Detail Description

Car wash already have existing machines. It is proposed to add 4 machines inside the tunnel to increase the efficiency of the car wash. It will not increase customers

Car wash already have existing vacuum. It is proposed to move the vacuum to different location with trellis to provide shade to the employees. Increasing from 3 vacuum spots to 8 vacuum spots will not increase the noise level as all the 8 vacuums are run by the same/existing machine located at the car wash.

Noise study has been performed. 4 new machines will not add noise to existing noise level. Also, moving the vacuums will decrease the noise level from existing noise level.
