see GeoTracker site documents). Grading for basements of low-rise buildings and the first mid-rise buildings in mid-March 2020.

A separate GeoTracker page was made for the townhomes section of the development, Ov8tion, which has a different RP (Taylor Morrison).

GeoTracker Search - Cleanup Action Report (as of June 5, 2024)

Action Type: OTHER (USE DESCRIPTION FIELD)
Begin Date:
End Date:
Phase: Soil Vapor
Contaminant Mass Removed:
Description: A site management plan will be implemented once approved to address the potential vapor intrusion risks to future residents by installing VIMS beneath all residential buildings and an insitu soil treatment along the northern property boundary where the highest soil gas concentrations were detected. Construction is planned in 2018.

File Location: All Files are on GeoTracker or in the Local Agency Database
Site History:

Site has been redeveloped into multi-family residential. Concentrations of VOCs have been detected in soil vapor beneath the site. A remedial soil excavation was performed during development to remove heavy metals, pesticides, and petroleum range hydrocarbons from shallow soils. As of July 29, 2020 this case is out of compliance. A document describing the completion of earthwork activities has not been submitted. See DEH letter dated July 29, 2020.

Document Type: Phase 1
Date Completed: 12/30/2015
Comments: DTSC performed a site screening to determine whether any releases of hazardous substances or wastes have occurred at the site that require corrective actions. Volatile organic compounds were found in groundwater when initial sampling was performed in the 1980s. The site is in a region characterized by extensive shallow groundwater contaminated with TCE, 1,1,1-TCA, PCE, and other volatile organic compounds (VOCs). Proto Engineering submitted to RWQCB a Technical Review Report, dated March 2, 1998, that provided a detailed site history evaluation and an evaluation of copper and methylene chloride as potential indicators of VOC releases. Based on the Technical Review Report, the results of soil and groundwater sampling performed at the Site, and sampling data collected by other parties immediately upgradient and downgradient of the Site, RWQCB sent a letter to Proto Engineering, dated November 13, 1998, conveying that RWQCB concluded that VOCs in groundwater beneath the Site had migrated from upgradient sources and had not originated from the Site, and that Proto Engineering was not required to complete further investigation or cleanup at the Site.

Site History:

Texac Instruments Inc originally operated as National Semiconductor Corporation (NSC) as a developer and manufacturer of semiconductor components. NSC submitted a Part A application on 11/18/1980, received Interim Status on 03/30/1981, and submitted a Part B on 11/08/1988. After filing for a Variance in 1981 for their neutralization systems, NSC eventually received Conditional Authorization for their elementary neutralization system and authorization under Permit By Rule (PBR) for their heavy metals waste treatment system on 7/21/1995. NSC has since ceased operations of their PBR system and submitted a permit for a new elementary neutralization system under Conditional Authorization to replace their old one in 1997 as explained in their 06/21/1996 and 04/09/1997 letters.

Potential Contaminants of Concern:

Completed Activities

Title:	Site Screening
Title Link:	
Area Name:	
Area Link:	
Sub Area:	
Sub Area Link:	
Document Type:	Site Screening
Date Completed:	7/1/1991
Comments:	Site screening. Verbatim Microdisk operated a microdisk assembly at the site between 1983 and 1987.

Map Key	Number of Records	Direction	Distance (mi/ft)	Elev/Diff (ft)	Site	DB

Subsequently Sola/Barnes Hind have used the facility for administrative offices and research and development of contact lenses. During Verbatim's occupation, wastes stored in 'rated' storage included small quantities of various halogenated solvents, alcohol, methanol, ketones, and hexane. The wastes were transported and disposed at class 1 disposal sites when Verbatim moved out. Sola/Barnes Hind's operation involved use of small quantities of solvents and other hazardous chemicals. The wastes are stored in exterior fenced and bermed area and are routinely picked up and disposed offsite by safety specialists. The site has two interconnected aquifers underneath. The deeper one has been in use for drinking water in the surrounding area. Analysis of site soils to depths up to 36 feet has not revealed presence of solvents. The groundwater in the lower aquifer has shown presence of ICA. RWQCB has determined Signetics, an adjoining facility, as the source. No further remedial action planned. EPA PA completed.

FREON 113
VOLATILE ORGANICS (8260B VOCS)

Site History:

Signetics Corporation operated a semiconductor facility at the Site from 1970 to 1982. Various organic solvents were used in the manufacturing process at the Site. In 1982, Signetics finished site closure activities. Durings its site closure activities, Signetics discovered that chlorinated volatile organic compounds, possibly from a wastewater neutralization system had impacted groundwater. Groundwater extraction at the site began in 1983. The Regional Water Quality Control Board, San Francisco Bay Region adopted an Order for Site Cleanup in March 2006. The groundwater extraction system was shut down in 2009 with approval from RWQCB in favor of using natural attenuation as the remedial solution.

Comments: DTSC performed a site screening to determine whether any release of hazardous substances or wastes have occurred at the site that require corrective actions. The site has been overseen by the Regional Water Quality Control Board (RWQCB) since March 1996. The main contaminants of concern onsite were trichloroethylene; tetrachloroethylene; 1,2-dichloroethane; TCA; and freon, chloroform; 1,1-dichloroethene. Philips Electronics assumed full responsibility for meeting all cleanup requirements at the site. RWQCB rescinded its Site orders in December 2015.

ORGANOCHLORINE PESTICIDES (8081 OCPS)
PETROLEUM
POLYNUCLEAR AROMATIC HYDROCARBONS (PAHS)
PYDRIN
VOLATILE ORGANICS (8260B VOCS)

Site History:

Between 1930s to the 1960s, the Site was used for orchards. During the 1960s, the Site was graded and paved for recreational vehicle storage. In the 1980s, the Site was developed for semiconductor manufacturing and improved with the 63,000 square-foot building. Performance Semiconductor occupied the Site between 1983 and 2003 (NAC, 2000). Between 1995 and 2007, Analog Devices conducted the semiconductor manufacturing operations. In 2007, semiconductor manufacturing operations were ceased. The semiconductor building formerly contained: warehouse; offices; 16,000 square-foot semiconductor fabrication areas; cleanrooms; de-ionized water plant; boiler and chiller rooms; an acid neutralization system and wet sink facilities.

DIELDRIN

Site History:

The Site contains one office/industrial buildings and paved parking areas and associated landscaping. The Site had been used for agricultural purposes prior to the construction of the building in 1970s. Akashic Memories, Corp has operated at the Site from 1985 to about 1993. Akashic Memories Corp. submitted an initial notification of intent to operate a fixed treatment Unit under permit by rule in January 1992 and completed the onsite hazardous waste treatment notification form in March 1993 indicating neutralization system treating spent potassium hydroxide solution having a ph above 12.5. Closure plan for the facility was approved by the City of Santa Clara Fire Department in September 1993.

Soil sampling conducted as part of the proposed redevelopment in 2014 found elevated concentrations dieldrin in shallow soil. This Site is now a part of Lawrence Station Site (RB Case #: 43S1181) overseen by RWCQB and will be redeveloped as Lawrence Station Area Plan with mixed residential/commercial with public open space.

Sub Area Link:
Document Type: Technical Report
Date Completed: 9/20/1993
Comments: Akashic Memories Corporatlion closed the facility according to all applicable regulations and under the jurisdiction of the Santa Clara Fire Department. Air compressor oil had been released to a concrete pad and the soil directly beneath it. The concrete pad and approximately 50 tons of baserock and soil were excavated and disposed at off-site a permitted treatment and disposal facility and/or Class II landfill. All potentially hazardous debris was removed from the facility and disposed at permitted, off-site landfills.

TRICHLOROETHYLENE (TCE)

Site History:

The Site is located in Palo Alto, in very close proximity to the Texas Instruments property, which is a National Priorities List site overseen by San Francisco Bay Regional Water Quality Control Board and the US EPA. The Texas Instruments property is a known source of chlorinated solvents in groundwater, which could be potentially impacting soil vapor at the Site.

Former Site uses include agricultural lands, small residences and/or farm operations, and more recently development into commercial/industrial buildings in the 1970's, for use as offices, small machine shops, design and testing laboratory, and a college. Future redevelopment plans include multi-family residences. JV 08-2018

Title: Fourth Five Year Review Report
Title Link: https://www.envirostor.dtsc.ca.gov/public/final_documents2?global_id=43350001&doc_id=60413622
Area Name:
Area Link:
Sub Area:
Sub Area Link:
Document Type: Five-Year Review Reports
Date Completed: 8/23/2016
Comments: The United States Environmental Protection Agency, Region 9, approved the Fourth Five-Year Review Report and made the determination that the remedy at the Site currently protects human health and the environment because exposure pathways that could result in unacceptable risks are being controlled. However, in order for the remedy to be protective in the long-term, the planned Land Use Covenants for the main portion of the Site need to be recorded, the source of elevated polychlorinated biphenyls outside the Westinghouse property need to be investigated, and a groundwater remediation system evaluation needs to be conducted.

Title: 2013 Annual Land Use Restriction Inspection Report, North Parking Lot, Eastern Side

Title: Five-Year review
Title Link: https://www.envirostor.dtsc.ca.gov/public/final_documents2?global_id=43350001&doc_id=6012782
Area Name:
Area Link:
Sub Area:
Sub Area Link:
Document Type: Five-Year Review Reports
Date Completed: 10/4/2006
Comments: The U.S. Environmental Protection Agency finalized the Second Five-Year Review Report for the Site. Surface cracks that were visibly evident on the capping system at the Site were identified as an issue; however, it was noted that it was not affecting the protectiveness of the remedy, but could in the future. Continual cap inspections on a routine basis and repair of areas showing signs of deterioration were recommended. The Five-Year Review Report concluded that the remedy at the Site currently protects human health and the environment because routine cap inspections are conducted, groundwater extraction and treatment continues, and access controls are in place. However, in order for the remedy to be protective in the long-term, deed restrictions, as required by the 1991 Record of Decision should be completed for the Site.

VOLATILE ORGANICS (8260B VOCS)

Site History:

Three firms, all of which manufactured integrated circuits, operated on this site: Zoran Corporation, Synergy Semiconductor, and STC Computer Research. An underground storage tank was used to store various waste solvents between 1981 and 1985. The UST was removed in July 1985. In September 1986, three groundwater monitoring wells were installed and sampled semi-annually between 1986 and 1990. Various VOCs were detected in groundwater. Another groundwater monitoring well was installed in 1990. The wells were resampled in 2009 and the VOCs were at or below the ESLs. RWQCB issued a no further action letter in October 2009.

Comments: DTSC performed a site screening to determine whether any release of hazardous substances or wastes have occurred at the site that require corrective actions. The Regional Water Quality Control Board (RWQCB) has been overseeing investigation and cleanup activities at the site since January 20, 1988. The main contaminants of concern at the site were trichloroethene and other volatile organic compounds in groundwater. RWQCB identified Signetics as the discharger responsible for cleanup in its initial order. Philips acquired Signetics, and RWQCB identified Philips as the discharger responsible for cleanup in subsequent orders. The site was sold and converted into an apartment complex in 1989, and Philips has continued to work with the new owner and RWQCB in performing groundwater remediation.

Appendix: Database Descriptions

Environmental Risk Information Services (ERIS) can search the following databases. The extent of historical information varies with each database and current information is determined by what is publicly available to ERIS at the time of update. ERIS updates databases as set out in ASTM Standard E1527-13 and E1527-21, Section 8.1.8 Sources of Standard Source Information:

"Government information from nongovernmental sources may be considered current if the source updates the information at least every 90 days, or, for information that is updated less frequently than quarterly by the government agency, within 90 days of the date the government agency makes the information available to the public."

Standard Environmental Record Sources

Federal

National Priority List: NPL

Sites on the United States Environmental Protection Agency (EPA)'s National Priorities List of the most serious uncontrolled or abandoned hazardous waste sites identified for possible long-term remedial action under the Superfund program. The NPL, which EPA is required to update at least once a year, is based primarily on the score a site receives from EPA's Hazard Ranking System. A site must be on the NPL to receive money from the Superfund Trust Fund for remedial action. Sites are represented by boundaries where available in the EPA Superfund Site Boundaries maintained by the Shared Enterprise Geodata and Services (SEGS). Site boundaries represent the footprint of a whole site, the sum of all of the Operable Units and the current understanding of the full extent of contamination; for Federal Facility sites, the total site polygon may be the Facility boundary. Where there is no polygon boundary data available for a given site, the site is represented as a point.

Government Publication Date: Apr 22, 2024

National Priority List - Proposed: PROPOSED NPL

Sites proposed by the United States Environmental Protection Agency (EPA), the state agency, or concerned citizens for addition to the National Priorities List (NPL) due to contamination by hazardous waste and identified by the EPA as a candidate for cleanup because it poses a risk to human health and/or the environment. Sites are represented by boundaries where available in the EPA Superfund Site Boundaries maintained by the Shared Enterprise Geodata and Services (SEGS). Site boundaries represent the footprint of a whole site, the sum of all of the Operable Units and the current understanding of the full extent of contamination; for Federal Facility sites, the total site polygon may be the Facility boundary. Where there is no polygon boundary data available for a given site, the site is represented as a point.

Government Publication Date: Apr 22, 2024

Deleted NPL: DELETED NPL

Sites deleted from the United States Environmental Protection Agency (EPA)'s National Priorities List. The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate. Sites are represented by boundaries where available in the EPA Superfund Site Boundaries maintained by the Shared Enterprise Geodata and Services (SEGS). Site boundaries represent the footprint of a whole site, the sum of all of the Operable Units and the current understanding of the full extent of contamination; for Federal Facility sites, the total site polygon may be the Facility boundary. Where there is no polygon boundary data available for a given site, the site is represented as a point.

Government Publication Date: Apr 22, 2024

SEMS List 8R Active Site Inventory: SEMS

The U.S. Environmental Protection Agency's (EPA) Superfund Program has deployed the Superfund Enterprise Management System (SEMS), which integrates multiple legacy systems into a comprehensive tracking and reporting tool. This inventory contains active sites evaluated by the Superfund program that are either proposed to be or are on the National Priorities List (NPL) as well as sites that are in the screening and assessment phase for possible inclusion on the NPL. The Active Site Inventory Report displays site and location information at active SEMS sites. An active site is one at which site assessment, removal, remedial, enforcement, cost recovery, or oversight activities are being planned or conducted. This data includes SEMS sites from the List 8R Active file as well as applicable sites from the EPA's Facility Registry Service map tool.

Government Publication Date: May 22, 2024

Inventory of Open Dumps, June 1985: ODI

The Resource Conservation and Recovery Act (RCRA) provides for publication of an inventory of open dumps. The Act defines "open dumps" as facilities which do not comply with EPA's "Criteria for Classification of Solid Waste Disposal Facilities and Practices" (40 CFR 257).

Government Publication Date: Jun 1985

SEMS List 8R Archive Sites: SEMS ARCHIVE

The U.S. Environmental Protection Agency's (EPA) Superfund Enterprise Management System (SEMS) Archived Site Inventory displays site and location information at sites archived from SEMS. An archived site is one at which EPA has determined that assessment has been completed and no further remedial action is planned under the Superfund program at this time. This data includes sites from the List 8R Archived site file.

Government Publication Date: May 22, 2024

EPA Report on the Status of Open Dumps on Indian Lands: IODI

Public Law 103-399, The Indian Lands Open Dump Cleanup Act of 1994, enacted October 22, 1994, identified congressional concerns that solid waste open dump sites located on American Indian or Alaska Native (AI/AN) lands threaten the health and safety of residents of those lands and contiguous areas. The purpose of the Act is to identify the location of open dumps on Indian lands, assess the relative health and environment hazards posed by those sites, and provide financial and technical assistance to Indian tribal governments to close such dumps in compliance with Federal standards and regulations or standards promulgated by Indian Tribal governments or Alaska Native entities.

Government Publication Date: Dec 31, 1998

Comprehensive Environmental Response, Compensation and Liability Information System - CERCLIS: CERCLIS

Superfund is a program administered by the United States Environmental Protection Agency (EPA) to locate, investigate, and clean up the worst hazardous waste sites throughout the United States. CERCLIS is a database of potential and confirmed hazardous waste sites at which the EPA Superfund program has some involvement. It contains sites that are either proposed to be or are on the National Priorities List (NPL) as well as sites that are in the screening and assessment phase for possible inclusion on the NPL. The EPA administers the Superfund program in cooperation with individual states and tribal governments; this database is made available by the EPA.

Government Publication Date: Oct 25, 2013

CERCLIS - No Further Remedial Action Planned: CERCLIS NFRAP

An archived site is one at which EPA has determined that assessment has been completed and no further remedial action is planned under the Superfund program at this time. The Archive designation means that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list this site on the National Priorities List (NPL). This decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be a potential NPL site.

Government Publication Date: Oct 25, 2013

CERCLIS Liens: CERCLIS LIENS

A Federal Superfund lien exists at any property where EPA has incurred Superfund costs to address contamination ("Superfund site") and has provided notice of liability to the property owner. A Federal CERCLA ("Superfund") lien can exist by operation of law at any site or property at which EPA has spent Superfund monies. This database is made available by the United States Environmental Protection Agency (EPA). This database was provided by the United States Environmental Protection Agency (EPA). Refer to SEMS LIEN as the current data source for Superfund Liens.

Government Publication Date: Jan 30, 2014

RCRA CORRACTS-Corrective Action: RCRA CORRACTS

RCRA Info is the U.S. Environmental Protection Agency's (EPA) comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. At these sites, the Corrective Action Program ensures that cleanups occur. EPA and state regulators work with facilities and communities to design remedies based on the contamination, geology, and anticipated use unique to each site.

Government Publication Date: Apr 8, 2024

RCRA non-CORRACTS TSD Facilities: RCRA TSD

RCRA Info is the U.S. Environmental Protection Agency's (EPA) comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. This database includes Non-Corrective Action sites that have indicated engagement in the treatment, storage, or disposal of hazardous waste which requires a RCRA hazardous waste permit.

Government Publication Date: Apr 8, 2024

RCRA Generator List: RCRA LQG

RCRA Info is the U.S. Environmental Protection Agency's (EPA) comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. RCRA Info replaces the data recording and reporting abilities of the Resource Conservation and Recovery Information System (RCRIS) and the Biennial Reporting System (BRS). A hazardous waste generator is any person or site whose processes and actions create hazardous waste (see 40 CFR 260.10). Large Quantity Generators (LQGs) generate 1,000 kilograms per month or more of hazardous waste or more than one kilogram per month of acutely hazardous waste.

Government Publication Date: Apr 8, 2024

RCRA Small Quantity Generators List: RCRA SQG

RCRA Info is the U.S. Environmental Protection Agency's (EPA) comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. RCRA Info replaces the data recording and reporting abilities of the Resource Conservation and Recovery Information System (RCRIS) and the Biennial Reporting System (BRS). A hazardous waste generator is any person or site whose processes and actions create hazardous waste (see 40 CFR 260.10). Small Quantity Generators (SQGs) generate more than 100 kilograms, but less than 1,000 kilograms, of hazardous waste per month.

Government Publication Date: Apr 8, 2024

RCRA Very Small Quantity Generators List: RCRA VSQG

RCRA Info is the U.S. Environmental Protection Agency's (EPA) comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. A hazardous waste generator is any person or site whose processes and actions create hazardous waste (see 40 CFR 260.10). Very Small Quantity Generators (VSQG) generate 100 kilograms or less per month of hazardous waste, or one kilogram or less per month of acutely hazardous waste. Additionally, VSQG may not accumulate more than 1,000 kilograms of hazardous waste at any time.

Government Publication Date: Apr 8, 2024

RCRA Non-Generators: RCRA NON GEN

RCRA Info is the U.S. Environmental Protection Agency's (EPA) comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. RCRA Info replaces the data recording and reporting abilities of the Resource Conservation and Recovery Information System (RCRIS) and the Biennial Reporting System (BRS). A hazardous waste generator is any person or site whose processes and actions create hazardous waste (see 40 CFR 260.10). Non-Generators do not presently generate hazardous waste.

Government Publication Date: Apr 8, 2024

RCRA Sites with Controls: RCRA CONTROLS

List of Resource Conservation and Recovery Act (RCRA) facilities with institutional controls in place. RCRA gives the U.S. Environmental Protection Agency (EPA) the authority to control hazardous waste from the "cradle-to-grave." This includes the generation, transportation, treatment, storage, and disposal of hazardous waste. RCRA also set forth a framework for the management of non-hazardous solid wastes. The 1986 amendments to RCRA enabled EPA to address environmental problems that could result from underground tanks storing petroleum and other hazardous substances.

Government Publication Date: Apr 8, 2024

Federal Engineering Controls-ECs: FED ENG

List of Engineering controls (ECs) made availabe by the United States Environmental Protection Agency (EPA). ECs encompass a variety of engineered and constructed physical barriers (e.g., soil capping, sub-surface venting systems, mitigation barriers, fences) to contain and/or prevent exposure to contamination on a property. The EC listing includes remedy component data from Superfund decision documents for applicable sites on the final or deleted on the National Priorities List (NPL); and sites with a Superfund Alternative Approach (SAA) Agreement in place. The only sites included that are not on the NPL; proposed for NPL; or removed from proposed NPL, are those with an SAA Agreement in place.

Government Publication Date: Sep 25, 2024

Federal Institutional Controls- ICs: FED INST

List of Institutional controls (ICs) made available by the United States Environmental Protection Agency (EPA). ICs are non-engineered instruments, such as administrative and legal controls, that help minimize the potential for human exposure to contamination and/or protect the integrity of the remedy. Although it is EPA's expectation that treatment or engineering controls will be used to address principal threat wastes and that groundwater will be returned to its beneficial use whenever practicable, ICs play an important role in site remedies because they reduce exposure to contamination by limiting land or resource use and guide human behavior at a site. The IC listing includes remedy component data from Superfund decision documents for applicable sites on the final or deleted on the National Priorities List (NPL); and sites with a Superfund Alternative Approach (SAA) Agreement in place. The only sites included that are not on the NPL; proposed for NPL; or removed from proposed NPL, are those with an SAA Agreement in place.

Government Publication Date: Sep 25, 2024

Land Use Control Information System: LUCIS

The LUCIS database is maintained by the U.S. Department of the Navy and contains information for former Base Realignment and Closure (BRAC) properties across the United States.

Government Publication Date: Sep 1, 2006

Institutional Control Boundaries at NPL sites: NPL IC

Boundaries of Institutional Control areas at sites on the United States Environmental Protection Agency (EPA)'s National Priorities List, or Proposed or Deleted, made available by the EPA's Shared Enterprise Geodata and Services (SEGS). United States Environmental Protection Agency (EPA)'s National Priorities List of the most serious uncontrolled or abandoned hazardous waste sites identified for possible long-term remedial action under the Superfund program. Institutional controls are non-engineered instruments such as administrative and legal controls that help minimize the potential for human exposure to contamination and/or protect the integrity of the remedy.

Government Publication Date: Apr 22, 2024

Emergency Response Notification System: ERNS 1982 TO 1986

Database of oil and hazardous substances spill reports controlled by the National Response Center. The primary function of the National Response Center is to serve as the sole national point of contact for reporting oil, chemical, radiological, biological, and etiological discharges into the environment anywhere in the United States and its territories.

Government Publication Date: 1982-1986

Emergency Response Notification System: ERNS 1987 TO 1989

Database of oil and hazardous substances spill reports controlled by the National Response Center. The primary function of the National Response Center is to serve as the sole national point of contact for reporting oil, chemical, radiological, biological, and etiological discharges into the environment anywhere in the United States and its territories.

Government Publication Date: 1987-1989

Emergency Response Notification System: ERNS

Database of oil and hazardous substances spill reports made available by the United States Coast Guard National Response Center (NRC). The NRC fields initial reports for pollution and railroad incidents and forwards that information to appropriate federal/state agencies for response. These data contain initial incident data that has not been validated or investigated by a federal/state response agency.

Government Publication Date: Jul 14, 2024

The Assessment, Cleanup and Redevelopment Exchange System (ACRES) Brownfield Database: FED BROWNFIELDS

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties protects the environment, reduces blight, and takes development pressures off greenspaces and working lands. This data is provided by the United States Environmental Protection Agency (EPA) and includes Brownfield sites from the Cleanups in My Community (CIMC) web application.

Government Publication Date: Feb 7, 2024

FEMA Underground Storage Tank Listing: FEMA UST

The Federal Emergency Management Agency (FEMA) of the Department of Homeland Security maintains a list of FEMA owned underground storage tanks.

Government Publication Date: Dec 31, 2017

Facility Response Plan: FRP

This listing contains facilities that have submitted Facility Response Plans (FRPs) to the U.S. Environmental Protection Agency (EPA). Facilities that could reasonably be expected to cause "substantial harm" to the environment by discharging oil into or on navigable waters are required to prepare and submit FRPs. Harm is determined based on total oil storage capacity, secondary containment and age of tanks, oil transfer activities, history of discharges, proximity to a public drinking water intake or sensitive environments. This listing includes FRP facilities from an applicable EPA FOIA file and Homeland Infrastructure Foundation-Level Data (HIFLD) data file.

Government Publication Date: Jan 9, 2024

Delisted Facility Response Plans: DELISTED FRP

Facilities that once appeared in - and have since been removed from - the list of facilities that have submitted Facility Response Plans (FRP) to EPA. Facilities that could reasonably be expected to cause "substantial harm" to the environment by discharging oil into or on navigable waters are required to prepare and submit Facility Response Plans (FRPs). Harm is determined based on total oil storage capacity, secondary containment and age of tanks, oil transfer activities, history of discharges, proximity to a public drinking water intake or sensitive environments.

Government Publication Date: Jan 9, 2024

Historical Gas Stations: HIST GAS STATIONS

This historic directory of service stations is provided by the Cities Service Company. The directory includes Cities Service filling stations that were located throughout the United States in 1930.

Government Publication Date: Jul 1, 1930

Petroleum Refineries: REFN

This list of petroleum refineries is sourced from the U.S. Energy Information Administration (EIA), Refinery Capacity Report. The listing includes operating and idle petroleum refineries (including new refineries under construction) and refineries shut down during the previous year. The geographic area the report covers is the 50 States, the District of Columbia, Puerto Rico, the U.S. Virgin Islands, Guam, and other U.S. possessions. Per the EIA, the facility location data represents the approximate location based on research of publicly available information from sources such as Federal agencies, company websites, and satellite images on public websites.

Government Publication Date: Jun 6, 2024

Petroleum Product and Crude Oil Rail Terminals: BULK TERMINAL

A list of petroleum product and crude oil rail terminals from the U.S. Energy Information Administration (EIA), as well as petroleum terminals sourced from the Federal Communications Commission Data hosted by the Homeland Infrastructure Foundation-Level Database. Data includes operable bulk petroleum product terminals with a total bulk shell storage capacity of 50,000 barrels or more, and/or the ability to receive volumes from tanker, barge, or pipeline; also rail terminals handling the loading and unloading of crude oil with activity between 2017 and 2018. EIA petroleum product terminal data comes from the EIA-815 Bulk Terminal and Blender Report, which includes working, shell in operation, and shell idle for several major product groupings.

Government Publication Date: Jun 6, 2024

LIEN on Property: SEMS LIEN

The U.S. Environmental Protection Agency's (EPA) Superfund Enterprise Management System (SEMS) provides Lien details on applicable properties, such as the Superfund lien on property activity, the lien property information, and the parties associated with the lien.

Government Publication Date: May 22, 2024

Superfund Decision Documents: SUPERFUND ROD

This database contains a list of decision documents for Superfund sites. Decision documents serve to provide the reasoning for the choice of (or) changes to a Superfund Site cleanup plan. The decision documents include completed Records of Decision (ROD), ROD Amendments, Explanations of Significant Differences (ESD) for active and archived sites stored in the Superfund Enterprise Management System (SEMS), along with other associated memos and files. This information is maintained and made available by the U.S. Environmental Protection Agency.

Government Publication Date: Jul 24, 2024

Formerly Utilized Sites Remedial Action Program: DOE FUSRAP

The U.S. Department of Energy (DOE) established the Formerly Utilized Sites Remedial Action Program (FUSRAP) in 1974 to remediate sites where radioactive contamination remained from the Manhattan Project and early U.S. Atomic Energy Commission (AEC) operations. The DOE Office of Legacy Management (LM) established long-term surveillance and maintenance (LTS&M) requirements for remediated FUSRAP sites. DOE evaluates the final site conditions of a remediated site on the basis of risk for different future uses. DOE then confirms that LTS&M requirements will maintain protectiveness.

Government Publication Date: Mar 4, 2017

State

State Response Sites: RESPONSE

A list of identified confirmed release sites where the Department of Toxic Substances Control (DTSC) is involved in remediation, either in a lead or oversight capacity. These confirmed release sites are generally high-priority and high potential risk. This database is state equivalent NPL.

Government Publication Date: Jun 25, 2024

EnviroStor Database: ENVIROSTOR

The EnviroStor Data Management System is made available by the Department of Toxic Substances Control (DTSC). Includes Corrective Action sites, Tiered Permit sites, Historical Sites and Evaluation/Investigation sites. This database is state equivalent CERCLIS.

Government Publication Date: Jun 25, 2024

Delisted State Response Sites: DELISTED ENVS

Sites removed from the list of State Response Sites made available by the EnviroStor Data Management System, Department of Toxic Substances Control (DTSC).

Government Publication Date: Jun 25, 2024

Solid Waste Information System (SWIS): SWF/LF

The Solid Waste Information System (SWIS) database made available by the Department of Resources Recycling and Recovery (CalRecycle) contains information on solid waste facilities, operations, and disposal sites throughout the State of California. The types of facilities found in this database include landfills, transfer stations, material recovery facilities, composting sites, transformation facilities, waste tire sites, and closed disposal sites.

Government Publication Date: Aug 8, 2024

Solid Waste Disposal Sites with Waste Constituents Above Hazardous Waste Levels: SWRCB SWF

This is a list of solid waste disposal sites identified by California State Water Resources Control Board with waste constituents above hazardous waste levels outside the waste management unit.

Government Publication Date: Sep 20, 2006

Waste Management Unit Database: WMUD

The Waste Management Unit Database System tracks and inventories waste management units. CCR Title 27 contains criteria stating that Waste Management Units are classified according to their ability to contain wastes. Containment shall be determined by geology, hydrology, topography, climatology, and other factors relating to the ability of the Unit to protect water quality. Water Code Section 13273.1 requires that operators submit a water quality solid waste assessment test (SWAT) report to address leak status. The WMUDS was last updated by the State Water Resources control board in 2000.

Government Publication Date: Jan 1, 2000

EnviroStor Hazardous Waste Facilities: HWP

A list of hazardous waste facilities including permitted, post-closure and historical facilities found in the Department of Toxic Substances Control (DTSC) EnviroStor database.

Government Publication Date: Jun 25, 2024

Sites Listed in the Solid Waste Assessment Test (SWAT) Program Report: SWAT

In a 1993 Memorandum of Understanding, the State Water Resources Control Board (SWRCB) agreed to submit a comprehensive report on the Solid Waste Assessment Test (SWAT) Program to the California Integrated Waste Management Board (CIWMB). This report summarizes the work completed to date on the SWAT Program, and addresses both the impacts that leakage from solid waste disposal sites (SWDS) may have upon waters of the State and the actions taken to address such leakage.

Government Publication Date: Dec 31, 1995

Construction and Demolition Debris Recyclers: C&D DEBRIS RECY

This listing of Construction and Demolition Debris Recyclers is maintained by the California Intergrated Waste Management Board-common C&D materials include lumber, drywall, metals, masonry (brick, concrete, etc.), carpet, plastic, pipe, rocks, dirt, paper, cardboard, or green waste related to land development.

Government Publication Date: Jun 20, 2018

Recycling Centers: RECYCLING

This list of Certified Recycling Centers that are operating under the state of California's Beverage Container Recycling Program is maintained by the California Department of Resources Recycling and Recovery.

Government Publication Date: Oct 5, 2024

Listing of Certified Processors: PROCESSORS

This list of Certified Processors that are operating under the state of California's Beverage Container Recycling Program is maintained by the California Department of Resources Recycling and Recovery.

Government Publication Date: Oct 4, 2024

Listing of Certified Dropoff, Collection, and Community Service Programs: CONTAINER RECY

This list of Certified Dropoff, Collection, and Community Service Programs (non-buyback) operating under the state of California's Beverage Container Recycling Program is maintained by the California Department of Resources Recycling and Recovery.

Government Publication Date: Oct 5, 2024

Land Disposal Sites: LDS

Land Disposal Sites in GeoTracker, the State Water Resources Control Board (SWRCB)'s data management system. The Land Disposal program regulates of waste discharge to land for treatment, storage and disposal in waste management units. Waste management units include waste piles, surface impoundments, and landfills.

Government Publication Date: Jul 4, 2024

Leaking Underground Fuel Tank Reports: LUST

List of Leaking Underground Storage Tanks within the Cleanup Sites data in GeoTracker database. GeoTracker is the State Water Resources Control Board's (SWRCB) data management system for managing sites that impact groundwater, especially those that require groundwater cleanup (Underground Storage Tanks, Department of Defense and Site Cleanup Program) as well as permitted facilities such as operating Underground Storage Tanks. The Leak Prevention Program that overlooks LUST sites is the SWRCB in California's Environmental Protection Agency.

Government Publication Date: Jul 4, 2024

Delisted Leaking Storage Tanks: DELISTED LST

List of Leaking Underground Storage Tanks (LUST) cleanup sites removed from GeoTracker, the State Water Resources Control Board (SWRCB)'s database system, as well as sites removed from the SWRCB's list of UST Case closures.

Government Publication Date: Jul 22, 2024

Permitted Underground Storage Tank (UST) in GeoTracker: UST

List of Permitted Underground Storage Tank (UST) sites made available by the State Water Resources Control Board (SWRCB) in California's Environmental Protection Agency (EPA).

Government Publication Date: Jun 11, 2024

Proposed Closure of Underground Storage Tank Cases: UST CLOSURE

This listing includes Proposed Closure of Underground Storage Tank (UST) Cases which are being considered for closure by either the State Water Resources Control Board at a Future Board Meeting or the Executive Director that have been posted for a 60-day public comment period, and Closure of UST Cases with Closure Denials and Approved Orders. The lists are provided by the California Water Boards.

Government Publication Date: Jul 22, 2024

Historical Hazardous Substance Storage Information Database: HHSS

The Historical Hazardous Substance Storage database contains information collected in the 1980s from facilities that stored hazardous substances. The information was originally collected on paper forms, was later transferred to microfiche, and recently indexed as a searchable database. When using this database, please be aware that it is based upon self-reported information submitted by facilities which has not been independently verified. It is unlikely that every facility responded to the survey and the database should not be expected to be a complete inventory of all facilities that were operating at that time. This database is maintained by the California State Water Resources Control Board's (SWRCB) Geotracker.

Government Publication Date: Aug 27, 2015

Statewide Environmental Evaluation and Planning System: UST SWEEPS

The Statewide Environmental Evaluation and Planning System (SWEEPS) is a historical listing of active and inactive underground storage tanks made available by the California State Water Resources Control Board (SWRCB).

Government Publication Date: Oct 1, 1994

Aboveground Storage Tanks: AST

A statewide list from 2009 of aboveground storage tanks (ASTs) made available by the Cal FIRE Office of the State Fire Marshal (OSFM). This list is no longer maintained or updated by the Cal FIRE OSFM.

Government Publication Date: Aug 31, 2009

SWRCB Historical Aboveground Storage Tanks: AST SWRCB

A list of aboveground storage tanks made available by the California State Water Resources Control Board (SWRCB). Effective January 1, 2008, the Certified Unified Program Agencies (CUPAs) are vested with the responsibility and authority to implement the Aboveground Petroleum Storage Act (APSA).

Government Publication Date: Dec 1, 2007

Oil and Gas Facility Tanks: TANK OIL GAS

Locations of oil and gas tanks that fall under the jurisdiction of the Geologic Energy Management Division of the California Department of Conservation (CalGEM) (CCR 1760). CalGEM was formerly the Division of Oil, Gas, and Geothermal Resources (DOGGR).

Government Publication Date: Aug 7, 2024

Delisted Storage Tanks: DELISTED TNK

This database contains a list of storage tank sites that were removed by the State Water Resources Control Board (SWRCB) in California's Environmental Protection Agency (EPA) and the Cal FIRE Office of State Fire Marshal (OSFM).

Government Publication Date: Sep 13, 2024

California Environmental Reporting System (CERS) Tanks: CERS TANK

List of sites in the California Environmental Protection Agency (CalEPA) Regulated Site Portal which fall under the Aboveground Petroleum Storage and Underground Storage Tank regulatory programs. The CalEPA oversees the statewide implementation of the Unified Program which applies regulatory standards to protect Californians from hazardous waste and materials.

Government Publication Date: Jul 25, 2024

Delisted California Environmental Reporting System (CERS) Tanks: DELISTED CTNK

This database contains a list of Aboveground Petroleum Storage and Underground Storage Tank sites that were removed from in the California Environmental Protection Agency (CalEPA) Regulated Site Portal.

Government Publication Date: Jul 25, 2024

Historical Hazardous Substance Storage Container Information - Facility Summary: HIST TANK

The State Water Resources Control Board maintained the Hazardous Substance Storage Containers listing and inventory in th 1980s. This facility summary lists historic tank sites where the following container types were present: farm motor vehicle fuel tanks; waste tanks; sumps; pits, ponds, lagoons, and others; and all other product tanks. This set, published in May 1988, lists facility and owner information, as well as the number of containers. This data is historic and will not be updated.

Government Publication Date: May 27, 1988

Site Mitigation and Brownfields Reuse Program Facility Sites with Land Use Restrictions: LUR

The Department of Toxic Substances Control (DTSC) Site Mitigation and Brownfields Reuse Program (SMBRP) list includes sites cleaned up under the program's oversight and generally does not include current or former hazardous waste facilities that required a hazardous waste facility permit. The list represents land use restrictions that are active. Some sites have multiple land use restrictions.

Government Publication Date: Jun 25, 2024

CALSITES Database: CALSITES

This historical database was maintained by the Department of Toxic Substance Control (DTSC) for more than a decade. CALSITES contains information on Brownfield properties with confirmed or potential hazardous contamination. In 2006, DTSC introduced EnviroStor as the latest Brownfields site database.

Government Publication Date: May 1, 2004

Hazardous Waste Management Program Facility Sites with Deed / Land Use Restrictions: HLUR

The Department of Toxic Substances Control (DTSC) Hazardous Waste Management Program (HWMP) has developed a list of current or former hazardous waste facilities that have a recorded land use restriction at the local county recorder's office. The land use restrictions on this list were required by the DTSC HWMP as a result of the presence of hazardous substances that remain on site after the facility (or part of the facility) has been closed or cleaned up. The types of land use restriction include deed notice, deed restriction, or a land use restriction that binds current and future owners.

Government Publication Date: Feb 18, 2021

Deed Restrictions and Land Use Restrictions: DEED

List of Deed Restrictions, Land Use Restrictions and Covenants in GeoTracker made available by the State Water Resources Control Board (SWRCB) in California's Environmental Protection Agency. A deed restriction (land use covenant) may be required to facilitate the remediation of past environmental contamination and to protect human health and the environment by reducing the risk of exposure to residual hazardous materials.

Government Publication Date: Jul 4, 2024

Voluntary Cleanup Program: VCP

List of sites in the Voluntary Cleanup Program made available by the Department of Toxic Substances and Control (DTSC). The Voluntary Cleanup Program was designed to respond to lower priority sites. Under the Voluntary Cleanup Program, DTSC enters site-specific agreements with project proponents for DTSC oversight of site assessment, investigation, and/or removal or remediation activities, and the project proponents agree to pay DTSC's reasonable costs for those services.

Government Publication Date: Jun 25, 2024

GeoTracker Cleanup Program Sites: CLEANUP SITES

A list of Cleanup Program sites in the state of California made available by The State Water Resources Control Board (SWRCB) of the California Environmental Protection Agency (EPA). SWRCB tracks leaking underground storage tank cleanups as well as other water board cleanups.

Government Publication Date: Jul 4, 2024

Delisted Cleanup Program Sites: DELISTED CLEANUP

A list of Cleanup Program sites which were once included - and have since been removed from - the list of Cleanup Program Sites in GeoTracker. GeoTracker is the State Water Resource Control Boards' data management system for sites that impact, or have the potential to impact, water quality in California, with emphasis on groundwater.

Government Publication Date: Jul 4, 2024

Delisted County Records: DELISTED COUNTY

Records removed from county or CUPA databases. Records may be removed from the county lists made available by the respective county departments because they are inactive, or because they have been deemed to be below reportable thresholds.

Government Publication Date: Oct 1, 2024

Tribal

Leaking Underground Storage Tanks on Tribal/Indian Lands: INDIAN LUST

This list of leaking underground storage tanks (LUSTs) on Tribal/Indian Lands in Region 9, which includes California, is made available by the United States Environmental Protection Agency (EPA).

Government Publication Date: May 7, 2024

Underground Storage Tanks on Tribal/Indian Lands: INDIAN UST

This list of underground storage tanks (USTs) on Tribal/Indian Lands in Region 9, which includes California, is made available by the United States Environmental Protection Agency (EPA).

Government Publication Date: May 7, 2024

Delisted Tribal Leaking Storage Tanks: DELISTED INDIAN LST

Leaking Underground Storage Tank (LUST) facilities which once appeared on - and have since been removed from - the Regional Tribal/Indian LUST lists made available by the United States Environmental Protection Agency (EPA).

Government Publication Date: May 7, 2024

Delisted Tribal Underground Storage Tanks: DELISTED INDIAN UST

Underground Storage Tank (UST) facilities which once appeared on - and have since been removed from - the Regional Tribal/Indian UST lists made available by the United States Environmental Protection Agency (EPA).

Government Publication Date: May 7, 2024

County

Santa Clara County - Historic Solvent Case Listing: HSOL SANTACLARA

The Santa Clara Valley Water District was responsible for the oversight of solvent and toxic release cases and maintained a list of historic solvent cases in Santa Clara County.

Government Publication Date: Aug 22, 2016

Santa Clara County - Local Oversight Program Listing: LOP SANTACLARA

A list of Leaking Underground Storage Tanks (LUST) facilities in Santa Clara County Provided by Santa Clara Department of Environmental Health (DEH). Since July 1, 2004 the DEH has served as the oversight agency for investigations and clean-up of petroleum releases from underground storage tanks through implementation of the Local Oversight Program (LOP) contract with the State Water Resources Control Board.

Government Publication Date: Jun 14, 2017

Santa Clara County - Underground Storage Tanks: UST SANTACLARA

List of underground storage tanks made available by the County of Santa Clara's Hazardous Materials Compliance Division.

Government Publication Date: Jun 24, 2024

Santa Clara County - CUPA Facilities List: CUPA SANTACLARA

A list of facilities associated with various Certified Unified Program Agency (CUPA) programs in Santa Clara County. This list is made available by Santa Clara County Department of Environmental health (DEH). DEH's Hazardous Materials Compliance Division (HMCD) is CUPA for the county with jurisdiction within the Cities of Los Altos Hills, Monte Sereno, and Saratoga; and in all unincorporated areas of Santa Clara County, including Moffett Field, San Martin, and Stanford.

Government Publication Date: Mar 13, 2021

Santa Clara County - City of San Jose Hazardous Material Facilities: HAZ SANJOSE

A list of facilities with hazardous materials, including underground and aboveground tanks. This list is maintained by the City of San Jose Fire Department.

Government Publication Date: Oct 15, 2020

Santa Clara County - Gilroy City CUPA Facilities List: CUPA GILROY

The Gilroy City Fire Marshal's office maintains a list of CUPA Facilities located in Gilroy City.

Government Publication Date: Jun 3, 2022

Santa Clara County - Sunnyvale City CUPA List: CUPA SUNNYVALE

A list of facilities associated with various Certified Unified Program Agency (CUPA) programs in Sunnyvale City, Santa Clara County. This list is made available by the Fire Prevention & Hazardous Materials division of the Sunnyvale Department of Public Safety.

Government Publication Date: Jun 10, 2022

Additional Environmental Record Sources

Federal

PFAS Greenhouse Gas Emissions Data: PFAS GHG

The U.S. Environmental Protection Agency's Greenhouse Gas Reporting Program (GHGRP) collects Greenhouse Gas (GHG) data from large emitting facilities (25,000 metric tons of carbon dioxide equivalent (CO2e) per year), and suppliers of fossil fuels and industrial gases that results in GHG emissions when used. Includes GHG emissions data for facilities that emit or have emitted since 2010 chemicals identified in EPA's CompTox Chemicals Dashboard list of PFAS without explicit structures and list of PFAS structures by DSSTox. PFAS emissions data has been identified for facilities engaged in the following industrial processes: Aluminum Production (GHGRP Subpart F), HCFC-22 Production and HFC-23 Destruction (Subpart O), Electronics Manufacturing (Subpart I), Fluorinated Gas Production (Subpart L), Magnesium Production (Subpart T), Electrical Transmission and Distribution Equipment Use (Subpart DD), and Manufacture of Electric Transmission and Distribution Equipment (Subpart SS). Over time, other industrial processes with required GHGRP reporting may include PFAS emissions data and the list of reportable gases may change over time.

Government Publication Date: Aug 5, 2024

On-Scene Coordinator Response Sites: OSC RESPONSE

This list of On-Scene Coordinator (OSC) Response Sites is provided by the U.S. Environmental Protection Agency (EPA). OSCs are the federal officials responsible for monitoring or directing responses to all oil spills and hazardous substance releases reported to the federal government. OSCs coordinate all federal efforts with, and provide support and information to local, state, and regional response communities. An OSC is an agent of either EPA or the U.S. Coast Guard (USCG), depending on where the incident occurs. EPA's OSCs have primary responsibility for spills and releases to inland areas and waters. USCG OSCs have responsibility for coastal waters and the Great Lakes. In general, an OSC has the following key responsibilities during and after a response: Assessment, Monitoring, Response Assistance, and Evaluation.

Government Publication Date: Apr 4, 2024

Facility Registry Service/Facility Index: FINDS/FRS

The Facility Registry Service (FRS) is a centrally managed database that identifies facilities, sites, or places subject to environmental regulations or of environmental interest. FRS creates high-quality, accurate, and authoritative facility identification records through rigorous verification and management procedures that incorporate information from program national systems, state master facility records, and data collected from EPA's Central Data Exchange registrations and data management personnel. This list is made available by the U.S. Environmental Protection Agency (EPA).

Government Publication Date: Aug 1, 2024

Toxics Release Inventory (TRI) Program: TRIS

The U.S. Environmental Protection Agency's Toxics Release Inventory (TRI) is a database containing data on disposal or other releases of toxic chemicals from U.S. facilities and information about how facilities manage those chemicals through recycling, energy recovery, and treatment. There are currently 770 individually listed chemicals and 33 chemical categories covered by the TRI Program. Facilities that manufacture, process or otherwise use these chemicals in amounts above established levels must submit annual reporting forms for each chemical. Note that the TRI chemical list does not include all toxic chemicals used in the U.S. One of TRI's primary purposes is to inform communities about toxic chemical releases to the environment. This database includes TRI Reporting Data for calendar years 1987 through 2021 and Preliminary Data for 2022.

Government Publication Date: Sep 20, 2023

PFOA/PFOS Contaminated Sites: PFAS NPL

This list of Superfund Sites with Per- and Polyfluoroalkyl Substances (PFAS) detections is made available by the U.S. Environmental Protection Agency (EPA) in their PFAS Analytic Tools data, previously the list was obtained by EPA FOIA requests. EPA's Office of Land and Emergency Management and EPA Regional Offices maintain what is known about site investigations, contamination, and remedial actions under the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA) where PFAS is present in the environment. Limitations: Detections of PFAS at National Priorities List (NPL) sites do not mean that people are at risk from PFAS, are exposed to PFAS, or that the site is the source of the PFAS. The information in the Superfund NPL and Superfund Alternative Agreement (SAA) PFAS detection site list is years old and may not be accurate today. Site information such as site name, site ID, and location has been confirmed for accuracy; however, PFAS-related information such as media sampled, drinking water being above the health advisory, or mitigation efforts has not been verified. For Federal Facilities data, the other Federal agencies (OFA) are the lead agency for their data and provided them to EPA.

Government Publication Date: Sep 18, 2024

Federal Agency Locations with Known or Suspected PFAS Detections: PFAS FED SITES

List of Federal agency locations with known or suspected detections of Per- and Polyfluoroalkyl Substances (PFAS), made available by the U.S. Environmental Protection Agency (EPA) in their PFAS Analytic Tools data. EPA outlines that these data are gathered from several federal entities, such as the Federal Superfund program, Department of Defense (DOD), National Aeronautics and Space Administration, Department of Transportation, and Department of Energy. The dates this data was extracted for the PFAS Analytic Tools range from 2022 to 2024. Sites on this list do not necessarily reflect the source/s of PFAS contamination and detections do not indicate level of risk or human exposure at the site. Agricultural notifications in this data are limited to DOD sites only. At this time, the EPA is aware that this list is not comprehensive of all Federal agencies.

Government Publication Date: Apr 1, 2024

SSEHRI PFAS Contamination Sites: PFAS SSEHRI

This PFAS Contamination Site Tracker database is compiled by the PFAS Project Lab, part of the Social Science Environmental Health Research Institute (SSEHRI) at Northeastern University. According to the SSEHRI, the database records qualitative and quantitative data from each known site of PFAS contamination, including timeline of discovery, sources, levels, health impacts, community response, and government response. The goal of this database is to compile information and support public understanding of the rapidly unfolding issue of PFAS contamination. All data presented was extracted from government websites, news articles, or publicly available documents. Locations for the Known PFAS Contamination Sites are sourced from the PFAS Sites and Community Resources Map by the PFAS-REACH team, credited to PFAS Project Lab, Silent Spring Institute, and PFAS Exchange. Disclaimer: The source conveys the data undergoes regular updates as new information becomes available, some sites may be missing and/or contain information that is incorrect or outdated, as well as their information represents all contamination sites SSEHRI is aware of, not all possible contamination sites. This data is not intended to be used for legal purposes. Access the following source link for the most current information: https://pfasproject.com/pfas-sites-and-community-resources/

Government Publication Date: Jun 27, 2024

National Response Center PFAS Spills: ERNS PFAS

This Per- and Poly-Fluoroalkyl Substances (PFAS) Spills dataset is made available via the U.S. Environmental Protection Agency's (EPA) PFAS Analytic Tools. The National Response Center (NRC), operated by the U.S. Coast Guard, is the designated federal point of contact for reporting all oil, chemical, and other discharges into the environment, for the United States and its territories. This dataset contains NRC spill information from 1990 to the present that is restricted to records associated with PFAS and PFAS-containing materials. Incidents are filtered to include only records with a "Material Involved" or "Incident Description" related to Aqueous Film Forming Foam (AFFF). The keywords used to filter the data included "AFFF," "Fire Fighting Foam," "Aqueous Film Forming Foam," "Fire Suppressant Foam, "PFAS," "PERFL," "PFOA," "PFOS," and "Genx." Limitations: The data from the NRC website contains initial incident data that has not been validated or investigated by a federal/state response agency. Keyword searches may misidentify some incident reports that do not contain PFAS. This dataset should also not be considered to be exhaustive of all PFAS spills/release incidents.

Government Publication Date: Aug 5, 2024

PFAS NPDES Discharge Monitoring: PFAS NPDES

This list of National Pollutant Discharge Elimination System (NPDES) permitted facilities with required monitoring for Per- and Polyfluoroalkyl (PFAS) Substances is made available via the U.S. Environmental Protection Agency (EPA)'s PFAS Analytic Tools. Any point-source wastewater discharger to waters of the United States must have a NPDES permit, which defines a set of parameters for pollutants and monitoring to ensure that the discharge does not degrade water quality or impair human health. This list includes NPDES permitted facilities associated with permits that monitor for Per- and Polyfluoroalkyl Substances (PFAS), limited to the years 2007 - present. EPA further advises the following regarding these data: currently, fewer than half of states have required PFAS monitoring for at least one of their permittees, and fewer states have established PFAS effluent limits for permittees. For states that may have required monitoring, some reporting and data transfer issues may exist on a state-by-state basis.

Government Publication Date: Jul 29, 2024

Perfluorinated Alkyl Substances (PFAS) from Toxic Release Inventory: PFAS TRI

List of Toxics Release Inventory (TRI) facilities at which the reported chemical is a per- or polyfluoroalkyl (PFAS) substance included in the U.S. Environmental Protection Agency's (EPA) consolidated PFAS Master List of PFAS Substances. Encompasses Toxics Release Inventory records included in the EPA PFAS Analytic Tools. The EPA's TRI database currently tracks information on disposal or releases of 770 individually listed toxic chemicals and 33 chemical categories from thousands of U.S. facilities and details about how facilities manage those chemicals through recycling, energy recovery, and treatment. This listing includes TRI Reporting Data for calendar years 1987 through 2021 and Preliminary Data for 2022.

Government Publication Date: Sep 20, 2023

PFAS Water Quality Portal Sampling Data: PFAS WATER

This Per- and Poly-Fluoroalkyl Substances (PFAS) Environmental Media Sampling Data is made available via the U.S. Environmental Protection Agency's (EPA) PFAS Analytic Tools. The Water Quality Portal (WQP), as a cooperative service sponsored by the United States Geological Survey, the EPA, and the National Water Quality Monitoring Council, is part of a modernized repository storing ambient sampling data for all environmental media and tissue samples. A wide range of federal, state, tribal and local governments, academic and non-governmental organizations, and individuals submit project details and sampling results to this public repository. Limitations: EPA did not carry out the sampling or testing of a majority of the data in the WQP PFAS dataset. EPA can only speak to the accuracy and completeness of the data from projects like the National Aquatic Resource Surveys for which EPA is the data owner/organization. Data may exist within the file on Quality Assurance Project Plans (QAPPs) and the approving agency of the QAPP, if a QAPP is entered.

Government Publication Date: Jul 22, 2024

PFAS TSCA Manufacture and Import Facilities: PFAS TSCA

The U.S. Environmental Protection Agency (EPA) issued the Chemical Data Reporting (CDR) Rule under the Toxic Substances Control Act (TSCA) and requires chemical manufacturers and facilities that manufacture or import chemical substances to report data to EPA. This list is specific only to TSCA Manufacture and Import Facilities with reported per- and poly-fluoroalkyl (PFAS) substances. Data file is sourced from EPA's PFAS Analytic Tools TSCA dataset which includes CDR/Inventory Update Reporting data from 1998 up to 2020. Disclaimer: This data file includes production and importation data for chemicals identified in EPA's CompTox Chemicals Dashboard list of PFAS without explicit structures and list of PFAS structures in DSSTox. Note that some regulations have specific chemical structure requirements that define PFAS differently than the lists in EPA's CompTox Chemicals Dashboard. Reporting information on manufactured or imported chemical substance amounts should not be compared between facilities, as some companies claim Chemical Data Reporting Rule data fields for PFAS information as Confidential Business Information.

Government Publication Date: Jan 5, 2023

PFAS Waste Transfers from RCRA e-Manifest : PFAS E-MANIFEST

This Per- and Poly-Fluoroalkyl Substances (PFAS) Waste Transfers dataset is made available via the U.S. Environmental Protection Agency's (EPA) PFAS Analytic Tools. Every shipment of hazardous waste in the U.S. must be accompanied by a shipment manifest, which is a critical component of the cradle-to-grave tracking of wastes mandated by the Resource Conservation and Recovery Act (RCRA). According to the EPA, currently no Federal Waste Code exists for any PFAS compounds. To work around the lack of PFAS waste codes in the RCRA database, EPA developed the PFAS Transfers dataset by mining e-Manifest records containing at least one of these common PFAS keywords: • PFAS • PFOA • PFOS • PERFL • AFFF • GENX • GEN-X (plus the Vermont state-specific waste codes). Limitations: Amount or concentration of PFAS being transferred cannot be determined from the manifest information. Keyword searches may misidentify some manifest records that do not contain PFAS. This dataset should also not be considered to be exhaustive of all PFAS waste transfers.

Government Publication Date: Jul 23, 2024

PFAS Industry Sectors: PFAS IND

This Per- and Poly-Fluoroalkyl Substances (PFAS) Industry Sectors dataset is made available via the U.S. Environmental Protection Agency's (EPA) PFAS Analytic Tools. The EPA developed the dataset from various sources that show which industries may be handling PFAS including: EPA's Enforcement and Compliance History Online (ECHO) records restricted to potential PFAS-handling industry sectors; ECHO records for Fire Training Sites identified where fire-fighting foam may have been used in training exercises; and 14 CFR Part 139 Airports compiled from historic and current records from the FAA Airport Data and Information Portal. Since July 2006, all certificated Part 139 Airports are required to have fire-fighting foam onsite that meet certain military specifications, which to date have been fluorinated (Aqueous Film Forming Foam). Limitations: Inclusion in this dataset does not indicate that PFAS are being manufactured, processed, used, or released by the facility. Listed facilities potentially handle PFAS based on their industrial profile, but are unconfirmed by the EPA. Keyword searches in ECHO for Fire Training sites may misidentify some facilities and should not be considered to be an exhaustive list of fire training facilities in the U.S.

Government Publication Date: Sep 23, 2024

Hazardous Materials Information Reporting System: HMIRS

The Hazardous Materials Incident Reporting System (HMIRS) database contains unintentional hazardous materials release information reported to the U.S. Department of Transportation, Pipeline and Hazardous Materials Safety Administration.

Government Publication Date: May 29, 2024

National Clandestine Drug Labs: NCDL

The U.S. Department of Justice ("the Department"), Drug Enforcement Administration (DEA), provides this data as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy.

Government Publication Date: Nov 30, 2023

Toxic Substances Control Act: TSCA

The U.S. Environmental Protection Agency (EPA) is amending the Toxic Substances Control Act (TSCA) section 8(a) Inventory Update Reporting (IUR) rule and changing its name to the Chemical Data Reporting (CDR) rule. The CDR enables EPA to collect and publish information on the manufacturing, processing, and use of commercial chemical substances and mixtures (referred to hereafter as chemical substances) on the TSCA Chemical Substance Inventory (TSCA Inventory). This includes current information on chemical substance production volumes, manufacturing sites, and how the chemical substances are used. This information helps the Agency determine whether people or the environment are potentially exposed to reported chemical substances. EPA publishes submitted CDR data that is not Confidential Business Information (CBI). EPA CDR collections occur approximately every four years and reporting requirements change per collection.

Government Publication Date: May 12, 2022

Hist TSCA: HIST TSCA

The Environmental Protection Agency (EPA) is amending the Toxic Substances Control Act (TSCA) section 8(a) Inventory Update Reporting (IUR) rule and changing its name to the Chemical Data Reporting (CDR) rule.
The 2006 IUR data summary report includes information about chemicals manufactured or imported in quantities of 25,000 pounds or more at a single site during calendar year 2005. In addition to the basic manufacturing information collected in previous reporting cycles, the 2006 cycle is the first time EPA collected information to characterize exposure during manufacturing, processing and use of organic chemicals. The 2006 cycle also is the first time manufacturers of inorganic chemicals were required to report basic manufacturing information.

Government Publication Date: Dec 31, 2006

FTTS Administrative Case Listing: FTTS ADMIN

An administrative case listing from the Federal Insecticide, Fungicide, & Rodenticide Act (FIFRA) and Toxic Substances Control Act (TSCA), together known as FTTS. This database was obtained from the Environmental Protection Agency's (EPA) National Compliance Database (NCDB). The FTTS and NCDB was shut down in 2006.

Government Publication Date: Jan 19, 2007

FTTS Inspection Case Listing: FTTS INSP

An inspection case listing from the Federal Insecticide, Fungicide, & Rodenticide Act (FIFRA) and Toxic Substances Control Act (TSCA), together known as FTTS. This database was obtained from the Environmental Protection Agency's (EPA) National Compliance Database (NCDB). The FTTS and NCDB was shut down in 2006.

Government Publication Date: Jan 19, 2007

Potentially Responsible Parties List: PRP

Early in the site cleanup process, the U.S. Environmental Protection Agency (EPA) conducts a search to find the Potentially Responsible Parties (PRPs). The EPA looks for evidence to determine liability by matching wastes found at the site with parties that may have contributed wastes to the site. This listing contains PRPs, Noticed Parties, at sites in the EPA's Superfund Enterprise Management System (SEMS).

Government Publication Date: Jul 24, 2024

State Coalition for Remediation of Drycleaners Listing: SCRD DRYCLEANER

The State Coalition for Remediation of Drycleaners (SCRD) was established in 1998, with support from the U.S. Environmental Protection Agency (EPA) Office of Superfund Remediation and Technology Innovation. Coalition members are states with mandated programs and funding for drycleaner site remediation. Current members are Alabama, Connecticut, Florida, Illinois, Kansas, Minnesota, Missouri, North Carolina, Oregon, South Carolina, Tennessee, Texas, and Wisconsin. Since 2017, the SCRD no longer maintains this data, refer to applicable state source data where available.

Government Publication Date: Nov 08, 2017

Integrated Compliance Information System (ICIS): ICIS

The Integrated Compliance Information System (ICIS) database contains integrated enforcement and compliance information across most of U.S. Environmental Protection Agency's (EPA) programs. The vision for ICIS is to replace EPA's independent databases that contain enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions and a subset of the Permit Compliance System (PCS), which supports the National Pollutant Discharge Elimination System (NPDES). This information is maintained by the EPA Headquarters and at the Regional offices. A future release of ICIS will completely replace PCS and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities that support compliance and enforcement programs, including incident tracking, compliance assistance, and compliance monitoring.

Government Publication Date: Apr 13, 2024

Drycleaner Facilities: FED DRYCLEANERS

A list of drycleaner facilities from Enforcement and Compliance History Online (ECHO) data as made available by the U.S. Environmental Protection Agency (EPA), sourced from the ECHO Exporter file. The EPA tracks facilities that possess NAIC and SIC codes that classify businesses as drycleaner establishments.

Government Publication Date: May 5, 2024

Delisted Drycleaner Facilities: DELISTED FED DRY

List of sites removed from the list of Drycleaner Facilities (sites in the EPA's Integrated Compliance Information System (ICIS) with NAIC or SIC codes identifying the business as a drycleaner establishment).

Government Publication Date: May 5, 2024

Formerly Used Defense Sites: FUDS

Formerly Used Defense Sites (FUDS) are properties that were formerly owned by, leased to, or otherwise possessed by and under the jurisdiction of the Secretary of Defense prior to October 1986, where the Department of Defense (DOD) is responsible for an environmental restoration. The FUDS Annual Report to Congress (ARC) is published by the U.S. Army Corps of Engineers (USACE). This data is compiled from the USACE's Geospatial FUDS data layers and Homeland Infrastructure Foundation-Level Data (HIFLD) FUDS dataset which applies to the Fiscal Year 2021 FUDS Inventory.

Government Publication Date: May 15, 2023

FUDS Munitions Response Sites: FUDS MRS

Boundaries of Munitions Response Sites (MRS), published with the Formerly Used Defense Sites (FUDS) Annual Report to Congress (ARC) by the U.S. Army Corps of Engineers (USACE). An MRS is a discrete location within a Munitions response area (MRA) that is known to require a munitions response. An MRA means any area on a defense site that is known or suspected to contain unexploded ordnance (UXO), discarded military munitions (DMM), or munitions constituents (MC). This data is compiled from the USACE's Geospatial MRS data layers and Homeland Infrastructure Foundation-Level Data (HIFLD) MRS dataset.

Government Publication Date: May 15, 2023

Former Military Nike Missile Sites: FORMER NIKE

This information was taken from report DRXTH-AS-IA-83A016 (Historical Overview of the Nike Missile System, 12/1984) which was performed by Environmental Science and Engineering, Inc. for the U.S. Army Toxic and Hazardous Materials Agency Assessment Division. The Nike system was deployed between 1954 and the mid-1970's. Among the substances used or stored on Nike sites were liquid missile fuel (JP-4); starter fluids (UDKH, aniline, and furfuryl alcohol); oxidizer (IRFNA); hydrocarbons (motor oil, hydraulic fluid, diesel fuel, gasoline, heating oil); solvents (carbon tetrachloride, trichloroethylene, trichloroethane, stoddard solvent); and battery electrolyte. The quantities of material a disposed of and procedures for disposal are not documented in published reports. Virtually all information concerning the potential for contamination at Nike sites is confined to personnel who were assigned to Nike sites. During deactivation most hardware was shipped to depot-level supply points. There were reportedly instances where excess materials were disposed of on or near the site itself at closure. There was reportedly no routine site decontamination.

Government Publication Date: Dec 2, 1984

PHMSA Pipeline Safety Flagged Incidents: PIPELINE INCIDENT

This list of flagged pipeline incidents is made available by the U.S. Department of Transportation (US DOT) Pipeline and Hazardous Materials Safety Administration (PHMSA). PHMSA regulations require incident and accident reports for five different pipeline system types. Accidents reported on hazardous liquid gravity lines (§195.13) and reporting-regulated-only hazardous liquid gathering lines (§195.15) and incidents reported on Type R gas gathering (§192.8(c)) are not included in the flagged incident file data.

Government Publication Date: May 6, 2024

Material Licensing Tracking System (MLTS): MLTS

A list of sites that store radioactive material subject to the Nuclear Regulatory Commission (NRC) licensing requirements. This list is maintained by the NRC. As of September 2016, the NRC no longer releases location information for sites. Site locations were last received in July 2016.

Government Publication Date: May 11, 2021

Historic Material Licensing Tracking System (MLTS) sites: HIST MLTS

A historic list of sites that have inactive licenses and/or removed from the Material Licensing Tracking System (MLTS). In some cases, a site is removed from the MLTS when the state becomes an "Agreement State". An Agreement State is a State that has signed an agreement with the Nuclear Regulatory Commission (NRC) authorizing the State to regulate certain uses of radioactive materials within the State.

Government Publication Date: Jan 31, 2010

Mines Master Index File: MINES

The Master Index File (MIF) is provided by the United States Department of Labor, Mine Safety and Health Administration (MSHA). This file, which was originally created in the 1970's, contained many Mine-IDs that were invalid. MSHA removes invalid IDs from the MIF upon discovery. MSHA applicable data includes the following: all Coal and Metal/Non-Metal mines under MSHA's jurisdiction since 1/1/1970; mine addresses for all mines in the database except for Abandoned mines prior to 1998 from MSHA's legacy system (addresses may or may not correspond with the physical location of the mine itself); violations that have been assessed penalties as a result of MSHA inspections beginning on 1/1/2000; and violations issued as a result of MSHA inspections conducted beginning on 1/1/2000.

Government Publication Date: Feb 5, 2024

Surface Mining Control and Reclamation Act Sites: SMCRA

This inventory of land and water impacted by past mining (primarily legacy coal mining operations) is maintained by the U.S. Department of the Interior's Office of Surface Mining Reclamation and Enforcement (OSMRE), as it provides information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). This inventory contains information on the type and extent of Abandoned Mine Land (AML) Problems, as well as information on the cost associated with the reclamation of those problems. The data is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed. Disclaimer: Per the OSMRE, States and tribes who enter their data into e-AMLIS (AML Inventory System) may truncate their latitude and longitude so the precise location of usually dangerous AMLs is not revealed in an effort to protect the public from searching for these AMLs, most of which are on private property. If more precise location information is needed, please contact the applicable state/tribe of interest.

Government Publication Date: May 20, 2024

Mineral Resource Data System: MRDS

The Mineral Resource Data System (MRDS) is a collection of reports describing metallic and nonmetallic mineral resources throughout the world. Included are deposit name, location, commodity, deposit description, geologic characteristics, production, reserves, resources, and references. This database contains the records previously provided in the Mineral Resource Data System (MRDS) of USGS and the Mineral Availability System/Mineral Industry Locator System (MAS/MILS) originated in the U.S. Bureau of Mines, which is now part of USGS. The USGS has ceased systematic updates of the MRDS database with their focus more recently on deposits of critical minerals while providing a well-documented baseline of historical mine locations from USGS topographic maps.

Government Publication Date: Mar 15, 2016

DOE Legacy Management Sites: LM SITES

The U.S. Department of Energy (DOE) Office of Legacy Management (LM) currently manages radioactive and chemical waste, environmental contamination, and hazardous material at over 100 sites across the U.S. The LM manages sites with diverse regulatory drivers (statutes or programs that direct cleanup and management requirements at DOE sites) or as part of internal DOE or congressionally-recognized programs, such as but not limited to: Formerly Utilized Sites Remedial Action Program (FUSRAP), Uranium Mill Tailings Radiation Control Act (UMTRCA Title I, Tile II), Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA), Resource Conservation and Recovery Act (RCRA), Decontamination and Decommissioning (D&D), Nuclear Waste Policy Act (NWPA). This site listing includes data exported from the DOE Office of LM's Geospatial Environmental Mapping System (GEMS). GEMS Data disclaimer: The DOE Office of LM makes no representation or warranty, expressed or implied, regarding the use, accuracy, availability, or completeness of the data presented herein.

Government Publication Date: Dec 12, 2023

Alternative Fueling Stations: ALT FUELS

This list of alternative fueling stations is sourced from the Alternative Fuels Data Center (AFDC). The U.S. Department of Energy's Office of Energy Efficiency & Renewable Energy launched the AFDC in 1991 as a repository for alternative fuel vehicle performance data, which provides a wealth of information and data on alternative and renewable fuels, advanced vehicles, fuel-saving strategies, and emerging transportation technologies. The data includes Biodiesel (B20 and above), Compressed Natural Gas (CNG), Electric, Ethanol (E85), Hydrogen, Liquefied Natural Gas (LNG), Propane (LPG), and Renewable Diesel (R20 and above) fuel type locations.

Government Publication Date: Aug 29, 2024

Superfunds Consent Decrees: CONSENT DECREES

This list of Superfund consent decrees is provided by the Department of Justice, Environment & Natural Resources Division (ENRD) through a Freedom of Information Act (FOIA) applicable file. This listing includes Cases filed since 2010 limited to the following: Consent Decrees for CERCLA or Superfund Sites filed and/or as proposed within the ENRD's Case Management System (CMS); and applicable ENRD's Environmental Defense Section (EDS) CERCLA Cases with "Consent" in History Note. CMS may not reflect the latest developments in a case, nor can the agency guarantee the accuracy of the data. ENRD Disclaimer: Congress excluded three discrete categories of law enforcement and national security records from the requirements of the FOIA; response is limited to those records that are subject to the requirements of the FOIA; however, this should not be taken as an indication that excluded records do, or do not, exist.

Government Publication Date: Jun 26, 2024

Air Facility System: AFS

This EPA retired Air Facility System (AFS) dataset contains emissions, compliance, and enforcement data on stationary sources of air pollution. Regulated sources cover a wide spectrum; from large industrial facilities to relatively small operations such as dry cleaners. AFS does not contain data on facilities that are solely asbestos demolition and/or renovation contractors, or landfills. ECHO Clean Air Act data from AFS are frozen and reflect data as of October 17, 2014; the EPA retired this system for Clean Air Act stationary sources and transitioned to ICIS-Air.

Government Publication Date: Oct 17, 2014

Registered Pesticide Establishments: SSTS

This national list of active EPA-registered foreign and domestic pesticide and/or device-producing establishments is based on data from the Section Seven Tracking System (SSTS). The Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) Section 7 requires that each producing establishment must place its EPA establishment number on the label or immediate container of each pesticide, active ingredient or device produced. An EPA establishment number on a pesticide product label identifies the EPA registered location where the product was produced. The list of establishments is made available by the U.S. Environmental Protection Agency (EPA).

Government Publication Date: Feb 29, 2024

Polychlorinated Biphenyl (PCB) Transformers: PCBT

Locations of Transformers Containing Polychlorinated Biphenyls (PCBs) registered with the United States Environmental Protection Agency. PCB transformer owners must register their transformer(s) with EPA. Although not required, PCB transformer owners who have removed and properly disposed of a registered PCB transformer may notify EPA to have their PCB transformer de-registered. Data made available by EPA.

Government Publication Date: Oct 15, 2019

Polychlorinated Biphenyl (PCB) Notifiers: PCB

Facilities included in the national list of facilities that have notified the United States Environmental Protection Agency (EPA) of Polychlorinated Biphenyl (PCB) activities. Any company or person storing, transporting or disposing of PCBs or conducting PCB research and development must notify the EPA and receive an identification number.

Government Publication Date: May 23, 2024

State

PFAS Sampling Locations: PFAS SAMPLING

This data is sourced from the State Water Board's GeoTracker Per- and Polyfluoroalkyl Substances (PFAS) Map tool which contains individual sampling points (i.e., soil boring, groundwater monitoring well, drinking water well for municipal drinking water systems, etc.) or a site location with PFAS analytical data. Includes analytical results that are finalized and submitted electronically by the Responsible Parties via GeoTracker's Electronic Submittal of Information Portal, and after it's accepted by a Regional Water Quality Control Board.

Government Publication Date: Jul 25, 2024

Dry Cleaning Facilities: DRYCLEANERS

A list of drycleaner related facilities that have EPA ID numbers. These are facilities with certain SIC codes: power laundries, family and commercial, linen supply, commercial laundry, dry cleaning and pressing machines - Coin Operated Laundry and Dry Cleaning. This is provided by the Department of Toxic Substance Control.

Government Publication Date: Dec 20, 2021

Delisted Drycleaners: DELISTED DRYCLEANERS

Sites removed from the list of drycleaner related facilities that have EPA ID numbers, made available by the California Department of Toxic Substance Control.

Government Publication Date: Jan 31, 2022

Non-Toxic Dry Cleaning Incentive Program: DRYC GRANT

A list of grant recipients of the Non-Toxic Dry Cleaning Incentive Program made available by the California Air Resources Board (CARB). The program provides grants to eligible dry cleaning businesses to assist them in transitioning away from PERC machines to alternative non-toxic and non-smog forming technologies.

Government Publication Date: Jan 31, 2022

PFAS GeoTracker Cleanup Sites: PFAS GT CLEANUPS

A list of applicable cleanup sites from the State Water Resources Control Board's (SWRCB) GeoTracker data management system where one or more of the potential contaminants of concern are identified in the PFAS Master List of PFAS Substances made available by the Environmental Protection Agency (US EPA).

Government Publication Date: Jul 4, 2024

PFOA/PFOS Groundwater: PFAS GW

A list of water wells from the Groundwater Ambient Monitoring and Assessment Program (GAMA) Groundwater Information System with the groundwater chemical perfluorooctanoic acid (PFOA) (NL = 0.014 UG/L) or perfluorooctanoic sulfonate (PFOS) (NL = 0.013 UG/L). The GAMA Groundwater Information System search is made available by California Water Boards.

Government Publication Date: Jun 23, 2024

PFAS Investigations: PFAS INVEST

This list of potential Per- and Polyfluoroalkyl Substance (PFAS) sites is compiled from the California State Water Resources Control Board's (SWRCB) PFAS Investigations Map tool. The SWRCB issued investigative orders, per California Water Code (CWC) Section 13267 and/or 13383, to these sites. Orders were also issued to the public water systems to sample wells in the vicinity of these locations. Military facilities have been identified by the Department of Defense (DOD) as part of their efforts to investigate PFAS per the Defense Environmental Restoration Program (DERP) under the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). The data includes locations for Airports, Chrome Plating Facilities, Landfills, Publicly Owned Treatment Works, Refineries and Bulk Terminals, DOD Facilities, and Monitored Drinking Water Wells being investigated for potential PFAS.

Government Publication Date: Jan 23, 2024

Hazardous Waste and Substances Site List - Site Cleanup: HWSS CLEANUP

The Hazardous Waste and Substances Sites (Cortese) List is a planning document used by the State, local agencies and developers to comply with the California Environmental Quality Act requirements in providing information about the location of hazardous materials release sites. This list is published by California Department of Toxic Substance Control.

Government Publication Date: Mar 15, 2023

Toxic Pit Cleanup Act Sites: TOXIC PITS

The Toxic Pits Cleanup Act (TPCA) list identifies sites suspected of containing hazardous substances where cleanup has not yet been completed. This list was maintained by the State Water Resources Control Board (SWRCB), is not longer maintained, and updates are not planned.

Government Publication Date: Jul 1, 1995

List of Hazardous Waste Facilities Subject to Corrective Action: DTSC HWF

This is a list of hazardous waste facilities identified in Health and Safety Code (HSC) § 25187.5. These facilities are those where Department of Toxic Substances Control (DTSC) has taken or contracted for corrective action because a facility owner/operator has failed to comply with a date for taking corrective action in an order issued under HSC § 25187, or because DTSC determined that immediate corrective action was necessary to abate an imminent or substantial endangerment.

Government Publication Date: Jul 18, 2016

EnviroStor Inspection, Compliance, and Enforcement: INSP COMP ENF

A list of permitted facilities with inspections and enforcements tracked by the California Department of Toxic Substance Control's (DTSC) EnviroStor data management system.

Government Publication Date: Nov 23, 2023

School Property Evaluation Program Sites: SCH

A list of sites registered with The Department of Toxic Substances Control (DTSC) School Property Evaluation and Cleanup (SPEC) Division. SPEC is responsible for assessing, investigating and cleaning up proposed school sites. The Division ensures that selected properties are free of contamination or, if the properties were previously contaminated, that they have been cleaned up to a level that protects the students and staff who will occupy the new school.

Government Publication Date: Jun 25, 2024

California Hazardous Material Incident Report System (CHMIRS): CHMIRS

A list of reported hazardous material incidents, spills, and releases from the California Hazardous Material Incident Report System (CHMIRS). This listing has been made available by the California Governor's Office of Emergency Services (Cal OES).

Government Publication Date: Aug 1, 2024

Historical California Hazardous Material Incident Report System (CHMIRS): HIST CHMIRS

A list of reported hazardous material incidents, spills, and releases from the California Hazardous Material Incident Report System (CHMIRS) prior to 1993. This list has been made available by the California Office of Emergency Services (OES).

Government Publication Date: Jan 1, 1993

Handlers from Hazardous Waste Manifest Data: HAZNET

A list of handlers not otherwise classified as Treatment, Storage, Disposal facilities (TSDF) or generators from the facilities and manifests data made available by the California Department of Toxic Substances Control (DTSC) in their Hazardous Waste Tracking System (HWTS).

Government Publication Date: Oct 24, 2016

Generators from Hazardous Waste Manifest Data: HAZ GEN

List of handlers listed as having generated waste from the facilities and manifests data made available by the California Department of Toxic Substances Control (DTSC) in their Hazardous Waste Tracking System (HWTS).

Government Publication Date: Dec 31, 2017

TSDF from Hazardous Waste Manifest Data: HAZ TSD

List of Treatment, Storage, and Disposal Facilities (TSDFs) from the facilities and manifests data made available by the California Department of Toxic Substances Control (DTSC) in their Hazardous Waste Tracking System (HWTS).

Government Publication Date: Dec 31, 2017

Historical Hazardous Waste Manifest Data: HIST MANIFEST

A list of historic hazardous waste manifests received by the Department of Toxic Substances Control (DTSC) from year the 1980 to 1992. The volume of manifests is typically 900,000 - 1,000,000 annually, representing approximately 450,000 - 500,000 shipments.

Government Publication Date: Dec 31, 1992

DTSC Registered Hazardous Waste Transporters: HW TRANSPORT

The California Department of Toxic Substances Control (DTSC) maintains this list of Registered Hazardous Waste Transporters.

Government Publication Date: Oct 5, 2024

Registered Waste Tire Haulers: WASTE TIRE

This list of registered waste tire haulers is maintained by the California Department of Resources Recycling and Recovery.

Government Publication Date: Jul 22, 2024

California Medical Waste Management Program Facility List: MEDICAL WASTE

This list of Medical Waste Management Program Facilities is maintained by the California Department of Public Health. The Medical Waste Management Program (MWMP) regulates the generation, handling, storage, treatment, and disposal of medical waste by providing oversight for the implementation of the Medical Waste Management Act (MWMA). The MWMP permits and inspects all medical waste off-site treatment facilities, medical waste transporters, and medical waste transfer stations. This list contains transporters, treatment, and transfer facilities.

Government Publication Date: Sep 5, 2024

Historical Cortese List: HIST CORTESE

List of sites which were once included on the Cortese list. The Hazardous Waste and Substances Sites (Cortese) List is a planning document used by the State, local agencies and developers to comply with the California Environmental Quality Act requirements for providing information about the location of hazardous sites.

Government Publication Date: Nov 13, 2008

Cease and Desist Orders and Cleanup and Abatement Orders: CDO/CAO

The California Environment Protection Agency "Cortese List" of active Cease and Desist Orders (CDO) and Cleanup and Abatement Orders (CAO). This list contains many CDOs and CAOs that do NOT concern the discharge of wastes that are hazardous materials. Many of the listed orders concern, as examples, discharges of domestic sewage, food processing wastes, or sediment that do not contain hazardous materials, but the Water Boards' database does not distinguish between these types of orders.

Government Publication Date: Dec 6, 2021

California Environmental Reporting System (CERS) Hazardous Waste Sites: CERS HAZ

List of sites in the California Environmental Protection Agency (CalEPA) Regulated Site Portal which fall under the following regulatory programs: Hazardous Chemical Management, Hazardous Waste Onsite Treatment, Household Hazardous Waste Collection, Hazardous Waste Generator, RCRA LQ HW Generator. The CalEPA oversees the statewide implementation of the Unified Program which applies regulatory standards to protect Californians from hazardous waste and materials.

Government Publication Date: Jul 25, 2024

Delisted Environmental Reporting System (CERS) Hazardous Waste Sites: DELISTED HAZ

This database contains a list of sites that were removed from the California Environmental Protection Agency (CalEPA) in the following regulatory programs: Hazardous Chemical Management, Hazardous Waste Onsite Treatment, Household Hazardous Waste Collection, Hazardous Waste Generator, RCRA LQ HW Generator.

Government Publication Date: Nov 29, 2018

Sites in GeoTracker: GEOTRACKER

GeoTracker is the State Water Resource Control Boards' data management system for sites that impact, or have the potential to impact, water quality in California, with emphasis on groundwater. This is a list of sites in GeoTracker that aren't otherwise categorized as LUST, Land Disposal Sites (LDS), Cleanup Sites, or sites having Waste Discharge Requirements (WDR). This listing includes program types such as Underground Injection Control (UIC), Confined Animal Facilities (CAF), Irrigated Lands Regulatory Program, plans, and non-case information.

Government Publication Date: Jul 4, 2024

Mines Listing: MINE

This list includes mine site locations extracted from the Mines Online database, maintained by the California Department of Conservation. Mines Online (MOL) is an interactive web map designed with GIS features that provide information such as the mine name, mine status, commodity sold, location, and other mine specific data. Please note: Mine location information is provided to assist experts in determining the location of mine operators in accordance with California Civil Code section 1103.4 and reflects information reported by mine operators in annual reports provided under Public Resources Code section 2207. While the Division of Mine Reclamation (DMR) attempts to populate MOL with accurate location information, the DMR cannot guarantee the accuracy of operator reported location information.

Government Publication Date: Oct 3, 2024

Recorded Environmental Cleanup Liens: LIEN

The California Department of Toxic Substance Control (DTSC) maintains this list of liens placed upon real properties. A lien is utilized by the DTSC to obtain reimbursement from responsible parties for costs associated with the remediation of contaminated properties.

Government Publication Date: Dec 18, 2023

Waste Discharge Requirements: WASTE DISCHG

List of sites in California State Water Resources Control Board (SWRCB) Waste Discharge Requirements (WDRs) Program in California, made available by the SWRCB via GeoTracker. The WDR program regulates point discharges that are exempt pursuant to Subsection 20090 of Title 27 and not subject to the Federal Water Pollution Control Act. The scope of the WDRs Program also includes the discharge of wastes classified as inert, pursuant to section 20230 of Title 27.

Government Publication Date: Jul 4, 2024

Toxic Pollutant Emissions Facilities: EMISSIONS

A list of criteria and toxic pollutant emissions data for facilities in California made available by the California Environmental Protection Agency - Air Resources Board (ARB). Risk data may be based on previous inventory submittals. The toxics data are submitted to the ARB by the local air districts as requirement of the Air Toxics "Hot Spots" Program.

Government Publication Date: Dec 31, 2021

Clandestine Drug Lab Sites: CDL

The Department of Toxic Substances Control (DTSC) maintains a listing of drug lab sites. DTSC is responsible for removal and disposal of hazardous substances discovered by law enforcement officials while investigating illegal/clandestine drug laboratories.

Government Publication Date: Jan 19, 2021

No Tribal additional environmental record sources available for this State.

County

Definitions

Database Descriptions: This section provides a detailed explanation for each database including: source, information available, time coverage, and acronyms used. They are listed in alphabetic order.

Detail Report: This is the section of the report which provides the most detail for each individual record. Records are summarized by location, starting with the project property followed by records in closest proximity.

Distance: The distance value is the distance between plotted points, not necessarily the distance between the sites' boundaries. All values are an approximation.

Direction: The direction value is the compass direction of the site in respect to the project property and/or center point of the report.

Elevation: The elevation value is taken from the location at which the records for the site address have been plotted. All values are an approximation. Source: Google Elevation API.

Executive Summary: This portion of the report is divided into 3 sections:

'Report Summary'- Displays a chart indicating how many records fall on the project property and, within the report search radii.

'Site Report Summary'-Project Property'- This section lists all the records which fall on the project property. For more details, see the 'Detail Report' section.

'Site Report Summary-Surrounding Properties'- This section summarizes all records on adjacent properties, listing them in order of proximity from the project property. For more details, see the 'Detail Report' section.

Map Key: The map key number is assigned according to closest proximity from the project property. Map Key numbers always start at #1. The project property will always have a map key of '1' if records are available. If there is a number in brackets beside the main number, this will indicate the number of records on that specific property. If there is no number in brackets, there is only one record for that property.

The symbol and colour used indicates 'elevation': the red inverted triangle will dictate 'ERIS Sites with Lower Elevation', the yellow triangle will dictate 'ERIS Sites with Higher Elevation' and the orange square will dictate 'ERIS Sites with Same Elevation.'

Unplottables: These are records that could not be mapped due to various reasons, including limited geographic information. These records may or may not be in your study area, and are included as reference.

The ERIS ***Physical Setting Report - PSR*** provides comprehensive information about the physical setting around a site and includes a complete overview of topography and surface topology, in addition to hydrologic, geologic and soil characteristics. The location and detailed attributes of oil and gas wells, water wells, public water systems and radon are also included for review.

The compilation of both physical characteristics of a site and additional attribute data is useful in assessing the impact of migration of contaminants and subsequent impact on soils and groundwater.

Disclaimer

This Report does not provide a full environmental evaluation for the site or adjacent properties. Please see the terms and disclaimer at the end of the Report for greater detail.

ERIS

Geologic Information

The previous page shows USGS geology information. Detailed information about each unit is provided below.

Geologic Unit Q

Unit Name:	Quaternary alluvium and marine deposits
Unit Age:	Pleistocene to Holocene
Primary Rock Type:	Coarse-detrital
Secondary Rock Type:	
Unit Description:	Alluvium, lake, playa, and terrace deposits; unconsolidated and semi-consolidated. Mostly nonmarine, but includes marine deposits near the coast.

ERIS

Soil Information

The previous page shows a soil map using SSURGO data from USDA Natural Resources Conservation Service. Detailed information about each unit is provided below.

Map Unit 101 (23.82%)

Map Unit Name:	Urban land, 0 to 2 percent slopes, basins
Bedrock Depth - Min:	
Watertable Depth - Annual Min:	
Drainage Class - Dominant:	
Hydrologic Group - Dominant:	

Major components are printed below

Component Description:

Minor map unit components are excluded from this report.

Map Unit: 101 - Urban land, 0 to 2 percent slopes, basins

Component: Urban land (98%)
Generated brief soil descriptions are created for major soil components. The Urban land is a miscellaneous area.

Component: Xerorthents (2%)
Generated brief soil descriptions are created for major components. The Xerorthents soil is a minor component.

Map Unit 145 (76.18%)

Map Unit Name:	Urbanland-Hangerone complex, 0 to 2 percent slopes, drained
Bedrock Depth - Min:	
Watertable Depth - Annual Min:	
Drainage Class - Dominant:	
Hydrologic Group - Dominant:	

Major components are printed below

Hangerone(25%)

horizon A1(0cm to 24cm)	Clay
horizon A2(24cm to 42cm)	Clay
horizon Bw(42cm to 68cm)	Clay
horizon Bk(68cm to 88cm)	Clay
horizon Ck(88cm to 115cm)	Clay loam
horizon C(115cm to 183cm)	Gravelly loam
horizon 2Ab(183cm to 225cm)	Clay

Component Description:

Minor map unit components are excluded from this report.

Map Unit: 145 - Urbanland-Hangerone complex, 0 to 2 percent slopes, drained

Component: Urban land (70%)
Generated brief soil descriptions are created for major soil components. The Urban land is a miscellaneous area.

Component: Hangerone (25%)
The Hangerone, drained component makes up 25 percent of the map unit. Slopes are 0 to 2 percent. This component is on urban land, basin floors, basins. The parent material consists of alluvium derived from metamorphic and sedimentary rock and/or alluvium derived from metavolcanics. Depth to a root restrictive layer is greater than 60 inches. The natural drainage class is poorly drained. Water movement in the most restrictive layer is moderately low. Available water to a depth of 60 inches (or restricted depth) is

Soil Information

moderate. Shrink-swell potential is high. This soil is not flooded. It is not ponded. There is no zone of water saturation within a depth of 72 inches. Organic matter content in the surface horizon is about 2 percent. Nonirrigated land capability classification is 3s. Irrigated land capability classification is 2s. This soil meets hydric criteria. The calcium carbonate equivalent within 40 inches, typically, does not exceed 15 percent. There are no saline horizons within 30 inches of the soil surface. The soil has a maximum sodium adsorption ratio of 1 within 30 inches of the soil surface.

Component: Clear Lake (2%)
Generated brief soil descriptions are created for major soil components. The Clear Lake soil is a minor component.

Component: Bayshore (2%)
Generated brief soil descriptions are created for major soil components. The Bayshore soil is a minor component.

Component: Embarcadero (1%)
Generated brief soil descriptions are created for major soil components. The Embarcadero soil is a minor component.
