NOTICE OF INTENT TO ADOPT NEGATIVE DECLARATION

This form is provided as a notification of an intent to adopt a Mitigated Negative Declaration which has been prepared in compliance with the provisions of the California Environmental Quality Act of 1970, as amended, and Resolution #193-86.

PROJECT TITLE:

Application for a Rezone, Special Development Permit, and a Vesting Tentative Map by Classic Communities.

PROJECT DESCRIPTION AND LOCATION (APN):

FILE #: 2014-7423
Location: 1071 Noriega Ave. (APN: 161-37-017 and 163-37-018)
Proposed Project: **REZONE:** Introduction of an Ordinance to rezone the site from R-3 (Medium Density Residential) to R-3/PD (Medium Density Residential/Planned Development);
SPECIAL DEVELOPMENT PERMIT: for 10 residential townhouse units; and
VESTING TENTATIVE MAP: to subdivide two lots into 10 lots plus a common lot.
Applicant / Owner: Classic Communities / Classic 1071 Noriega LP

WHERE TO VIEW THIS DOCUMENT:

The **Mitigated Negative Declaration**, its supporting documentation and details relating to the project are on file and available for review and comment in the Office of the Secretary of the Planning Commission, City Hall, 456 West Olive Avenue, Sunnyvale.

This **Mitigated Negative Declaration** may be protested in writing by any person prior to 5:00 p.m. on November 11, 2014. Protest shall be filed in the Department of Community Development, 456 W. Olive Avenue, Sunnyvale and shall include a written statement specifying anticipated environmental effects which may be significant. A protest of a **Mitigated Negative Declaration** will be considered by the adopting authority, whose action on the protest may be appealed.

HEARING INFORMATION:

A public hearing on the project is scheduled for:

PLANNING COMMISSION HEARING ON Monday, October 13, 2014 AT 8:00 P.M., and CITY COUNCIL HEARING on Tuesday, November 11, 2014 AT 7:00 P.M., COUNCIL CHAMBERS.

at 8:00 p.m. in the Council Chambers, City Hall, 456 West Olive Avenue, Sunnyvale.

TOXIC SITE INFORMATION:

(No) listed toxic sites are present at the project location.

Circulated On September 19, 2014

Signed: 
Gerri Caruso, Principal Planner

Project Title	Classics (10 townhomes) at Noriega
Lead Agency Name and Address	City of Sunnyvale P.O. Box 3707, Sunnyvale, CA 94088-3707
Contact Person	Rosemarie Zulueta, Associate Planner
Phone Number	(408) 730-7437
Project Location	1071 Noriega Avenue Sunnyvale, CA 94086 (APNs: 161-37-017 and 161-37-018)
Applicant's Name	Classic Communities (applicant) / Classic 1071 Noriega LP (owner)
Zoning	R-3 (Medium Density Residential)
General Plan	Residential Medium Density
Other Public Agencies whose approval is required	None

BRIEF PROJECT DESCRIPTION

Related applications on a 0.48-acre site:

Rezone the site from R-3 (Medium Density Residential) to R-3/PD (Medium Density Residential/Planned Development);

Special Development Permit for 10 residential townhome units; and

Vesting Tentative Map to subdivide two lots into 10 lots plus a common lot.

DETAILED PROJECT DESCRIPTION

Surrounding Uses and Setting: The 0.48-acre project site is located on the corner of Noriega Avenue and Lometa Avenue. The site is bordered along the north and south by multi-family residential developments (medium density apartments), by a single-family neighborhood (low density) to the west and a small-lot single-family planned development (low medium density) to the east. The site is near a neighborhood commercial center to the east on South Mary Avenue and Washington Avenue.

On-site Development: The project includes full demolition of the existing 11-unit, two-story apartment buildings and related accessory structures (built in the 1970s), and construction of 10 townhomes with site improvements. The new units will be grouped into three three-story buildings; one building comprising six townhome units and two buildings comprising two units each ("duets"). The three buildings will be arranged around a central driveway off Noriega Avenue that will serve as the only vehicular access to the development. Each unit will have two-car garages and storage areas. The duets will have a private enclosed rear yard, while the each of

the six-plex units will have enclosed front yards and a private balcony on the second floor. The common lot will include landscaped areas, uncovered parking and the driveway aisle.

Construction Activities and Schedule: Construction activities include full demolition of all existing buildings and paving on the project site and construction of 10 townhomes with associated on-site and off-site improvements. The project will be subject to the Sunnyvale Municipal Code requirements for construction noise and hours of construction contained in Chapter 16.08.030.

Construction of the project is estimated to span 16 to 20 months. Demolition is anticipated to commence in spring or summer of 2015. Demolition and site work will span approximately four to five months. The remaining time will include construction of buildings, on-site improvements and off-site improvements. Construction will not include deep pile foundations or pile driving, jackhammers or other extremely high noise-generating activities or significant vibration.

Off-site Improvements: Existing curb cuts and driveways off Lometa Avenue will be removed and one new curb cut and driveway will be installed off Noriega Avenue to serve the new homes. New sidewalks and street trees will be installed in the public right-of-way, per City standards. Standard water, sewer, right-of-way and utility upgrades will be provided as required by the Municipal Code.

EVALUATION OF ENVIRONMENTAL IMPACTS:

1. A brief explanation is required for all answers except "No Impact" answers that are adequately supported by the information sources a lead agency cites in the parentheses following each question. A "No Impact" answer is adequately supported if the referenced information sources show that the impact simply does not apply to projects like the one involved (e.g. the project falls outside a fault rupture zone). A "No Impact" answer should be explained where it is based on project-specific factors as well as general standards (e.g. the project will not expose sensitive receptors to pollutants, based on a project-specific screening analysis).
2. All answers must take account of the whole action involved, including off-site as well as on-site, cumulative as well as project-level, indirect as well as direct, and construction as well as operational impacts.
3. Once the lead agency has determined that a particular physical impact may occur, then the checklist answers must indicate whether the impact is potentially significant, less than significant with mitigation, or less than significant. "Potentially Significant Impact" is appropriate if there is substantial evidence that an effect may be significant. If there are one or more "Potentially Significant Impact" entries when the determination is made, an EIR is required.
4. "Negative Declaration: Potentially Significant Unless Mitigation Incorporated" applies where the incorporation of mitigation measures has reduced an effect from "Potentially Significant Impact" to a "Less Significant Impact." The lead agency must describe the mitigation measures, and briefly explain how they reduce the effect to a less than significant level (mitigation measures from Section 17, "Earlier Analysis," may be cross-referenced).
5. Earlier analysis may be used where, pursuant to the tiering, program EIR, or other CEQA process, an effect has been adequately analyzed in an earlier EIR or negative declaration. Section 15063 (c) (3) (d). In this case, a brief discussion should identify the following:
6. Earlier Analysis Used. Identify and state where they are available for review.
7. Impacts Adequately Addressed. Identify which effects from the above checklist were within the scope of and adequately analyzed in an earlier document pursuant to applicable legal standards, and state whether such effects were addressed by mitigation measures based on the earlier analysis.
8. Mitigation Measures. For effects that are "Less than Significant with Mitigation Measures Incorporated," describe the mitigation measures which were incorporated or refined from the earlier document and the extent to which they address site-specific conditions for the project
9. Lead agencies are encouraged to incorporate into the checklist references to information sources for potential impacts (e.g. general plans, zoning ordinances). Reference to a previously prepared or outside document should, where appropriate, include a reference to the page or pages where the statement is substantiated.

ENVIRONMENTAL FACTORS POTENTIALLY AFFECTED:

The environmental factors checked below would be potentially affected by this project, involving at least one impact that is a "Potentially Significant Impact" as indicated by the checklist on the following pages.

- | | | |
|---|--|---|
| ☐ Aesthetics | ☐ Hazards & Hazardous Materials | ☐ Public Services |
| ☐ Agricultural Resources | ☐ Hydrology/Water Quality | ☐ Recreation |
| ☐ Air Quality | ☐ Land Use/Planning | ☐ Transportation/Traffic |
| ☐ Biological Resources | ☐ Mineral Resources | ☐ Utilities/Service Systems |
| ☐ Cultural Resources | ☐ Noise | ☐ Mandatory Findings of Significance |
| ☐ Geology/Soils | ☐ Population/Housing | |

MANDATORY FINDINGS OF SIGNIFICANCE (see checklist for further information):

Does the project have the potential to degrade the quality of the environment, substantially reduce the habitat of a fish or wildlife species, cause a fish or wildlife population to drop below self-sustaining levels, threaten to eliminate a plant or animal community, reduce the number or restrict the range of a rare or endangered plant or animal, or eliminate important examples of the major periods of California history or prehistory?

☐ Yes☒ No

Mandatory Findings of Significance? Does the project have impacts that are individually limited, but cumulatively considerable? ("Cumulatively considerable" means that the incremental effects of a project are considerable when viewed in connection with the effects of the past projects, the effects of other current projects, and the effects of probable future projects)?

☐ Yes☒ No

Mandatory Findings of Significance? Does the project have environmental effects which will cause substantial adverse effects on human beings, either directly or indirectly?

☐ Yes☒ No

DETERMINATION:

On the basis of this initial evaluation:

I find that the proposed project COULD NOT have a significant effect on the environment, and a NEGATIVE DECLARATION will be prepared. ☐

I find that although the proposed project could have a significant effect on the environment, there will not be a significant effect in this case because revisions in the project have been made by or agreed to by the project proponent. A MITIGATED NEGATIVE DECLARATION will be prepared. ☒

I find that the proposed project MAY have a significant effect on the environment, and an ENVIRONMENTAL IMPACT REPORT is required. ☐

I find that the proposed project MAY have a "potential significant impact" or "potentially significant unless mitigated" impact on the environment, but at least one effect (1) has been adequately analyzed in an earlier document pursuant to applicable legal standards, and (2) has been addressed by mitigation measures based on the earlier analysis as described on attached sheets. An ENVIRONMENTAL IMPACT REPORT is required, but it must analyze only the effects that remain to be addressed. ☐

I find that although the proposed project could have a significant effect on the environment, because all potentially significant effects (a) have been analyzed in an earlier EIR or NEGATIVE DECLARATION pursuant to applicable standards and (b) have been avoided or mitigated pursuant to that earlier EIR or NEGATIVE DECLARATION, including revisions or mitigation measures that are imposed upon the proposed project, nothing further is required. ☐

Further Discussion if "Less Than Significant" with or without mitigation:

14. Noise (No Impact) – A noise study for the project was prepared by Charles M. Salter Associates, Inc., dated March 3, 2014. The study is available for review at the City of Sunnyvale's Community Development Department, Monday through Friday between 8 a.m. and 5 p.m. Two continuous long-term 24-hour measurements were conducted February 20, 2014 to February 21, 2014. At the nearest proposed setback from Lometa Avenue, the study calculated a future DNL of 58 dB, which is considered "normally acceptable" sound levels at the building façade are less than DNL 60 dB, therefore typical construction grade double-pane windows would be sufficient to reduce the interior noise levels below DNL 45 dB.

20. Biological Resources (Less than Significant) – A Tree Inventory Report was prepared by Barrie D. Coate and Associates, dated January 21, 2014. A total of 14 trees were included in the report, four of which are located in the City right-of-way. The four existing City street trees along the project side frontage will be removed as part of the project in order to install new sidewalks and plant new street trees per current City standards.

The remaining 10 trees are within the project site, and only three are considered "protected" under Sunnyvale Municipal Code Chapter 19.94. A protected tree is defined as having a trunk size of at least 38 inches in circumference, as measured 4.5 feet from the ground. Three of the trees will be preserved, including two mature cedar trees fronting Noriega Avenue that meet the definition of a protected tree. All other trees, including one protected tree will be removed because they are within the proposed building footprints or circulation areas. The project will add 19 trees to the site, which will mitigate the loss of the existing trees in accordance with Sunnyvale Municipal Code Section 19.94, to a less than significant level.

23. Historic and Cultural Resources (Less than Significant) – The project construction will include grading and land disturbance. A records search by the California Historical Resources Information System/Northwest Information Center of Sonoma State University (CHRIS/NWIC) was conducted for the project area in August 2014. Review of the obtained information indicates that there have been no cultural resources studies conducted within the project area. The project area contains no recorded archaeological resources. The State Office of Historic Preservation Historic Property Directory (OHP HPD) (which includes listings of the California Register of Historical Resources, California State Historical Landmarks, California State Points of Historical Interest, and the National Register of Historic Places) lists no recorded buildings or structures within the proposed project area. In addition to these inventories, the NWIC base maps show no recorded buildings or structures within the proposed project area. The records search also indicates that there are no Native American resources in or adjacent to the proposed project area referenced in the ethnographic literature.

Based on an evaluation of the environmental setting and features associated with known sites, there is a moderate potential of unrecorded Native American resources in the proposed project area. Review of historical

literature and maps gave no indication of the possibility of historic-period archaeological resources within the proposed project area, but there is a low potential of unrecorded historic-period archaeological resources.

The following mitigations are recommended to reduce the potential impact to less than significant level:

MITIGATION

WHAT:

- (1) Provide documentation that construction staff has been informed of the following requirement. In the event archaeological resources are encountered during construction, work should be temporarily halted in the vicinity of the discovered materials and workers shall avoid altering the materials and their context until a qualified professional archaeologist has evaluated the situation and provided appropriate recommendations. Project personnel should not collect cultural resources. Native American resources include chert or obsidian flakes, projectile points, mortars, and pestles; and dark friable soil containing shell and bone dietary debris, heat-affected rock, or human burials. Historic-period resources include stone or adobe foundations or walls; structures and remains with square nails; and refuse deposits or bottle dumps, often located in old wells privies.
- (2) Contact the local Native American tribe regarding traditional, cultural, and religious values.
- (3) Any identified cultural resources shall be recorded on DPR 523 historic resource recordation forms.

WHEN: These mitigations shall be incorporated into conditions of approval for the Special Development Permit (SDP) prior to its final approval by the City's Planning Commission. The conditions will become valid when the SDP is approved and prior to building permit issuance.

WHO: The project applicant or property owner shall be solely responsible for implementation and maintenance of these mitigation measures.

HOW: The conditions of approval will require these mitigation measures to be incorporated into the construction plans.

Responsible Division: Planning Division

Further Discussion if "Less Than Significant" with or without mitigation: None required.

General Discussion: The California Building Code contains a series of building code requirements to address safety issues regarding seismic shaking, flooding, and soil types. In addition, Title 16.62 of the Sunnyvale Municipal Code requires a series of measures for provisions to reduce flood-related hazards to buildings. These standards are suggested by the Federal Emergency Management Agency and required by code by the City of Sunnyvale. These standards must be met for a building permit to be issued.

69. Hazards and Hazardous Materials - Impair implementation of, or physically interfere with an adopted emergency response plan or emergency evacuation plan?	☐	☐	☐	☒	Safety and Noise Chapter 6 of the Sunnyvale General Plan www.sunnyvaleplanning.com

Further Discussion if “Less Than Significant” with or without mitigation:

66. Hazards and Hazardous Materials (Less than Significant with Mitigation) – A Phase I and II Environmental Site Assessment was prepared by Tetra Tech GEO, dated January 28, 2014. The study is available for review at the City of Sunnyvale’s Community Development Department, Monday through Friday between 8 a.m. and 5 p.m.

Tetra Tech GEO found the presence of the pesticide Dieldrin in the surface soil along the southern project site boundary. The site has historically been used as orchard land from the late 1930s through the 1960s. No structure was located on the project site prior to construction of the existing apartment complex in 1970. Strips of soil along the western and southern portions of the project site contain low concentrations of pesticide residues, typical of land formerly used for orchard trees. Surface soil along the southern portion of the project site contains the pesticide compound Dieldrin above human health-based agency screening levels for residential land use. Soil beneath the developed portion of the project site is not considered likely to have

elevated pesticide concentrations, because the topsoil in that area is presumed to have been largely removed during development.

The following mitigations are recommended to reduce the impact to less than significant level:

WHAT:

- (1) The soil along the southern project site boundary (at SB-3 as indicated in Figure 3 of the Phase I and II Environmental Site Assessment prepared by Tetra Tech GEO and dated January 28, 2014) shall be removed to a depth of approximately one (1) foot prior to or during redevelopment activities to remove soil containing Dieldrin concentrations to below human health-based agency screening levels.
- (2) Following excavation, confirmation soil samples shall be collected to confirm that soil containing elevated Dieldrin concentrations has been removed.
- (3) Following excavation, the soil shall be tested for pesticides to assist in determining the appropriate disposal option for the soil.

WHEN: These mitigations shall be incorporated into conditions of approval for the Special Development Permit (SDP) prior to its final approval by the City's Planning Commission. The conditions will become valid when the SDP is approved and prior to building permit issuance.

WHO: The project applicant or property owner shall be solely responsible for implementation and maintenance of these mitigation measures.

HOW: The conditions of approval will require these mitigation measures to be incorporated into the construction plans.
