

**Photo 1: Current Conditions (facing south from First Ave.)**

**Photo 2: Proposed Project (facing south from First Ave.)**

As shown in the Site Plan, multiple living walls and shrubs will provide partial screening of the fuel cells from First Ave. The living walls are designed similarly to those located adjacent to the project area, and the shrubs are consistent with the existing landscape design. This area is located partly within and adjacent to an existing landscaping easement. Additional Yahoo! campus buildings are located north across First Ave. and east across N. Mathilda Ave. Lockheed Martin buildings are located to the west.
