

Check list for Conformance with PPSP - EIR  
 Project Name: 675 Almanor Ave.  
 File #2015-8110  
 Page 1 of 34

### CEQA Checklist

<b>Project Title</b>	675 Almanor Avenue
<b>Lead Agency Name and Address</b>	City of Sunnyvale P.O. Box 3707, Sunnyvale, CA 94088-3707
<b>Contact Person</b>	Momoko Ishijima, Associate Planner
<b>Phone Number</b>	(408) 730-7532
<b>Project Location</b>	675 Almanor Avenue Sunnyvale, CA 94086 (APN: 165-44-006 and -012)
<b>Applicant's Name</b>	Chang Architecture
<b>Zoning</b>	Peery Park Specific Plan - Innovation Edge with Activity Center Overlay (PPSP / IEAC)
<b>General Plan</b>	Peery Park
<b>Other Public Agencies whose approval is required</b>	Santa Clara County - Airport Land Use Commission

### BRIEF PROJECT DESCRIPTION

The proposed project requires a Peery Park Plan Review Permit (PPRP) to allow redevelopment of a combined 3.46-acre site with a 4-story office/R&D building totaling 150,651 square feet in floor area (100% FAR) and a 5-story parking structure with partial sub-grade parking. The project includes a 2,500-sq. ft. retail space on the ground floor.

The project is located in the Peery Park Specific Plan (PPSP) area. Development in this area is guided by the standards in the PPSP. The PPSP was adopted and the Environmental Impact Report (EIR) was certified by City Council on September 20, 2016. The City Council adopted a Statement of Overriding Considerations and Mitigation Monitoring and Reporting Program (MMRP).

## **DETAILED PROJECT DESCRIPTION**

### **Existing Site Conditions**

The 3.46-acre project site is bifurcated by the San Francisco Public Utilities Commission (SFPUC) right-of-way (ROW) into a north and south parcel. The south parcel adjacent to Almanor Avenue is 2.06 acres and the north parcel is 1.40 acres. The site contains a two-story, 60,332-sq. ft. office building on the south parcel, which is proposed to be demolished. The north parcel has surface parking and landscaping. The Santa Clara Valley Water District Flood Control Channel has an easement through the south parcel in a north-south orientation with an exposed channel adjacent to the north side of the SFPUC ROW.

### **Surrounding Land Uses and Setting**

The site is bounded by Almanor Avenue to the south and US Highway 101 to the north of a parcel utilized for parking. The surrounding uses are industrial office developments to the east, west, and south. The project site is located in the northern part of the PPSP area. The PPSP was recently adopted to guide the transformation of the area into an innovative, cutting-edge workplace district.

### **On-Site Development**

The project site would be developed with a four story, 150,651-square foot office/R&D building on the south parcel. The building height would be 60 feet to the parapet and approximately 74 feet nine inches to the top of the mechanical screen. The main entrance to the building would be oriented toward the parking lot on the west side with a secondary entrance facing Almanor Avenue. An approximately 54-foot high, five level parking structure with partial subterranean parking would be located on the north parcel with access over the SFPUC ROW property. The parking structure would provide 346 parking spaces and 109 surface parking spaces are provided on both parcels.

A PPPRP is required for site and architectural review for new construction, additions or modifications of structures and property within the PPSP district. The proposed uses are permitted by right and is consistent with the uses envisioned for the PPSP area; therefore, no conditional use permit is required for the project. The project is in FAR Zone 1 and categorized as a Tier 3 Project in the PPSP, where sites may develop up to 100 percent FAR with the provision of both Defined and Flexible Community Benefits and City Council review and approval. The PPPRP review allows for consideration of deviations from specified development standards such as lot width, building length, setbacks, parking, etc. The project includes a request for deviation to the minimum parking requirement of 498 spaces where 455 spaces is proposed.

There are 35 trees on the project site (includes street trees), and 26 trees (includes 3 street trees) are proposed to be removed (of which 17 are considered "protected"). The trees proposed for removal are in poor health or within the building footprints. The site is designed to preserve the existing mature redwood trees along the frontage and onsite. The ash tree in the south parking lot will also be preserved. The protected trees will be replaced with new deodar cedars along the frontage, space permitting. Sidewalks will meander along the street frontage to preserve the mature redwoods.

The main access to the project site would be through the two driveways on Almanor Avenue. The project proposes new landscaping all around each of the structures. A publicly accessible open space area of approximately 7,583 square feet with seating and deck area would be located along the Almanor Avenue frontage. A 1,000-square foot open space area near the west property line would include exercise equipment for recreational use.

### **Construction Activities and Schedule**

On-Site Demolition and Construction: Construction activities include demolition of the existing two-story office building and construction of the 4-story office building and the parking structure. Grading activity includes excavation for one level of subterranean parking. The project will be subject to the Sunnyvale Municipal Code requirements for construction noise and hours of construction contained in Chapter 16.08.030.

Construction of the project is estimated to span 4-5 months. Demolition is anticipated to commence in fall of 2017. Demolition and site work will span approximately one-month. The remaining time will include construction of the buildings, on-site improvements and off-site improvements. Construction will not include deep pile foundations or pile driving, jackhammers or other extremely high noise-generating activities or significant vibration.

Off-site Improvements: Existing curb cuts and driveways off of Almanor Avenue would be removed and new curb cuts, driveways, sidewalks and landscaping would be installed along all frontages as per City/Perry Park Specific Plan standards. Standard water, sewer, right-of-way and utility upgrades will be provided as required by the Municipal Code.

### EVALUATION OF ENVIRONMENTAL IMPACTS:

1. A brief explanation is required for all answers except “No Impact” answers that are adequately supported by the information sources a lead agency cites in the parentheses following each question. A “No Impact” answer is adequately supported if the referenced information sources show that the impact simply does not apply to projects like the one involved (e.g. the project falls outside a fault rupture zone). A “No Impact” answer should be explained where it is based on project-specific factors as well as general standards (e.g. the project will not expose sensitive receptors to pollutants, based on a project-specific screening analysis).
2. All answers must take account of the whole action involved, including off-site as well as on-site, cumulative as well as project-level, indirect as well as direct, and construction as well as operational impacts.
3. Once the lead agency has determined that a particular physical impact may occur, then the checklist answers must indicate whether the impact is potentially significant, less than significant with mitigation, or less than significant. “Potentially Significant Impact” is appropriate if there is substantial evidence that an effect may be significant. If there are one or more “Potentially Significant Impact” entries when the determination is made, an EIR is required.
4. “Negative Declaration: Potentially Significant Unless Mitigation Incorporated” applies where the incorporation of mitigation measures has reduced an effect from “Potentially Significant Impact” to a “Less Significant Impact.” The lead agency must describe the mitigation measures, and briefly explain how they reduce the effect to a less than significant level (mitigation measures from Section 17, “Earlier Analysis,” may be cross-referenced).
5. Earlier analysis may be used where, pursuant to the tiering, program EIR, or other CEQA process, an effect has been adequately analyzed in an earlier EIR or negative declaration. Section 15063 (c) (3) (d). In this case, a brief discussion should identify the following:
6. Earlier Analysis Used. Identify and state where they are available for review.
7. Impacts Adequately Addressed. Identify which effects from the above checklist were within the scope of and adequately analyzed in an earlier document pursuant to applicable legal standards, and state whether such effects were addressed by mitigation measures based on the earlier analysis.
8. Mitigation Measures. For effects that are “Less than Significant with Mitigation Measures Incorporated,” describe the mitigation measures which were incorporated or refined from the earlier document and the extent to which they address site-specific conditions for the project
9. Lead agencies are encouraged to incorporate into the checklist references to information sources for potential impacts (e.g. general plans, zoning ordinances). Reference to a previously prepared or outside document should, where appropriate, include a reference to the page or pages where the statement is substantiated.

**ENVIRONMENTAL FACTORS POTENTIALLY AFFECTED:**

The environmental factors checked below would be potentially affected by this project, involving at least one impact that is a “Substantial Increase in Severity of Previously Identified Significant Impact in PPSP EIR” or “New Significant Impact” as indicated by the checklist on the following pages.

- |   |  |  |
|---|--|--|
| <input type="checkbox"/> Aesthetics and Visual Resources          | <input type="checkbox"/> Hazards & Hazardous Materials | <input type="checkbox"/> Public Services                       |
| <input type="checkbox"/> Air Quality                              | <input type="checkbox"/> Land Use/Planning             | <input type="checkbox"/> Recreation                            |
| <input type="checkbox"/> Cultural Resources & Historic Structures | <input type="checkbox"/> Noise                         | <input type="checkbox"/> Transportation, Circulation & Traffic |
| <input type="checkbox"/> Greenhouse Gas Emissions                 | <input type="checkbox"/> Population/Housing            | <input type="checkbox"/> Utilities & Infrastructure            |
|   |  | <input type="checkbox"/> Mandatory Findings of Significance    |

CEQA Section 15168 - Program EIR.

(c) Use With Later Activities. Subsequent activities in the program must be examined in the light of the program EIR to determine whether an additional environmental document must be prepared.

(4) Where the subsequent activities involve site specific operations, the agency should use a written checklist or similar device to document the evaluation of the site and the activity to determine whether the environmental effects of the operation were covered in the program EIR **(see checklist for further information):**

Does the Project have additional potential environmental effects that were not covered in a Program EIR?  Yes

No

Does the project have the potential to degrade the quality of the environment, substantially reduce the habitat of a fish or wildlife species, cause a fish or wildlife population to drop below self-sustaining levels, threaten to eliminate a plant or animal community, reduce the number or restrict the range of a rare or endangered plant or animal, or eliminate important examples of the major periods of California history or prehistory?  Yes

No

Mandatory Findings of Significance? Does the project have impacts that are individually limited, but cumulatively considerable? (“Cumulatively considerable” means that the incremental effects of a project are considerable when viewed in connection with the effects of the past projects, the effects of other current projects, and the effects of probable future projects)?  Yes

No

Mandatory Findings of Significance? Does the project have environmental effects which will cause substantial adverse effects on human beings, either directly or indirectly?  Yes

No

**DETERMINATION:**

On the basis of this initial evaluation:

I find that the proposed project COULD NOT have a significant environmental effect on the environment that has not been considered in the Peery Park Specific Plan EIR, Mitigation Measures and Monitoring Plan

I find that although the proposed project could have a significant effect on the environment not covered in the Peery Park Specific Plan Program EIR, there will not be a significant effect in this case because revisions in the project have been made by or agreed to by the project proponent. A MITIGATED NEGATIVE DECLARATION will be prepared.

I find that the proposed project MAY have a significant effect on the environment not covered in the Peery Park Specific Plan Program EIR, and an ENVIRONMENTAL IMPACT REPORT is required.

I find that the proposed project MAY have a “potential significant impact” or “potentially significant unless mitigated” impact on the environment not covered in the Peery Park Specific Plan Program EIR, but at least one effect (1) has been adequately analyzed in an earlier document pursuant to applicable legal standards, and (2) has been addressed by mitigation measures based on the earlier analysis as described on attached sheets. An ENVIRONMENTAL IMPACT REPORT is required, but it must analyze only the effects that remain to be addressed.

I find that although the proposed project could have a significant effect on the environment, because all potentially significant effects (a) have been analyzed in an earlier EIR or NEGATIVE DECLARATION pursuant to applicable standards and (b) have been avoided or mitigated pursuant to that earlier EIR or NEGATIVE DECLARATION, including revisions or mitigation measures that are imposed upon the proposed project, nothing further is required.

## Environmental Checklist

---

This Environmental Checklist compares the environmental impacts that would result from the implementation of the proposed project to the impacts previously identified for the site under the implementation of the PPSP, to determine whether the proposed project's environmental impacts were adequately addressed in the PPSP EIR per CEQA Guidelines Sections 15162 and 15168, as described under *Section 3.0* above.

The checkboxes in the Environmental Checklist indicate whether the proposed project would result in environmental impacts, as described below:

- **Equal or Less Severity of Impact than Previously Identified in PPSP EIR** – The severity of the specific impact of the proposed project would be the same as or less than the severity of the specific impact described in the PPSP EIR.
- **Substantial Increase in Severity of Previously Identified Significant Impact in PPSP EIR** – The proposed project's specific impact would be substantially greater than the specific impact described in the PPSP EIR.
- **New Significant Impact** – The proposed project would result in a new significant impact that was not previously identified in the PPSP EIR.

Where the severity of the impacts of the proposed project would be the same as or less than the severity of the impacts described in the PPSP EIR, the checkbox for **Equal or Less Severity of Impact Previously Identified in PPSP EIR** is checked. Where the checkbox for **Substantial Increase in Severity of Previously Identified Significant Impact in PPSP EIR** or **New Significant Impact** is checked, there are significant impacts that are:

- Due to substantial changes in the project (CEQA Guidelines Section 15162[a][1]);
- Due to substantial changes in circumstances under which the project will be undertaken (CEQA Guidelines Section 15162[a][2]); or
- Due to substantial new information not known at the time the EIR was certified [CEQA Guidelines Sections 15162(a)(3)].

A discussion of the project's impact under the thresholds identified for reach resource follows the checklist.

## Aesthetics

Would the project:	Equal or Less Severity of Impact Previously Identified in the PPSP EIR	Substantial Increase in Severity of Previously Identified Significant Impact in PPSP EIR	New Significant Impact	Where the Impact was Analyzed in the PPSP EIR
a) Have a substantial adverse effect on a scenic vista?	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<i>Section 3.1 Aesthetic and Visual Resources Impact AES-1</i>
b) Substantially damage scenic resources, including, but not limited to, trees, rock outcroppings, and historic buildings within a state scenic highway?	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<i>Section 3.1 Aesthetic and Visual Resources Impact AES-4</i>
c) Substantially degrade the existing visual character or quality of the site and its surroundings?	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<i>Section 3.1 Aesthetic and Visual Resources Impact AES-2</i>
d) Create a new source of substantial light or glare which will adversely affect day or nighttime views in the area?	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<i>Section 3.1 Aesthetic and Visual Resources Impact AES-6</i>

### Analysis

As discussed in the PPSP EIR, there are no designated scenic vistas or state-designated scenic highways in the project vicinity. The project site does not contain other scenic resources such as rock outcroppings or historic buildings.

Redevelopment of the site would alter the visual character of the site, but it would not substantially degrade the visual character or quality of the site and its surroundings. Currently the site is developed with a two-story office building. The existing building will be demolished to construct a four-story office building and a five-level parking structure with partial underground parking. The building heights proposed are within the maximum allowed in the PPSP and City's Zoning Code. The proposed architectural style is contemporary and is consistent with the vision and design guidelines described in the PPSP.

There are 35 trees currently existing on the site, including street trees. Of the 35 trees, 26 trees are proposed to be removed. The project is designed to preserve most the mature redwood trees and ash trees lining the southern boundary of the site. Consistent with the PPSP EIR, the project is subject to the City's Tree Preservation Ordinance and current Tree Replacement Policy. The project will not result in new or more significant impacts to aesthetics than disclosed in the PPSP EIR. (No New Impact)

The PPSP EIR concluded that the implementation of the PPSP would change the visual character of the PPSP area. Development consistency with the applicable design guidelines and development standards in the PPSP would enhance the character and quality of the area and avoid significant, adverse changes in visual character.

## Agricultural and Forestry Resources

Would the project:	Equal or Less Severity of Impact Previously Identified in the PPSP EIR	Substantial Increase in Severity of Previously Identified Significant Impact in PPSP EIR	New Significant Impact	Where the Impact was Analyzed in the PPSP EIR
a) Convert Prime Farmland, Unique Farmland, or Farmland of Statewide Importance (Farmland), as shown on the maps prepared pursuant to the Farmland Mapping and Monitoring Program of the California Resources Agency, to non-agricultural use?	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<i>Section 4.4 Areas Found Not to be Significant</i>
b) Conflict with existing zoning for agricultural use, or a Williamson Act contract?	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<i>Section 4.4 Areas Found Not to be Significant</i>
c) Conflict with existing zoning for, or cause rezoning of, forest land (as defined in Public Resources Code section 12220(g)), timberland (as defined by Public Resources Code section 4526), or timberland zoned Timberland Production (as defined by Government Code section 51104(g))?	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<i>Section 4.4 Areas Found Not to be Significant</i>
d) Result in a loss of forest land or conversion of forest land to non-forest use?	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<i>Section 4.4 Areas Found Not to be Significant</i>
e) Involve other changes in the existing environment which, due to their location or nature, could result in conversion of Farmland, to non-agricultural use or conversion of forest land to non-forest use?	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<i>Section 4.4 Areas Found Not to be Significant</i>

### Analysis

The project site is not designated as farmland. It is developed, zoned and designated for urban development. The project would have no impacts on agricultural or forestry uses, and would not result in new or more significant impacts to agricultural or forestry resources than disclosed in the PPSP EIR. (No New Impact)

## Air Quality

Would the project:	Equal or Less Severity of Impact Previously Identified in the PPSP EIR	Substantial Increase in Severity of Previously Identified Significant Impact in PPSP EIR	New Significant Impact	Where the Impact was Analyzed in the PPSP EIR
a) Conflict with or obstruct implementation of the applicable air quality plan?	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<i>Section 3.2 Air Quality Impact AQ-4</i>
b) Violate any air quality standard or contribute substantially to an existing or projected air quality violation?	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<i>Section 3.2 Air Quality Impact AQ-1</i>
c) Result in a cumulatively considerable net increase of any criteria pollutant for which the project region is classified as non-attainment under an applicable federal or state ambient air quality standard including releasing emissions which exceed quantitative thresholds for ozone precursors?	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<i>Section 3.2 Air Quality Impact AQ-5</i>
d) Expose sensitive receptors to substantial pollutant concentrations?	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<i>Section 3.2 Air Quality Impact AQ-5</i>
e) Create objectionable odors affecting a substantial number of people?	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<i>Section 3.2 Air Quality</i>

*Analysis*

The PPSP EIR concluded that the implementation of the PPSP would not conflict with or obstruct implementation of the 2010 Clean Air Plan because the projected growth is consistent with local and regional policies. The amount of development proposed by the project is included in the PPSP. In conformance with the Bay Area Air Quality Management District (BAAQMD) CEQA Air Quality Guidelines and PPSP EIR, the project must implement mitigation measure MM AQ-1 and MM AQ-2 from the PPSP EIR to control dust and exhaust during construction and mitigate any potential air quality impacts. The PPSP EIR concluded that the buildout of the PPSP (construction and operation) would not result in significant odor impacts because standard construction requirements would minimize odors from construction activity and the planned land uses (included the proposed office and commercial uses) are not odor generating land uses such as agricultural uses, wastewater treatment plants, and landfills. The project would not result in new or more significant impacts to air quality than disclosed in the PPSP EIR. (No New Impact)

## Biology

Would the project:	Equal or Less Severity of Impact Previously Identified in the PPSP EIR	Substantial Increase in Severity of Previously Identified Significant Impact in PPSP EIR	New Significant Impact	Where the Impact was Analyzed in the PPSP EIR
a) Have a substantial adverse effect, either directly or through habitat modifications, on any species identified as a candidate, sensitive, or special status species in local or regional plans, policies, or regulations, or by the California Department of Fish and Wildlife or US Fish and Wildlife Service?	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<i>Section 4.4 Areas Found Not to be Significant</i>
b) Have a substantial adverse effect on any riparian habitat or other sensitive natural community identified in local or regional plans, policies, regulations, or by the California Department of Fish and Wildlife or US Fish and Wildlife Service?	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<i>Section 4.4 Areas Found Not to be Significant</i>
c) Have a substantial adverse effect on federally protected wetlands as defined by Section 404 of the Clean Water Act (including, but not limited to, marsh, vernal pool, coastal, etc.) through direct removal, filling, hydrological interruption, or other means?	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<i>Section 4.4 Areas Found Not to be Significant</i>
d) Interfere substantially with the movement of any native resident or migratory fish or wildlife species or with established native resident or migratory wildlife corridors, or impede the use of native wildlife nursery sites?	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<i>Section 4.4 Areas Found Not to be Significant</i>
e) Conflict with any local policies or ordinances protecting biological resources, such as a tree preservation policy or ordinance?	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<i>Section 4.4 Areas Found Not to be Significant</i>
f) Conflict with the provisions of an adopted Habitat Conservation Plan, Natural Community Conservation Plan, or other approved local, regional, or state habitat conservation plan?	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<i>Section 4.4 Areas Found Not to be Significant</i>

### Analysis

The project area is fully developed, does not contain potential natural habitats (such as riparian corridors or wetlands) for any sensitive species identified as a candidate, sensitive or special status species and is not a wildlife corridor. Trees on the site, however, provide potential nesting habitat for raptors and migratory birds as observed in a Biological Resources survey by H.T. Harvey & Associates of the site, dated September 22, 2015. Should active nests be present, tree removal and other construction activities could result in loss or abandonment of the nest and result in an impact to these species. As required by the Migratory Bird Treaty Act (MBTA), the following standard measures will be incorporated into the project conditions of approval and standard requirements to reduce potential impacts:

**BIRD NESTING**

Construction activities shall avoid the nesting season to the extent feasible.

- a) If construction would commence anytime during nesting/breeding season of native bird species (typically February through August in the region), a qualified biologist shall conduct a preconstruction survey of the project vicinity for nesting/breeding birds at least 30 days prior to the start of construction activities. The survey shall determine if active raptor nests or other species protected by the Migratory Bird Treaty Act are present within the construction zone or within 250 ft. of construction for raptors and 50 ft. of the construction zone for other migratory birds. The survey area shall include all trees and shrubs within that zone that have the potential to support nesting birds.
- b) If active nests are found in areas that could be directly affected or are within 250 ft. of construction for raptors and 50 ft. for other migratory birds, a no-disturbance buffer zone shall be created around active nests during the breeding season or until a qualified biologist determines that all young have fledged. Once the young have fledged, tree removal and other construction activities may commence.
- c) Any construction buffer zone must be implemented and maintained during construction activities.

The project, with the implementation of the above standard measure, would not result in new or more significant impacts to nesting birds than disclosed in the PPSP EIR. (No New Impact)

The primary biological resource onsite is trees. An arborist report was completed by Walter Levison, dated October 5, 2015. There are 35 trees currently existing on the site, including street trees. Of the 35 trees, 26 are proposed to be removed. The project is designed to preserve most the mature redwood trees and ash trees lining the southern boundary of the site. Of the 26 trees proposed for removal, 17 are considered "protected" (circumference of 38 inches or greater at breast height) per the City's Tree Preservation Ordinance. Consistent with the PPSP EIR, the project is subject to the City's Tree Preservation Ordinance and current Tree Replacement Policy. The project will not result in new or more significant impacts to trees than disclosed in the PPSP EIR. (No New Impact)

## Cultural Resources

Would the project:	Equal or Less Severity of Impact Previously Identified in the PPSP EIR	Substantial Increase in Severity of Previously Identified Significant Impact in PPSP EIR	New Significant Impact	Where the Impact was Analyzed in the PPSP EIR
a) Cause a substantial adverse change in the significance of an historical resource as defined in §15064.5?	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<i>Section 3.3 Cultural Resources Impact CR-2</i>
b) Cause a substantial adverse change in the significance of an archaeological resource as defined in §15064.5?	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<i>Section 3.3 Cultural Resources Impact CR-4</i>
c) Directly or indirectly destroy a unique paleontological resource or site, or unique geologic feature?	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<i>Section 3.3 Cultural Resources Impact CR-3</i>
d) Disturb any human remains, including those interred outside of formal cemeteries?	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<i>Section 3.3 Cultural Resources Impact CR-4</i>

### Analysis

The building on the project site is not considered a historic resource as defined by CEQA Section 15064.5. Existing historic resources within the PPSP area are Libby Tower and Mellow's Nursery and Farm, neither of which are on the project site.

While the project area does not contain any known archaeological resources, there is a potential for unknown buried archaeological resources to be encountered during redevelopment of the project area. The project site is located on a broad alluvial plain. The undifferentiated alluvial deposits within the project area date from the Holocene age and have been known to overlay archaeological material with sterile alluvium of varying depths. Given the similarity of these environmental factors, there is a moderate potential of identifying unrecorded Native American resources in the project area.

Consistent with the project-specific record research results by California Historic Resources Information System, dated 9/16/15, and the records search for the PPSP EIR, the project must implement mitigation measures MM CR-3, MM CR-4, MM CR-5 and MM CR-6 to reduce impacts to unknown, buried archaeological or paleontological resources to a less than significant level. With the implementation of these measures, the project would not result in new or more significant impacts than identified in the PPSP EIR. (No New Impact)

## Geology and Soils

Would the project:	Equal or Less Severity of Impact Previously Identified in the PPSP EIR	Substantial Increase in Severity of Previously Identified Significant Impact in PPSP EIR	New Significant Impact	Where the Impact was Analyzed in the PPSP EIR
a) Expose people or structures to potential substantial adverse effects, including the risk of loss, injury, or death involving: <ul style="list-style-type: none"> <li>i. Rupture of a known earthquake fault, as described on the most recent Alquist-Priolo Earthquake Fault Zoning Map issued by the State Geologist for the area or based on other substantial evidence of a known fault? (Refer to Division of Mines and Geology Special Publication 42.)</li> <li>ii. Strong seismic ground shaking?</li> <li>iii. Seismic-related ground failure, including liquefaction?</li> <li>iv. Landslides?</li> </ul>	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<i>Section 4.4 Areas Found Not to be Significant</i>
b) Result in substantial soil erosion or the loss of topsoil?	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<i>Section 4.4 Areas Found Not to be Significant</i>
c) Be located on a geologic unit or soil that is unstable, or that will become unstable as a result of the project, and potentially result in on- or off-site landslide, lateral spreading, subsidence, liquefaction or collapse?	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<i>Section 4.4 Areas Found Not to be Significant</i>
d) Be located on expansive soil, as defined in Section 1802.3.2 of the California Building Code (2007), creating substantial risks to life or property?	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<i>Section 4.4 Areas Found Not to be Significant</i>
e) Have soils incapable of adequately supporting the use of septic tanks or alternative wastewater disposal systems where sewers are not available for the disposal of wastewater?	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<i>Section 4.4 Areas Found Not to be Significant</i>

### Analysis

The California Building Code contains a series of building code requirements to address safety issues regarding seismic shaking, flooding and soil types. In addition, Title 16 of the Sunnyvale Municipal Code requires a series of measures for provisions to reduce flood-related hazards to buildings. These standards are suggested by the Federal Emergency Management Agency and required by code by the City of Sunnyvale. These standards must be met for building permits to be issued for the project.

As concluded in the PPSP EIR, the existing state and City building and grading regulations would reduce or avoid significant geology and soil impacts. The project does not propose the use of septic tanks or alternative wastewater disposal systems. The project would not result in new or more significant geology and soils impacts than identified in the PPSP EIR. (No New Impact)

## Greenhouse Gas Emissions

Would the project:	Equal or Less Severity of Impact Previously Identified in the PPSP EIR	Substantial Increase in Severity of Previously Identified Significant Impact in PPSP EIR	New Significant Impact	Where the Impact was Analyzed in the PPSP EIR
a) Generate greenhouse gas emissions, either directly or indirectly, that may have a significant impact on the environment?	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<i>Section 3.4 Greenhouse Gas Impact GHG-1</i>
b) Conflict with an applicable plan, policy or regulation adopted for the purpose of reducing the emissions of greenhouse gases?	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<i>Section 3.4 Greenhouse Gas Impact GHG-1</i>

### Analysis

The development of the project (including demolition, construction and operation) would generate greenhouse gas emissions. The certified 2016 PPSP concluded that the buildout of the PPSP (which includes the development of the project) would result in significant and unavoidable greenhouse gas emissions. Consistent with the PPS EIR, the project shall implement the following mitigation measures from the PPSP EIR:

- MM AQ-1 Fugitive Dust Plan
- MM AQ-2 Construction-Related Emissions Reduction Plan
- MM GHG-1

The project, with the implementation of the above mitigation measures from the PPSP EIR, would not result in a new or more significant greenhouse gas emissions. (No New Impact)

## Hazards and Hazardous Materials

Would the project:	Equal or Less Severity of Impact Previously Identified in the PPSP EIR	Substantial Increase in Severity of Previously Identified Significant Impact in PPSP EIR	New Significant Impact	Where the Impact was Analyzed in the PPSP EIR
a) Create a significant hazard to the public or the environment through the routine transport, use, or disposal of hazardous materials?	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<i>Section 3.5 Hazards and Hazardous Materials Impact HAZ-2</i>
b) Create a significant hazard to the public or the environment through reasonably foreseeable upset and accident conditions involving the release of hazardous materials into the environment?	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<i>Section 3.5 Hazards and Hazardous Materials</i>
c) Emit hazardous emissions or handle hazardous or acutely hazardous materials, substances, or waste within one-quarter mile of an existing or proposed school?	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<i>Section 3.5 Hazards and Hazardous Materials</i>
d) Be located on a site which is included on a list of hazardous materials sites compiled pursuant to Government Code Section 65962.5 and, as a result, will it create a significant hazard to the public or the environment?	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<i>Section 3.5 Hazards and Hazardous Materials</i>
e) For a project located within an airport land use plan or, where such a plan has not been adopted, within two miles of a public airport or public use airport, will the project result in a safety hazard for people residing or working in the project area?	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<i>Section 3.5 Hazards and Hazardous Materials Impact HAZ-3</i>
f) For a project within the vicinity of a private airstrip, will the project result in a safety hazard for people residing or working in the project area?	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<i>Section 3.5 Hazards and Hazardous Materials</i>
g) Impair implementation of, or physically interfere with, an adopted emergency response plan or emergency evacuation plan?	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<i>Section 3.5 Hazards and Hazardous Materials</i>
h) Expose people or structures to a significant risk of loss, injury or death involving wildland fires, including where wildlands are adjacent to urbanized areas or where residences are intermixed with wildlands?	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<i>Section 3.5 Hazards and Hazardous Materials</i>

*Analysis*

A Phase I environmental site assessment was completed for the project site by O'Brien & Gere, dated 7/12/07. The study concluded that there is evidence of a recognized environmental condition in connection with the project site. Insignificant or no contaminant impact likely remains at the present time and O'Brien & Gere does not recommend further environmental investigation at this time. The project would not result in new or more significant impacts than identified in the PPSP EIR. (No New Impact)

The project site is within the Airport Influence Area for the Moffett Federal Airfield, as defined by the Moffett Federal Airfield Comprehensive Land Use Plan. The CLUP includes land use compatibility policies and standards, which forms the basis for evaluating the land use compatibility of individual projects with the Airfield and its operations. Santa Clara County Airport Land Use Commission (ALUC) staff has determined the project to be outside of any noise or safety zones and consistent with ALUC height policies as defined in the CLUP. An Avigation Easement is required to be dedicated to the United States Government on behalf of Moffett Federal Airfield, consistent with the CLUP. The project has also received a Determination of No Hazard to Air Navigation by Federal Aviation Administration, dated 10/20/15. (No New Impact)

## Hydrology and Water Quality

Would the project:	Equal or Less Severity of Impact Previously Identified in the PPSP EIR	Substantial Increase in Severity of Previously Identified Significant Impact in PPSP EIR	New Significant Impact	Where the Impact was Analyzed in the PPSP EIR
a) Violate any water quality standards or waste discharge requirements?	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<i>Section 4.4 Areas Found Not to be Significant</i>
b) Substantially deplete groundwater supplies or interfere substantially with groundwater recharge such that there will be a net deficit in aquifer volume or a lowering of the local groundwater table level (e.g., the production rate of pre-existing nearby wells will drop to a level which will not support existing land uses or planned uses for which permits have been granted)?	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<i>Section 4.4 Areas Found Not to be Significant</i>
c) Substantially alter the existing drainage pattern of the site or area, including through the alteration of the course of a stream or river, in a manner which will result in substantial erosion or siltation on-or off-site?	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<i>Section 4.4 Areas Found Not to be Significant</i>
d) Substantially alter the existing drainage pattern of the site or area, including through the alteration of the course of a stream or river, or substantially increase the rate or amount of surface runoff in a manner which will result in flooding on-or off-site?	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<i>Section 4.4 Areas Found Not to be Significant</i>
e) Create or contribute runoff water which will exceed the capacity of existing or planned stormwater drainage systems or provide substantial additional sources of polluted runoff?	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<i>Section 4.4 Areas Found Not to be Significant</i>
f) Otherwise substantially degrade water quality?	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<i>Section 4.4 Areas Found Not to be Significant</i>
g) Place housing within a 100-year flood hazard area as mapped on a Federal Flood Hazard Boundary or Flood Insurance Rate Map or other flood hazard delineation map?	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<i>Section 4.4 Areas Found Not to be Significant</i>
h) Place within a 100-year flood hazard area structures which will impede or redirect flood flows?	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<i>Section 4.4 Areas Found Not to be Significant</i>

## Check list for Conformance with PPSP - EIR

Project Name: 675 Almanor Ave.

File #2015-8110

Page 20 of 34

Would the project:	Equal or Less Severity of Impact Previously Identified in the PPSP EIR	Substantial Increase in Severity of Previously Identified Significant Impact in PPSP EIR	New Significant Impact	Where the Impact was Analyzed in the PPSP EIR
i) Expose people or structures to a significant risk of loss, injury or death involving flooding, including flooding as a result of the failure of a levee or dam?	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<i>Section 4.4 Areas Found Not to be Significant</i>
j) Inundation by seiche, tsunami, or mudflow?	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<i>Section 4.4 Areas Found Not to be Significant</i>

*Analysis*

As discussed in the PPSP EIR, the project is required to comply with existing regulations to reduce water quality impacts to a less than significant level, including Municipal Code Section 12.60.155 regarding low impact development site design; City's building and grading standards; General Permit for Discharges of Storm Water Associated with Construction Activity (General Permit Order 2009-009-DWQ); National Pollution Discharge Elimination System Permit; and SWPPP guidance. Development of the project would decrease impervious surfaces by 21% percent. The project would not result in new or more significant hydrology and water quality impacts than identified in the PPSP EIR. (No New Impact)

Land Use

Would the project:	Equal or Less Severity of Impact Previously Identified in the PPSP EIR	Substantial Increase in Severity of Previously Identified Significant Impact in PPSP EIR	New Significant Impact	Where the Impact was Analyzed in the PPSP EIR
a) Physically divide an established community?	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<i>Section 3.6 Land Use and Planning Impact LU-1</i>
b) Conflict with any applicable land use plan, policy, or regulation of an agency with jurisdiction over the project (including, but not limited to the general plan, specific plan, local coastal program, or zoning ordinance) adopted for the purpose of avoiding or mitigating an environmental effect?	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<i>Section 3.6 Land Use and Planning Impact LU-2</i>
c) Conflict with any applicable habitat conservation plan or natural community conservation plan?	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<i>Section 3.6 Land Use and Planning Impact LU-3</i>

*Analysis*

The redevelopment of the project site with office and commercial uses is consistent with the PPSP, the City's General Plan and Zoning Ordinance, and would not introduce a new land use to the area or divide an established community. The PPSP EIR concluded that implementation of the PPSP (including redevelopment of the project site with office and commercial uses) would be compatible with surrounding land uses and would not physically disrupt or divide adjacent established communities. (No New Impact)

The project is also subject to the CLUP, with which the ALUC has determined the project to be consistent by dedicating an avigation easement. (No New Impact)

**Mineral Resources**

Would the project:	Equal or Less Severity of Impact Previously Identified in the PPSP EIR	Substantial Increase in Severity of Previously Identified Significant Impact in PPSP EIR	New Significant Impact	Where the Impact was Analyzed in the PPSP EIR
a) Result in the loss of availability of a known mineral resource that will be of value to the region and the residents of the state?	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<i>Section 4.4 Areas Found Not to be Significant</i>
b) Result in the loss of availability of a locally-important mineral resource recovery site delineated on a local general plan, specific plan or other land use plan?	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<i>Section 4.4 Areas Found Not to be Significant</i>

*Analysis*

The project site does not contain any known mineral sources. (No New Impact)

## Noise

Would the project result in:	Equal or Less Severity of Impact Previously Identified in the PPSP EIR	Substantial Increase in Severity of Previously Identified Significant Impact in PPSP EIR	New Significant Impact	Where the Impact was Analyzed in the PPSP EIR
a) Exposure of persons to or generation of noise levels in excess of standards established in the local general plan or noise ordinance, or applicable standards of other agencies?	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<i>Section 3.7 Noise Impact NOI-2</i>
b) Exposure of persons to, or generation of, excessive groundborne vibration or groundborne noise levels?	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<i>Section 3.7 Noise Impact NOI-2</i>
c) A substantial permanent increase in ambient noise levels in the project vicinity above levels existing without the project?	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<i>Section 3.7 Noise Impact NOI-3</i>
d) A substantial temporary or periodic increase in ambient noise levels in the project vicinity above levels existing without the project?	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<i>Section 3.7 Noise Impact NOI-4</i>
e) For a project located within an airport land use plan or, where such a plan has not been adopted, within two miles of a public airport or public use airport, will the project expose people residing or working in the project area to excessive noise levels?	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<i>Section 3.7 Noise Impact NOI-5</i>
f) For a project within the vicinity of a private airstrip, will the project expose people residing or working in the project area to excessive noise levels?	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<i>Section 3.7 Noise Impact NOI-5</i>

### Analysis

The proposed uses are not anticipated to be noise generating and there are no sensitive land uses in the immediate vicinity. The nearest sensitive land uses are the residences located west of N. Mathilda Ave. The noise environment at the site and in the surrounding areas results primarily from vehicular traffic along N. Mathilda Ave. and U.S. Highway 101. Construction-related noise, however, is anticipated, as described in the PPSP EIR. Construction will not include deep pile foundations or pile driving or extremely high noise-generating activities or significant vibration. The applicant has stated that auger cast piles or drilled piers will be implemented instead per geotechnical recommendation. Consistent with the PPSP EIR, the project shall implement the following mitigation measures to reduce construction-related noise impacts:

- MM NOI-1 Additional Project Review
- MM NOI-4a Construction Noise Control Measures
- MM NOI-4b Pile Driving Noise-Reducing Techniques and Muffling Devices

The project, with the implementation of the above mitigation measures from the PPSP EIR, would not result in new or more significant noise impacts. (No New Impact)

The ALUC has issued a determination that the project is consistent with the CLUP and is outside of the noise contours.  
(No New Impact)

## Population and Housing

Would the project:	Equal or Less Severity of Impact Previously Identified in the PPSP EIR	Substantial Increase in Severity of Previously Identified Significant Impact in PPSP EIR	New Significant Impact	Where the Impact was Analyzed in the PPSP EIR
a) Induce substantial population growth in an area, either directly (for example, by proposing new homes and businesses) or indirectly (for example, through extension of roads or other infrastructure)?	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<i>Section 3.8 Population and Housing Impact PH-1</i>
b) Displace substantial numbers of existing housing, necessitating the construction of replacement housing elsewhere?	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<i>Section 3.8 Population and Housing Impact PH-1</i>
c) Displace substantial numbers of people, necessitating the construction of replacement housing elsewhere?	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<i>Section 3.8 Population and Housing Impact PH-1</i>

### Analysis

The PPSP EIR concluded that the development of the PPSP (which includes development of the proposed project) would not induce substantial population growth in the City. The project site does not contain housing units; therefore, it would not displace existing housing or residents. The project would not result in new or more significant impacts to population and housing than identified in the PPSP EIR. (No New Impact)

## Transportation, Circulation, and Traffic

Would the project:	Equal or Less Severity of Impact Previously Identified in the PPSP EIR	Substantial Increase in Severity of Previously Identified Significant Impact in PPSP EIR	New Significant Impact	Where the Impact was Analyzed in the PPSP EIR
a) Conflict with an applicable plan, ordinance or policy establishing measures of effectiveness for the performance of the circulation system, taking into account all modes of transportation including mass transit and non-motorized travel and relevant components of the circulation system, including but not limited to intersections, streets, highways and freeways, pedestrian and bicycle paths, and mass transit?	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<i>Section 3.10 Transportation</i>
b) Conflict with an applicable congestion management program, including, but not limited to level of service standards and travel demand measures, or other standards established by the county congestion management agency for designated roads or highways?	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<i>Section 3.10 Transportation</i>
c) Result in a change in air traffic patterns, including either an increase in traffic levels or a change in location that results in substantial safety risks?	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<i>Section 3.10 Transportation</i>
d) Substantially increase hazards due to a design feature (e.g., sharp curves or dangerous intersections) or incompatible land uses (e.g., farm equipment)?	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<i>Section 3.10 Transportation</i>
e) Result in inadequate emergency access?	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<i>Section 3.10 Transportation</i>
f) Conflict with adopted policies, plans, or programs regarding public transit, bicycle, or pedestrian facilities, or otherwise decrease the performance or safety of such facilities?	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<i>Section 3.10 Transportation</i>

### Analysis

A Traffic Impact Analysis was prepared by AECOM, dated January 2017. The report notes that the number of net new project trips anticipated to be added to the roadway system surrounding the project site, based on the data published in the Institute of Transportation Engineer's (ITE) Trip Generation 9<sup>th</sup> Edition, are 158 net trips in the AM peak hour and 145 net trips in the PM peak hour. The study analyzed the traffic impacts of the proposed development at 13 intersections in the vicinity of the project site during the AM and PM peak hour traffic conditions. The analysis indicates, measured against both the City of Sunnyvale and Valley Transportation Authority (VTA) significance standards, all of the study intersection will continue to operate at acceptable levels of service with and without the proposed project under existing and

background scenarios. Therefore, it is anticipated that the existing roadway system can accommodate the incremental increase in the trips. No traffic impacts are anticipated. (No New Impact)

The traffic analysis for this project tiered off of the cumulative analysis completed for the Peery Park Specific Plan. On September 20, 2016, City Council adopted a Statement of Overriding Considerations for the Peery Park Specific Plan's significant and unavoidable impacts related to transportation and certified the EIR and Mitigation Measures and Monitoring Report (MMRP). As identified in the PPSP EIR, the project shall implement the following mitigation measures related to transportation, circulation and traffic impacts:

- **MM T-1** Construction Impact Mitigation Plan
- **MM T-2a** Third Westbound Left-Turn Lane at the intersection of Mary Avenue and Central Expressway
- **MM T-2b** County of Santa Clara Expressway Plan 2040 Fee
- **MM T-3** Valley Transportation Authority Valley Transportation Plan 2040 Fee
- **MM T-6a** Transportation Management Agency
- **MM T-6b** Transportation Impact Fee

The project, with the implementation of the above mitigation measures from the PPSP EIR, would not result in new or more significant transportation, circulation and traffic impacts. The project would not result in new or more significant impacts to transportation than disclosed in the PPSP EIR and will be required to pay their fair share for mitigation measures identified in the PPSP EIR. (No New Impact)

The project has been reviewed by the City Fire Prevention Division and Transportation Division and does not contain design features that will substantially increase hazards or result in inadequate emergency access. The project will not result in a change to air traffic patterns. (No New Impact)

## Utilities and Service Systems

Would the project:				
a) Exceed wastewater treatment requirements of the applicable Regional Water Quality Control Board?	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<i>Section 3.11 Public Services Impact UT-1</i>
b) Require or result in the construction of new water or wastewater treatment facilities or expansion of existing facilities, the construction of which could cause significant environmental effects?	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<i>Section 3.11 Public Services Impact UT-2</i>
c) Require or result in the construction of new stormwater drainage facilities or expansion of existing facilities, the construction of which could cause significant environmental effects?	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<i>Section 3.11 Public Services Impact UT-2</i>
d) Have sufficient water supplies available to serve the project from existing entitlements and resources, or are new or expanded entitlements needed?	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<i>Section 3.11 Public Services Impact UT-2</i>
e) Result in a determination by the wastewater treatment provider which serves or may serve the project that it has adequate capacity to serve the project's projected demand in addition to the provider's existing commitments?	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<i>Section 3.11 Public Services Impact UT-5</i>
f) Be served by a landfill with sufficient permitted capacity to accommodate the project's solid waste disposal needs?	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<i>Section 3.11 Public Services Impact UT-6</i>
g) Comply with federal, state and local statutes and regulations related to solid waste?	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<i>Section 3.11 Public Services Impact UT-7</i>

### Analysis

The PPSP EIR concluded that buildout of the PPSP (which includes the proposed project) would likely require improvements to the existing water and wastewater system as applicable. Consistent with the PPSP EIR, the project shall pay the Peery Park Infrastructure Fees (mitigation measures MM UT-1 and MM UT-2) to ensure adequate financing for funding of water and wastewater infrastructure improvements. The project, therefore, would not result in a significant impact to the water or wastewater system with the implementation of the mitigation measures identified in the PPSP EIR. (No New Impact).

## Mandatory Findings of Significance

	Equal or Less Severity of Impact Previously Identified in the PPSP EIR	Substantial Increase in Severity of Previously Identified Significant Impact in PPSP EIR	New Significant Impact	Where the Impact was Analyzed in the PPSP EIR
a) Does the project have the potential to degrade the quality of the environment, substantially reduce the habitat of a fish or wildlife species, cause a fish or wildlife population to drop below self-sustaining levels, threaten to eliminate a plant or animal community, reduce the number or restrict the range of a rare or endangered plant or animal or eliminate important examples of the major periods of California history or prehistory?	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
b) Does the project have impacts that are individually limited, but cumulatively considerable? ("Cumulatively considerable" means that the incremental effects of a project are considerable when viewed in connection with the effects of past projects, the effects of other current projects, and the effects of probable future projects)?	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
c) Does the project have the potential to achieve short-term environmental goals to the disadvantage of long-term environmental goals?	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
d) Does the project have environmental effects which will cause substantial adverse effects on human beings, either directly or indirectly?	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>

### Analysis

Implementation of the identified mitigation measures in this environmental checklist and compliance with applicable policies and regulations, the proposed project would not result in new or more significant impacts than identified in the PPSP EIR. The project will be subject to the PPSP EIR MMRP. (No New Impact)

**WHEN:** These mitigations shall be incorporated by reference into conditions of approval (Attachment 5) for the Peery Park Conditional Use Permit and the Peery Park Plan Review Permit) prior to its final approval by the City's Planning Commission. The conditions will become valid when the application is approved and prior to building permit issuance.

**WHO:** The project applicant or property owner shall be solely responsible for implementation and maintenance of these mitigation measures.

**HOW:** The conditions of approval will require these mitigation measures to be incorporated into the construction plans.

Responsible Division:                      Planning Division                      Completed by:      Momoko Ishijima      Date:      2/28/17
